Melamine/Laminate/PVC Edgebanding Matches

These charts depict a variety of WalzCraft stain color and wood species combinations that are “approximate matches” to some popular Melamine colors. Stained or painted wood is never considered an exact match to Melamine or Laminate colors. Wood by nature varies in color within each species and tends to gradually change color over time. WalzCraft grades are sorted for color, however there is little control over how the material will accept a finish or age in the future.
