Drawing Represents a 45" W x 8"H valance.

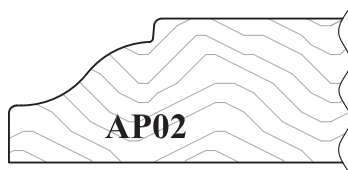

Accent Profiles

- Available on Solid Wood and Raw MDF.
- Available in ¾" and 1" thicknesses.
- Applied to one straight line edge only.
- Mitered and Dado Groove options are available on Face Frame Stock with an Accent Profile, if the Accent Profile is on the opposite edge of the Accent Profile.

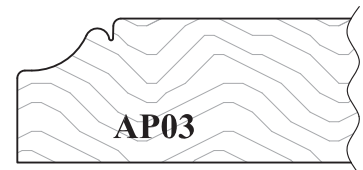

These are the standard **Accent Profiles** that WalzCraft offers for Valances and Face Frame Stock.

AP01

AP02

AP03

Example of a **Style # 1712** valance showing where an accent profile can be added.

- ★ **Accent Profile on Valances: Add Charge per Square Foot.** ★
- ★ **Accent Profile on Face Frame Stock: Add Charge per Lineal Inch.** ★

★ **1" Thick Products: Add 30% to the ¾" Square Foot Price from our Specification Catalog.** ★

Valances

“WalzCraft is a Premier Leader in the Industry for Manufacturing Custom Products!”

Valance Notes

1)	Outside Edge Profiles	D15 is considered the “Standard” Outside Edge for most valances, and D7 is also available on <u>all</u> valances. When using either of these profiles, there is no additional charge for the Outside Edge Profile. <i>For additional Outside Edge options, please refer to our Specification Catalog.</i>
2)	Applied Molding Outside Edge Profiles	Applied molding outside edges are <u>only available</u> on the Style #170 valance and will carry an upcharge per square foot upcharge. A 5/8" thickness may be required for some of the applied edge options, in this case <i>additional design charges may apply.</i>
3)	Style 157, 199 & 1712	Customer specifies the width, height, narrowest point of the valance (1" minimum) and flat portion at the left and right sides. #1712 height must be greater than or equal to the narrowest plus 2½", to maintain the “Look” of the valance design.
4)	Style 158, 211, 212, 213, 883, 917, 1226 & 1387	Adding an outside edge profile, other than D7 to these valance designs may require a change in the pattern placement. These will be processed by our Non-Catalog Team and additional charges may apply. The same procedure applies to the Style #170 valance with a VR rout pattern.
5)	Style 1226	The minimum width at the “narrowest” point and for the bottom is 2¼". Please specify the dimension needed if you desire another size. A 1" flat dimension must be maintained for the routed opening on each side.
6)	Style 175, 1724, 1726, 1789 & 1790	Customer specifies the width, height and flat portion at the left and right sides.
7)	Style 1713	Customer specifies the width, height and narrowest point of the valance. Height must be greater than or equal to the narrowest plus 3¾", to maintain the “Look” of the valance design.
8)	Style 984, 1724, 1740, 1790, 2058 & 2064	<u>Only</u> available with the following outside edge profiles: D7, D12, D15, D17, D18, D21, D24, D32, D41, D52, D67, D93, D101, D102, D115, D118 and D120. D7 and D15 are available with <u>no</u> upcharge. The other outside edge options will carry an additional upcharge per square foot.
