WalzCraft's glass is not considered safety glass (i.e. tempered, laminated, etc.) and should not be used where safety glass is required.

** Please see our Website at www.WalzCraft.com for color photos of all Designer Glass Patterns installed in frame only doors. **

Ordering & Pricing Notes: Designer Glass

Ordering Guidelines

1	Ordering (With a Door)	Please use Door Order Form - "Advanced Version" (E•Z Form #2) . <ul style="list-style-type: none"> • Check box to include Glass Retainer/Color or choose "None" in the designated space provided. • Indicate your chosen designer glass pattern (ex: DG-05) in the designated space provided. • Denote door quantity, style, width & height. • Check the "Frame Only" box or indicate the Mullion Lite Pattern and number of lites. • Denote "Designer Glass" in the "Special Instructions" column and row corresponding to the door requiring glass.
		For single or multiple opening frame only doors and single or multiple opening mullion doors with standard lites, if wanting to order designer glass from WalzCraft with your door, WalzCraft will calculate glass size based on your door specifications. This applies to doors with straight stiles & rails resulting in square or rectangular shaped glass only.
		WalzCraft does not calculate glass size for frame & mullion doors with true divided lites or frame only doors with shaped stiles or rails. For these styles we recommend waiting until you receive your door, then take it to your local glass supplier to have your glass cut to fit each opening.
2	Ordering (Without a Door)	Please use Molding & Miscellaneous Order Form (E•Z Form #5) . <ul style="list-style-type: none"> • Indicate your quantity and your chosen designer glass pattern (ex: DG-05). • Denote width x height (ex: 18"W x 26"H or 457.2mm x 660.4mm) in the "Description" column.
		When communicating dimensions, no adjustment is made to the size you provide. To ensure consistency, order exact size needed.
Pricing		
1	Pricing	Please see Section G.1 of our current Wholesale Pricing Catalog .

Technical Notes: Designer Glass

Cabinet Door & Drawer Front Options (Chapter B)

1	Rubber Glass Retainer	Rubber retainer is not automatically included with your frame and/or glass order. The retainer must be ordered separately, simply check the box on the order form to indicate your color preference.

Technical Notes: Designer Glass...continued

General Information (Chapter A)

1	Shipping	Glass ships to you directly from manufacturer.
		Please contact WalzCraft's Customer Support Team at 1-800-237-1326 to report any damage. <ul style="list-style-type: none"> • Inspect package content immediately. • If product is damaged, all packing material must be saved for UPS inspection. • Damage claims must be submitted to WalzCraft promptly.
		Shipping to Canada not available.

Miscellaneous

1	Color Photos	Please refer to our website at www.WalzCraft.com for color photos of all our Designer Glass Patterns, Leaded Glass configurations and Glass Shelving options.
2	Glass Inspection	All glass is thoroughly inspected for scratches and imperfections.
3	Availability	Available independently, with Frame Only Doors or with Mullion Doors with standard lites. Available in 13 different patterns including mirror and beveled.
4	Sandblasting	All patterns are available sandblasted. When ordering, include "-SB" after the glass pattern number, (ex: DG-60-SB, included in sample box). Sandblasting will be applied to one face only, making the glass more obscure.
5	Irregular Shapes	Glass for doors with shaped rails that require the frame to be routed to the contour for glass is available upon special request (ex: Door Style #'s 1060, 1080, 996L/996R).
6	Beveled Glass (Clear Only)	Single pane bevel glass has an overall thickness of 1/4" with a 1/4" [31.8mm] wide beveled edge that tapers down to 1/8" thick, and is compatible with our glass GRF frame rout and rubber retainer. Single Pane Beveled Glass is only available in square or rectangular shapes.
7	Edges	All sharp edges are sanded smooth for easy handling and installation.
8	Installation	It will be the customer's responsibility to install the glass into the door frame. Glass ships directly to you from the glass distributor in packaging separate from the doors. Detailed installation instructions are included in the package.
9	Building Code Standards	The installation of glass is subject to building code construction guidelines. <ul style="list-style-type: none"> • WalzCraft's glass is not considered safety glass (i.e. tempered, laminated, etc.) and should not be used where safety glass is required. • It is your responsibility to ensure that the installation of WalzCraft's Designer Glass, Leaded Glass and Glass Shelves meets your building code standards.

Passageway Door Options (Chapter C)

1	Passageway Doors	Designer Glass is not available for Passageway Doors.
---	------------------	---

Sizes/Dimensions

1	Thickness	Glass is 1/8" [3.2mm] thick and compatible with our glass frame rout (GRF) and rubber retainer.
2	Maximum Size and Pattern Direction	Designer Glass maximum width is 20" [508.0mm], maximum height is 55" [1397.0mm]. Pattern #'s: DG-05, DG-13, DG-14, DG-15, DG-26, DG-58, DG-MIR and DG-CLDS do not have a "pattern" direction and can be turned 90° for a maximum width of 55" [1397.0mm] and maximum height of 20" [508.0mm]. For glass with dimensions exceeding these maximums, please submit inquiries to our Customer Support Team and request a quote, as additional design charges may apply.

Formulas for Designer Glass Size Calculation

<ul style="list-style-type: none"> • Formula used to calculate the width/height of square or rectangular shaped glass to fit a single opening WalzCraft frame with straight stile & rail parts (does not include French Miter doors): <ul style="list-style-type: none"> ◦ Glass Width = (Door Width - (stile width x 2)) + (GRF width of 3/8" x 2) - (Frame/Glass Gap Width of 1/16" x 2) ◦ Glass Height = (Door Height - (rail width x 2)) + (GRF width of 3/8" x 2) - (Frame/Glass Gap Width of 1/16" x 2) ◦ Note: WalzCraft does not calculate glass size for frame & mullion doors with true divided lites or frame only doors with shaped stiles or rails. For these styles we recommend waiting until you receive your door, then take it to your local glass supplier to have your glass cut to fit each opening. • To calculate the width/height of square or rectangular shaped glass to fit a frame provided by another source, or a WalzCraft frame with multiple openings, with straight stile & rail parts: <ul style="list-style-type: none"> ◦ From the back side of your frame, measure the frame cavity opening (width & height) where the glass will set into the frame and deduct 1/8" (Frame/Glass Gap Width of 1/16" x 2) from your width and height dimension. <p style="text-align: center;">** Please see Section B.7 for calculating opening sizes for French Miter Doors. **</p>

Technical Notes: Leaded Glass...continued

Miscellaneous...continued

6	Installation	It will be the customer's responsibility to install the glass into the door frame. Glass ships directly to you from the glass distributor in packaging separate from doors. Leaded glass windows come with an installation kit including instructions, plastic clips and a tube of silicone. WalzCraft also offers wood retainer moldings. See molding #'s: 889, 1036, 1120 or 3094.
7	Building Code Standards	The installation of glass is subject to building code construction guidelines. <ul style="list-style-type: none"> • WalzCraft's glass is not considered safety glass (i.e. tempered, laminated, etc.) and should not be used where safety glass is required. • It is your responsibility to ensure that the installation of WalzCraft's Designer Glass, Leaded Glass and Glass Shelves meets your building code standards.

Passageway Door Options (Chapter C)

1	Passageway Doors	Leaded Glass is not available for Passageway Doors.
----------	-------------------------	---

Sizes /Dimensions

1	Thickness	Leaded Glass panels are ¼" [6.4mm] thick.
2	Minimum and Maximum Sizes	Maximum width is 18" [457.2mm]. Maximum height is 48" [1219.2mm]. Minimum sizes are noted below the image of your chosen pattern.
		<p>DB-13:</p> <ul style="list-style-type: none"> • There will be a single "X" for heights 15"H and under, with a minimum of 7"H. • There will be a double "X" (<i>as shown</i>) for heights from 15¼"H up to 32"H. • There will be a triple "X" for heights from 32½"H up to 48"H. <ul style="list-style-type: none"> • Special sizes outside of our minimums and maximums may be available upon request. • Some patterns, when approaching minimum widths between 9⅞" (shown) and 7", or minimum heights, may need to be altered slightly to remain proportionate. <ul style="list-style-type: none"> ◦ In either case, the approval of a CAD drawing may be required prior to placing an order. ◦ Please submit inquiries to our Customer Support Team, as additional design charges may apply. ◦ A quote will be provided.

Formulas for Designer Glass Size Calculation

- Formula used to calculate the width/height of square or rectangular shaped glass to fit a single opening WalzCraft frame with straight stile & rail parts (does not include French Miter doors):
 - **Glass Width** = (Door Width - (stile width x 2)) + (GRF width of ⅜" x 2) - (Frame/Glass Gap Width of ⅛" x 2)
 - **Glass Height** = (Door Height - (rail width x 2)) + (GRF width of ⅜" x 2) - (Frame/Glass Gap Width of ⅛" x 2)
 - Note: WalzCraft does not calculate glass size for frame & mullion doors with true divided lites or frame only doors with shaped stiles or rails. For these styles we recommend waiting until you receive your door, then take it to your local glass supplier to have your glass cut to fit each opening.
- To calculate the width/height of square or rectangular shaped glass to fit a frame provided by another source, or a WalzCraft frame with multiple openings, with straight stile & rail parts:
 - From the back side of your frame, measure the frame cavity opening (width & height) where the glass will set into the frame and deduct ⅞" (Frame/Glass Gap Width of ⅛" x 2) from your width and height dimension.

** Please see **Section B.7** for calculating opening sizes for French Miter Doors. **

Wire Mesh/Decorative Grilles - Website Only

Wire Mesh Grille Inserts have become a popular choice of accent door styles in both the residential & commercial cabinets & furniture fields because of their distinguishing look and variety of customizable features.

Wire Mesh Grille Inserts offer not only a visually pleasing accent to many furniture & cabinets designs, but they also offer an additional functional purpose by allowing air flow to and from the mesh area where there may be a need for breathability.

Please see our website at WalzCraft.com for all of our Wire Mesh Grill Insert options.

► For PRICING ► See Section G.6 in our current Wholesale Pricing Catalog.

Technical Notes: Combination Frame & Panel Doors...continued

Profile Options (Chapter E)

1	Stile & Rail Profiles	Doors with slats (SLT1, SLT2) are only available with stile & rail profile SR100 or MP612 .
		Doors with dowels (DWL1, DWL2) are only available with SR100-NPC or MP612-NPC .

Sizes/Dimensions

1	Slats	Slat width 1/2" [12.7mm].
		SLT1: Slats are 3/8" [9.5mm] thick will be recessed from the face of stiles and rails.
		SLT2: Slats are 3/4" thick [19.1mm] and will be flush with the face of stiles and rails.
		The number of slats and spacing will be determined by the door width and the space available. WalzCraft will try to maintain as close to 1/2" spacing between the slats as possible.
3	Dowels	DWL1: Dowel has a 3/8" [9.5mm] diameter.
		DWL2: Dowel has a 5/8" [15.9mm] diameter.
		The number of dowels and spacing will be determined by the door width and the space available. WalzCraft will try to maintain as close to 3/4" on center dowel spacing as possible.

Ordering & Pricing Notes: Center Panel Face Routs

Ordering Guidelines

1	Order Forms	Applicable order forms will include space to indicate your chosen CPFR pattern and spacing.
2	Ordering Guidelines	Specify Wood Species/Grade.
		When ordering doors/drawer fronts, specify the center panel profile (ie: ¼" Flat Panel, RVSCP-PR324) along with your door style, stile & rail profile and outside edge profile.
		Specify the Center Panel Face Rout (CPFR) option and spacing.
Pricing		
1	Pricing	Please see <i>Section G.7</i> of our current Wholesale Pricing Catalog.

Technical Notes: Center Panel Face Routs

Cabinet Door & Drawer Front Options (Chapter B, V)

1	1-Piece MDF Doors & DFs	<p>Style 500/500* are the only 1-Piece MDF door styles available with CPFR.</p> <p>All CPFR patterns are available on Raw MDF Style 500/500*.</p>
2	CPFR 3700	<p>CPFR 3700 is available on the following:</p> <ul style="list-style-type: none"> • Frame and panel doors using RVSCP-PR324 (CPFR applied to center panel only). • Solid wood slabs (eg: Style 1270, 1270*, 34QSA*, GUPFS, etc.). • Raw MDF slabs (eg: Style 500, 500*, sheet stock, etc.).

Design Options (Chapter G)

1	Face Rout Spacing	Spacing is measured from center to center of the rout.
		Based on the visible panel and the pattern/spacing chosen, there will not necessarily be a rout in the center of the panel.
		Requests for custom face rout spacing should be indicated when placing an order or quote. <i>Additional charges may apply.</i>
2	Grain Direction	The face routs must run the same direction as the grain of your chosen product.

Finish Options (Chapter R)

1	3D Laminate (RTF) Availability	The ★ indicates CPFR patterns that are available on 1-piece MDF Style 500 doors and 500* drawer fronts using 3D Laminate (RTF).
----------	---------------------------------------	---

Material Options

1	Available Materials	Center Panel Face Rout patterns are available on solid wood, raw MDF and veneered MDF Core plywood.
2	MDF Core	Applying a CPFR on veneered MDF core panels will expose the darker colored MDF Core material.
3	Veneer Core	Due to inconsistencies of the inner plys, CPFR is <i>not an option</i> on products made of Veneer Core materials.
4	Material Thickness	The following CPFRs can be applied to material ½" [5.6mm] thick or greater: 300, 400, 500, 800, 1000, 1100, 1200, 1600, 2000, 2100, 3200, 3300.
		The following CPFRs can be applied to material ⅜" [9.0mm] thick or greater: 100, 200, 600, 700, 900, 1500, 1700, 1800, 1900, 2200, 2600, 2700, 2800, 2900, 3000, 3100, 3400, 3500, 3700.
		The following CPFRs can be applied to material ⅝" [15.9mm] thick or greater: 1300, 1400, 2300, 2400, 2500, 3600.

Profile Options (Chapter E)

1	CPFR 1300	Close match to the PR303-25 panel profile and the D129 and D135 outside edge profiles.
2	CPFR 1400	Exact match to the D15 outside edge profile.
3	CPFR 2300	Exact match to the D32 outside edge profile.
4	CPFR 2400	Exact match to the D21 outside edge profile.
5	CPFR 2500, 3500	Close match to the D32 and D51 outside edge profiles.
6	CPFR 3700	Solid wood and raw MDF slabs using CPFR3700 are only available with a D7 outside edge profile.
7	Raised Center Panel Profiles	CPFRs are not available on product with raised center panel profiles.

Continued on next page...

► For PRICING ► See Section G.7 in our current Wholesale Pricing Catalog.

Technical Notes: Center Panel Face Routs...continued

Sizes/Dimensions

1	Maximum Size	48"W x 96"H [1219.2mm x 2438.2mm] for vertical grain/CPFR pattern or 96"W x 48"H [2438.4mm x 1219.2mm] for horizontal grain/CPFR pattern.
2	Minimum Size	Use individual door style minimums for slab doors and drawer fronts with center panel face routing, as well as for doors and drawer fronts with 1/4" flat center panels or the RVSCP-PR324 reversed center panel profile and center panel face routing.
3	CPFR 3700	Whether running the CPFR3700 vertically or horizontally, frame and panel doors with RVSCP-PR324 are available in 1/32" increments (width and height).
		When applying CPFR3700 to solid wood or raw MDF slabs in a vertical direction, the product's width is only available in 1/4" increments.
		When applying CPFR3700 to solid wood or raw MDF slabs in a horizontal direction, the product's height is only available in 1/4" increments.
4	Minimum Spacing	Minimum widths for spacing are noted on each option.

Design Options

Center Panel Face Rout Patterns

Ordering & Pricing Notes: Center Panel Face Rout Patterns

Ordering Guidelines

1	Order Forms	Please use "Advanced Version" of the <i>Door and/or Drawer Front Order Forms (E•Z Forms #2 and #3)</i> .
2	Ordering Guidelines	Specify Wood Species / Grade.
		When ordering doors / drawer fronts, specify the door style along with the center panel profile, stile & rail profile and outside edge profile.
		Specify the Center Panel Face Rout Pattern (CPFRP) option and groove type (CPFR1200 or CPFR2200).
Pricing		
1	Pricing	Please see <i>Section G.8</i> of our current Wholesale Pricing Catalog.

Technical Notes: Center Panel Face Rout Patterns

Design Options (Chapter G)

1	Design Placement	All patterns are centered on the flat of the center panel.
		When placed on a raised panel, none of the patterns will interfere with the panel reveal. • CPFRP114 not available with any center panel profiles from <i>Sections E.12</i> or <i>E.14</i> .
2	CPFR Options	Available with CPFR 1200 on material that is 1/4" [6.4mm] thick or greater (see <i>Section G.7</i> for more information).
		Available with CPFR 2200 on material that is 1/2" [9.0mm] thick or greater (see <i>Section G.7</i> for more information).

Material Options

1	Material Availability	Available on solid wood or raw MDF raised center panels and the <i>RVSCP-PR324 (Reversed Solid Center Panel)</i> . • CPFRP114 not available with any center panel profiles from <i>Sections E.12</i> or <i>E.14</i> .
		Available on solid wood slab style doors & drawer fronts.
		Available on 1/4" [6.4mm] raw MDF or flat panel veneered MDF core doors & drawer fronts.
		Available on Raw MDF & veneered MDF core sheet stock 1/4" [6.4mm] thick or greater.
		When using a veneered MDF core material the CPFR will expose the MDF core which is a darker color, resulting in the CPFR grooves being darker.

Sizes/Dimensions

1	CPFR 1200	CPFR1200 is .281" Wide and .063" Deep [7.1mm x 1.6mm].
2	CPFR 2200	CPFR2200 is .500" Wide and .138" Deep [12.7mm x 3.5mm].
3	Minimum Door Sizes	Minimum sizes are based on 2 1/4" wide stiles and rails and a 1/4" flat center panel or the <i>RVSCP-PR324</i> center panel profile. If placing a pattern on a raised panel, minimum door size must be increased by the center panel profile reveal width x 2.

Center Panel Face Rout Patterns - END

► For PRICING ► See *Section G.8* in our current Wholesale Pricing Catalog.

RCCP100

Radius Corner Center Panel (RCCP) - Outside Corners

- The drawing to the left is an example of 1" [25.4mm] outside radius corners on a Raised Panel (RP) drawer front and the raised center panel of a **Style 10** door.
- When ordering small doors or drawer fronts, the minimum size of the center panel increases if the radius you are using is greater than ½" [12.7mm].
- Use this formula to determine the amount to add to the minimum width or height of the center panel:
 - $(\text{Radius} \times 2) - 1" = \text{Amount to add to minimum size.}$
- Example: ¾" Radius Corners on the center panel of a **Style 10** door: $(\frac{3}{4}" \times 2) - 1" = \frac{1}{2}"$
 - If the door has more than 1 panel, multiply the result of the formula by the number of panels in width and/or height.
 - If the door has panels with shapes, please contact our Customer Support Team.

G

RCCP200

Radius Corner Center Panel (RCCP) - Inside Corners

- The drawing to the left is an example of inside radius corners on a Raised Panel (RP) drawer front and the raised center panel of a **Style 10** door.
- The **RCCP200** option looks best as a complement to doors in the following frame price classes: **101, 103, 301, 303.**
- Approximate minimum size calculation: 2" + Center Panel Minimum Size + Stile/Rail dimensions.
- On our website see **Resources > Technical Information > Compatibility Charts > Center Panel Drawer Front Compatibility.**
 - These minimum size dimensions factor in 1" [25.4mm] of flat on the face of the center panel.
 - If the door has more than one panel, multiply the result of the formula by the number of panels wide and/or high.
 - If the door has panels with shapes, please contact our Customer Support Team.

DSCP100

Diamond Shape Center Panel (DSCP)

- The diamond shape is another option available on an Raised Panel (RP) drawer front and raised center panel.
- The **DSCP100** option looks best as a complement to doors in the following frame price classes: **101, 103, 301, 303.**
- Minimum sizes will vary depending on the raised panel drawer front profile or center panel profile being used.
- These minimums will be affected if your door style has more than one center rail and/or center stile.
- Approval drawings will be required prior to manufacturing.

Drawer Front Face Rout (DFFR)

Drawer Front Face Rout - DFFR200

Drawer Front Face Rout - DFFR300

Ordering & Pricing Notes: Drawer Front face Rout

Ordering Guidelines

1	Order Forms	Please use Drawer Front Order Form (E•Z Form #3) .
2	Ordering Guidelines	When ordering, please indicate distance from outside edge of drawer front. If using an outside edge profile other than D7, widths can be found in the Outside Edge Profile Compatibility chart on our website under: Resources > Technical Information .
Pricing		
1	Pricing	Please see Section G.10 of our current Wholesale Pricing Catalog .

Technical Notes: Drawer Front Face Rout

Cabinet Door & Drawer Front Options (Chapter B)

1	Drawer Fronts Styles	Available as an option for 34SQA* and 100SQE* drawer fronts (Section B.16). • DFFR300 also available on Raw MDF and 3D Laminate Style 500* drawer fronts (Section V.I).
---	----------------------	--

Profile Options (Chapter E)

2	Outside Edge Profiles	Shown with the D33 outside edge profile. Other profiles are available upon request.
---	-----------------------	--

Sizes/Dimensions

1	Maximum Size	Solid wood will have a maximum size of 8" across the grain when applying a drawer front face rout. Raw MDF /3D Laminate will have a maximum size of 24"W x 42"H [609.6mm x 1066.8mm] or 42"W x 24"H [1066.8mm x 609.6mm] when applying a drawer front face rout.
2	Lineal Inches	Lineal inches are measured using the outside dimensions.
3	Rout Size	DFFR200: The square rout is 3/16" wide x 1/8" deep [4.8mm x 3.2mm]. DFFR300: The v-groove rout is 1/4" wide x 3/32" deep [6.4mm x 2.7mm]. See drawer front minimum size guidelines noted in Section B.16 .
4	Rout Location	Placement is customer specified from outside edge of drawer front. • Minimum distance for placement is 1/4" [6.4mm].

Design Options

Decorative Inserts

Ordering & Pricing Notes: Decorative Pegs and Routed Face Options

Ordering Guidelines

1	Order Forms	Please use "Advanced Version" of the <i>Door and/or Drawer Front Order Forms (E•Z Forms #2 and #3)</i> .
Pricing		
1	Pricing	Please see <i>Section G.12</i> of current Wholesale Pricing Catalog.

Technical Notes: Decorative Pegs and Routed Face Options

Cabinet Door & Drawer Front Options (Chapter B)

1	Available Door Styles	Decorative Pegs and Routed Face options are available with doors, drawer fronts and wainscot panels with traditional mortise & tenon construction. <ul style="list-style-type: none"> This includes ASTP and ASMP Adventure Series doors (<i>Section B.7</i>).
		Decorative Pegs and Routed Face options can also be placed on our Slab & Batten doors and drawer fronts (<i>Section B.9</i>). <ul style="list-style-type: none"> Please submit these requests to our Customer Support team so placement options can be discussed.
		Requests for Decorative Pegs or Routed Face options on any other door style should be submitted to our Customer Support team for consideration.

Convex/Concave Options (Chapter D)

1	Curved Products	The <input type="checkbox"/> indicates options that are available for convex/concave products. <ul style="list-style-type: none"> See <i>Chapter D</i> for more information on convex/concave products.
---	-----------------	--

Design Options (Chapter G)

1	Insert Patterns	Insert Patterns are used to identify the placement of Decorative Pegs and Routed Face options.
		PP & PPC are centered or equally spaced on the flat surface remaining between the stile & rail profile and the outside edge treatment. <ul style="list-style-type: none"> You may want to consider custom placement of pegs when applying to lazy susan (inside corner) doors that utilize a butt joint or 45° miter cuts to form the L-Shape (<i>see Section F.6</i>). These methods alter the width of one or both stiles where the two doors meet.
		PPT & PPTC are placed 1/8" [3.2mm] from the joint between the stile and the rail.

General Information (Chapter A)

1	Grain Direction	The grain on Decorative Pegs will run in the same direction as the grain of the part into which it is inserted. <ul style="list-style-type: none"> Pegs will not be visible from the back of the product.
---	-----------------	--

Miscellaneous

1	Installation	Decorative Pegs are only available installed in a product. <ul style="list-style-type: none"> When ordering face frames with Decorative Pegs, the placement of the pegs may vary due to PPGC - Panel Plow Groove Cuts, if applicable, and pocket screw locations. Approval drawings may be required prior to manufacturing your order.
2	Back to Back Doors	When ordering a decorative peg that protrudes from the face of the door and you have two doors that open back to back, you may want to consider the gap between those doors to allow for clearance when opening.

Profile Options (Chapter E)

1	Profile Reveal Widths	For profiles reveal widths, please see the Profile Reveal Widths chart on our website under: Resources > Technical Information > Technical Information .
---	-----------------------	--

Wood Specie Options (Chapter S)

1	Wood Species	Due to their size, pegs are only available by wood species (ie: Alder, Birch, Cherry, etc.) and are not available in specific grades (ie: Natural/Standard, Select/Premium, etc.), or cuts (ie: Quarter Sawn, Rift Cut, etc.).
		Decorative Pegs are available in all wood species except DP300 .
2	DP300	DP300 is only available in Cherry, Maple, Red Oak and Walnut.

Butterfly Insert

G

Ordering & Pricing Notes: Butterfly Insert

Ordering Guidelines

1	Order Forms	Please use “Advanced Version” of the <i>Door and/or Drawer Front Order Forms (E•Z Forms #2 and #3)</i> .
2	Ordering Information	When ordering, specify height placement from the top and/or bottom of the visible center panel to the center of the insert. <ul style="list-style-type: none"> • Insert will be centered on the width of the visible center panel. • Please submit placement drawings to our Customer Support Team.

Pricing

1	Pricing	Please see <i>Section G.12</i> of current Wholesale Pricing Catalog .
---	---------	--

Technical Notes: Butterfly Insert

Cabinet Door & Drawer Front Options (Chapter B)

1	Available Door Styles	Butterfly Inserts can be placed on any door style with a solid wood reversed center panel (RVSCP-PR324).
---	-----------------------	--

Design Options (Chapter G)

1	Center Panel Face Rout	A Center Panel Face Rout (<i>Section G.7</i>) can run through or behind the BI100 Butterfly Insert for additional detailing. <ul style="list-style-type: none"> • Please contact our Customer Support Team for more information.
---	------------------------	---

General Information (Chapter A)

1	Grain Direction	Standard grain direction on a Butterfly Insert is horizontal, with face grain material.
---	-----------------	---

Sizes/Dimensions

1	Size	Our Butterfly Insert is 1 1/2" [38.1mm] wide x 1" [25.4mm] high.
2	Placement	A minimum of 1" [25.4mm] of flat space must be maintained on all sides of insert.

Ordering & Pricing Notes: "Simulated" Distressing

Ordering Guidelines

1	Order Forms	Applicable order forms will include space to indicate your chosen option(s).
Pricing		
1	Pricing	Please see <i>Section G.14</i> of our current Wholesale Pricing Catalog.

Technical Notes: "Simulated" Distressing

Finish Options (Chapter R)

1	Glazing	Selecting a glaze to compliment your finish will enhance the distressed detail. Please see <i>Section R.3</i> for more information.
---	---------	---

Material Options

1	Material Availability	<p>Simulated Distressing is not available on any product less than 1/8" thick.</p> <p>All Simulated Distressing options are available on all solid wood components.</p> <p>Simulated Distressing is available on veneer components.</p> <ul style="list-style-type: none"> • Products that are entirely or partially composed of thin veneers are available with all distressing options on their veneer portions only, except Wear Marks, and Rasp Marks. <p>Raw MDF & Raw MDF-MR products are only available with Wear Marks, as the other options have a tendency to fracture the MDF material.</p>
---	-----------------------	---

Miscellaneous

1	Placement	Simulated Distressing options are randomly placed on the <i>face of the product only</i> .
2	Intensity Options	<p>Light or Heavy intensity is available and refers to the <u>quantity of marks</u> applied to the product.</p> <ul style="list-style-type: none"> • Intensity can be varied between options.
3	Depth of Marks	When applying distressing marks to different wood species, softer woods like Alder or Pine tend to be easier to distress more deeply than Maple or Hickory. WalzCraft is aware of this and tries to adjust the distressing technique to achieve the same look and depth of distressing regardless of species.

Simulated Distressing - END

► For PRICING ► See Section G.14 in our current Wholesale Pricing Catalog.

TexGrain Distressing - Wire Brush "Look"

Signature Series S879 Highland shown.

1	Order Forms	Applicable order forms will include space to indicate your chosen option(s).
Pricing		
1	Pricing	Please see <i>Section G.14</i> of our current Wholesale Pricing Catalog .

Technical Notes: TexGrain Distressing

Cabinet Door & Drawer Front Options (Chapter B)

1	Door and Drawer Front Style Availability	Available with square door and drawer front styles that have straight stiles and rails and door styles consisting of solid slabs. Example: Style 10, 10M, 10FM, 1270, 500, 34SQA , etc. Doors styles can include straight center stiles and/or rails. Example: Style 1010, 1010M, 8000, 8000M . Not available with door styles containing any veneer components, shaped rails, mullions or louvers.
2	Application Location	See <i>Miscellaneous</i> notes for distressing locations.

Continued on next page...

► **For PRICING** ► See *Section G.14* in our current Wholesale Pricing Catalog.

Technical Notes: TexGrain Distressing...continued

Accent Component Options (Chapter O)

1	Product Compatibility	Available with stock size square legs/posts (<i>website</i>), custom size square legs/posts (O.3) and column wraps - square (O.5). • TexGrain will be applied to all four sides. It will not be applied to the ends.
----------	------------------------------	---

Cabinet Accessory Options (Chapter M)

1	TexGrain Distressing and Cabinet Accessory Option Availability	Only available on Style 170 Upper Cabinet valance with a D66 outside edge profile.
		Only available on Style WVR210 Mortise & Tenon Valance. See Profile notes for profile availability.
		Only available on Style A Knick Knack Shelves with a D66 outside edge profile.
		Only available with Model C and Model F Appliance Panels. See Profile notes for profile availability.
		Available on Glued-Up Panels (GUP) & Center Panels Only (CPO). See Profile notes for profile availability.

Convex/Concave Options (Chapter D)

1	Curved Products	TexGrain Distressing is not compatible with convex/concave products.
----------	------------------------	--

Design Options (Chapter G)

1	Glass & Wire Mesh	Designer Glass (G.1), Leaded Glass (G.2), and Wire Mesh (G.4) can be used in conjunction with TexGrain Distressing.
2	Center Panel Face Rout	CPFR 400, 500, 1100, 1600, 3200 and 3300 are compatible with TexGrain Distressing. No distressing will be applied inside the rout/groove. See Section G.7 .
3	Simulated Distressing	Not compatible with Simulated Distressing.
4	Profiled Stock	Available with Profiled Stock (G.16). See Profile notes for profile availability.
5	Continuous Grain - End Matched Pattern	TexGrain Distressing is compatible with our Continuous Grain option. Continuous Grain - End Matched Pattern refers exclusively to the matching of grain in the direction of the grain.

Drawer Box Options (Chapter H)

1	Drawer Boxes	Drawer boxes are not available with TexGrain Distressing.
----------	---------------------	---

Face Frame Options (Chapter J)

1	Face Frame Stock	Only available with the straight/square FS100 face frame stock (J.1).
		Beveled and beaded face frame stock FS101, FS102, FS103, FS104, FS105, FS106, FS107 and FS108 from Section J.1 and Beaded Applied Molding from Section J.5 are not compatible with TexGrain Distressing.
2	Assembled & RTA Face Frames	Assembled and RTA face frames (J.2) are available with TexGrain Distressing only when using square face frame stock FS100 (J.1) . All face frame configurations are available (J.3).
3	Square/Tapered Feet	Only available with square foot option SFO100 (J.3) .
4	Miscellaneous Joinery	Available with all Miscellaneous Joinery options shown in Section J.4 .
5	Inset/Pre-Fit Doors	Inset/Pre-Fit doors and drawer fronts (J.6) are available with TexGrain Distressing.
6	Cabinet Fillers	Only available with cabinet filler FLR100 (J.8) .
7	Application Location	Face frame stock and assembled & ready to assemble face frames will have TexGrain distressing applied to the face only. No edges or backs will be distressed.

Finish Options (Chapter R)

1	Finish Types	Available with a Natural/Clear Coat (<i>no stain</i>), Spray No Wipe Stains and SolidTone WoodGrain finishes. • Applying a finish to TexGrain Distressing will alter the finish color slightly. • We recommend ordering a sample prior to placing your final order. • See Chapter R for more information on finish types.
2	Seal Sanding	The seal sanding process could potentially expose raw wood at random places across the wood's surface due to the TexGrain Distressing process raising the grain fibers.

Functional Options (Chapter F)

1	Functional Options	TexGrain Distressing is available when using these Functional Options: • Hinge Boring (F.1) • Miscellaneous Joinery (F.2) • Joint Assembly Methods (F.3) • Half Lap Edges (F.4) • Lazy Susan Door Joints (F.6)
2	Hand & Finger Pull Routs	TexGrain Distressing is only available with Finger Pull Routs FP100 and FP200 (F.7) .

1	Stile & Rail Profiles	Only available with the following Traditional stile & rail profiles: SR100, SR104, and SR123 (E.1) .
		Only available with the following Old World stile & rail profiles: SR195 (E.3) .
		Only available with the following Miter stile & rail profiles: MP600, MP602, MP608, MP612, MP616, MP617, MP624, MP628, MP638, MP640, MP646, MP675, MP676 (E.9) .
2	Center Panel Profiles	Standard Center Panel profiles PR308-03 and PR308-05 can be used (E.12) .
		Available with the RVSCP-PR324 (Reversed Solid Center Panel) profile (E.13) .
		Old World Center Panel profiles OWPR508-03 and OWPR508-05 can be used (E.14) .
3	Outside Edge Profiles	Available with the D66 outside edge profile only (E.15) .
4	Additional Profiles	Please contact our Customer Support Team to inquire about all other profiles not listed above.

Sizes/Dimensions

1	Minimum Sizes	The same minimum sizes noted for the individual compatible products can be used.
2	Maximum Size	The maximum width for any individual part with vertical grain is 35" [889.0mm]. The maximum height for any individual part with horizontal grain is 35" [889.0mm]. This includes center panels, slab doors and drawer fronts, Glued-Up Panels, etc.

Wainscot Options (Chapter Q)

1	Wainscot Panel Style Availability	Available with wainscot panel styles that have straight stiles and rails only. Example: Style 10W .
		Styles can include straight center stiles and/or rails. Example: Style 8000W .
		Not available with styles containing any veneer components or shaped rails.
2	Tongue & Groove Wainscot	Available with Tongue & Groove wainscot molding #1665 only (Q.4) .

Wood Species Options (Chapter S)

1	Wood Species	Available in all grades and cuts of the following species: Alder, Cherry, Hickory, Mahogany, Pine, Poplar, Oak-Red, Oak-White and Walnut. Please submit all other requests to our Customer Support Team.

Laser Engraving

G

Ordering & Pricing Notes: Laser Engraving

Ordering Guidelines

1	Order Forms	Please contact our Customer Support Team with your laser engraving requests.
2	Ordering Information	Images need to be submitted in one of the following formats: EPS (vector art preferred), high resolution JPEG or TIF files. (JPEG and TIF files must be at least 600 DPI.)
		Due to variations in image designs, we will provide you with a CAD drawing and a price quote.
		An approval signature to proceed will be required before an order can be placed.

Pricing

1	Pricing	Please see <i>Section G.15</i> of our current Wholesale Pricing Catalog.
---	---------	--

Technical Notes: Laser Engraving

General Information (Chapter A)

1	Sanding	The face of the product will be sanded to 220 grit prior to engraving. <i>Additional sanding after engraving is not recommended.</i>
---	---------	--

Sizes/Dimensions

1	Maximum Size	Maximum part size for any image is 24" wide x 36" high.
---	--------------	---

Wood Specie Options (Chapter S)

1	Recommended Species	All solid wood species are available with laser engraving, but the following are most suitable: <ul style="list-style-type: none"> • Alder, Cherry, Maple, Red Birch and Walnut. • Baltic Birch plywood is also an available option.
---	---------------------	---

Design Options (Chapter G)

1	Part # SRP100 • Stile & Rail Profiles	Available with Traditional, Old World-Traditional, Mitered and Old World-Mitered stile & rail profiles shown in <i>Sections E.1, E.3, E.9, E.10, E.11</i> . Profiles are available as follows: <ul style="list-style-type: none"> • <i>With</i> a center panel plow groove cut (PPGC). Order using part #SRP100. • <i>Without</i> a center panel plow groove cut (PPGC). Order using part #SRP100-NPC. • <i>With</i> a GRF cut (cut for glass). Order using part #SRP100-GRF. <ul style="list-style-type: none"> ◦ Designed for use with 1/8" glass and rubber retainer. See <i>Section B.12</i> for more information.
		Series MP600/MP6000 mitered stile & rail stock is available in widths up to 6" [152.4mm].
		Series MP700 & MP900 mitered stile & rail stock is only available in the widths shown in <i>Sections E.10 & E.11</i> .
		Applied to one straight line edge only.
2	Part # CPP100 • Center Panel Profiles	Available with center panel profiles shown in <i>Section E.12</i> . Profiles are available as follows: <ul style="list-style-type: none"> • <i>With</i> the relief cut. Order using part #CPP100. • <i>Without</i> the relief cut. Order using part #CPP100-NRC (no relief cut).
		Applied to one straight line edge only.
3	Part # OEP100 • Outside Edge Profiles • Molder Edges (ME)	Available with outside edge profiles shown in <i>Section E.15</i> (not available with applied molding edges.).
		Applied to one straight line edge only.
		For solid wood stock with square edges, please order FS100 found in <i>Section J.1</i> .
4	Part # AP100	Available with accent profiles AP01, AP02 or AP03 as shown on the preceding page.
		Applied to one straight line edge only.
		Available on solid wood and MDF only.
5	Part # PS100	Use PS100 when applying a miscellaneous joinery option from <i>Section F.2</i> or when needing more than one profile on the same piece.
		Available with the following: <ul style="list-style-type: none"> • Stile & rail profiles as defined above (<i>Sections E.1, E.3, E.9, E.10, E.11</i>). <ul style="list-style-type: none"> ◦ MP642, MP644 and MP645 can only be applied to one long edge. • Center panel profiles (<i>Section E.12</i>). • Outside edge profiles (<i>Section E.15</i>). • Accent profiles (<i>Section G.16</i>) • Miscellaneous joinery options (<i>Section F.2</i>)
		Profiles can only be applied to the two long edges.
		See our website: Resources/Technical Information for compatibility charts defining profile widths and compatibility between outside edge profiles (including MEs) and stile & rail profiles (traditional and mitered).

Profile Options (Chapter E)

1	Profile Placement	Please see OEP100 for placement of profiles and/or joinery options for profiled stock, and reference F=Face/Front, B=Back, L=Left or R=Right when ordering. <i>The "Ends" cannot be profiled.</i>

Technical Notes: Profiled Stock...continued

Sizes/Dimensions

1	Thickness	<p>OEP100: Available in ½" [12.7mm], ¾" [19.1mm] and 1" [25.4mm] thicknesses. • ½" [12.7mm] thickness only available with D7, D32, D33.</p>
		<p>CPP100, SRP100, PS100: Available in ¾" [19.1mm] and 1" [25.4mm] thicknesses.</p>
		<p>AP100: Available in ⅝" [15.9mm], ¾" [19.1mm] and 1" [25.4mm] thicknesses.</p>
		<p>For thicknesses other than those listed, please contact our Customer Support Team.</p>
2	Width	<p>Profiled stock is available in a minimum width of a 1½" [38.1mm] and a maximum width of 9" [228.6mm].</p>
		<p>The minimum <i>distance for the flat surface</i> in addition to profile width for any profiled stock is ⅜" [9.5mm]. For your reference, you can access the Profile-Reveal Widths chart on our website: Resources/Technical Information.</p>
		<p>9" [228.6mm] Maximum Width: WalzCraft makes every attempt to produce these parts from one solid piece of wood. Due to lumber availability and/or wood species, widths under 9" [228.6mm] may need to be made from two or more edge glued pieces. For widths over 9" [228.6mm], please refer to our GUPFS product found in Section M.16.</p>
3	Length	<p>Available in 8' [2438.4mm] Lengths, Cut-to-Length and Random Lengths.</p>
		<p>The minimum length for Cut-to-Length pieces is 3" [76.2mm].</p>
		<p>Random Length sizes vary between 36" - 96" [914.4mm - 2438.4mm]. When measured, we round down to the next nearest ½ foot. Minimum quantity of 200 lineal feet.</p>
		<p>Solid wood profiled stock has a standard length of up to 96" [2438.4mm]. Lengths greater than 8' [2438.4mm] are subject to availability. <i>Please note that the choice of wood species and grade can impact the availability of lengths greater than 8' [2438.4mm].</i></p>

Profiled Stock - END

G

What is Grain and Color Coordination?

“Grain and Color Coordination” allows you to choose the level of matching done between wood veneer components adjacent to one another.

The options for Grain and Color Coordination are as follows:

1. None
2. Continuous Grain Match

Note: The default option for grain and color coordination will be **Option #1: None**, but upon request, WalzCraft will manufacture wood veneer components where special attention is paid to the grain and color of adjacent products.

Grain and Color Coordination Terminology

Sheet: Refers to a piece of veneer, or to a piece of veneer that has been pressed onto a core material. Products such as doors, drawer fronts, fillers, and end panels are cut from sheets. WalzCraft stocks 4'x8' sheets for basic veneer products, but also works with vendors to obtain sheets of various sizes when projects require them.

Adjacent: A veneer product is adjacent to another veneer product when the installed position in a completed project places one edge of a product within a short distance, usually a few millimeters, from one edge of another product. Adjacent products can be above, below, left or right relative to another product.

Continuous Grain Match (CGM): Refers exclusively to the matching of grain in the direction of the grain. The most common application for CGM is a door with a drawer front above it, with the grain direction being vertical on both products. CGM is also very commonly used for banks of drawer fronts when the grain is vertical.

Standard or Reconstituted Veneer Products

WalzCraft's Grain and Color Coordination options are most effective on veneer products that are Rift Sliced (Oaks), Straight Grain and Quarter Sliced. The relative straight grained appearance of all these cuts make Grain and Color Coordination options very desirable. Even Plain Sliced veneer can benefit greatly from using Grain and Color Coordination options, especially when the specie exhibits a strong grain pattern with definite cathedrals. Rotary Cut veneers benefit the least because the Rotary grain pattern sometimes lacks definition.

- **EBT201 is the only Edgeband Treatment Option** available for Grain and Color Coordination when using standard wood veneer. See *Section B.10*.
- **EBT201-R is the only Edgeband Treatment Option** available for Grain and Color Coordination when using Reconstituted wood veneer. See *Section B.11*.
- Additional custom engineering charges will be applied. To inquire, please contact our Customer Support Team.
- Drawings and order details may be emailed to: customersupport@WalzCraft.com
- Grain and Color Coordination products can only be shipped with the following packaging methods: **PM6, PM7, PM8, PM9, PM11, PM12**. Please see *Section A.3* for more information on packaging methods.

Continued on next page...

► For PRICING ► See Section [G.17](#) in our current Wholesale Pricing Catalog.

Option #1: None

Wood veneer products will be produced with no attention paid to grain and color coordination.

- This is the most basic and therefore the least expensive grain and color coordination option.
- Grain direction can be standard (see *Section A.4*), all vertical or all horizontal.
- Products from the same order may be cut from multiple sheets of material. Without an effort to coordinate the color and grain, adjacent products will not have a consistent appearance.
- Grain does not flow smoothly between adjacent products and color differences can be very noticeable.

Example of Option #1: None

In this example, the grain and color coordination option that was chosen is **#1 - None**. The grain direction for the project is vertical. Since there is no attention paid to grain and color coordination, the eight Style 60 doors and drawer fronts ended up being cut from three different sheets of material, and this will often result in apparent grain and color differences. This becomes very apparent when the choice is vertical grain.

Style 60 Doors and Drawer Fronts Configuration

Continued on next page...

► For PRICING ► See Section [G.17](#) in our current Wholesale Pricing Catalog.

Option #2: Continuous Grain Match (Vertical Grain)

A defined group of wood veneer products will be cut from the same sheet of material, and the WalzCraft CAD and Production teams will work together to ensure that there is a Continuous Grain Match (CGM) between adjacent panels in the length of the grain.

• **Option #2 requires that WalzCraft must view a sketch or drawing of the project layout to accurately determine material requirements, so we can maintain grain match between adjacent products.**

- When submitting sketches or drawings to WalzCraft, please submit a plan view, elevation view of each wall, and elevation view of islands and/or peninsulas.
- This option ensures that adjacent products in the length of the grain will have a Continuous Grain Match (CGM).
- Grain direction must be all vertical.
- Materials are not restricted to 4'x8' sheet sizes.
- Procurement of special materials may add extra "Wait Time" days.
- Sheet sizes are dependent upon material availability which varies by species and grade.
- More costly than Option #1.

Example of Option #2: Continuous Grain Match (Vertical Grain)

In this example, the grain and color coordination option that was chosen is **#2 - Continuous Grain Match (Vertical Grain)**. The grain direction for the project is vertical. Since all eight Style 60 doors and drawer fronts ended up being cut from the same sheet of material, most grain color issues are minor. Also, since CGM has been carefully watched, the correct vertical grain match has been attained.

Style 60 Doors and Drawer Fronts Configuration (Vertical Grain)

Continued on next page...

► For PRICING ► See Section [G.17](#) in our current Wholesale Pricing Catalog.

Option #2: Continuous Grain Match (Horizontal Grain)

A defined group of wood veneer products will be cut from the same sheet of material, and the WalzCraft CAD and Production teams will work together to ensure that there is a Continuous Grain Match (CGM) between adjacent panels in the length of the grain.

- **Option #2 requires that WalzCraft must view a sketch or drawing of the project layout to accurately determine material requirements, so we can maintain grain match between adjacent products.**
 - When submitting sketches or drawings to WalzCraft, please submit a plan view, elevation view of each wall, and elevation view of islands and/or peninsulas.
- This option ensures that adjacent products in the length of the grain will have a Continuous Grain Match (CGM).
- Grain direction must be all horizontal.
- Materials are not restricted to 4'x8' sheet sizes.
- Procurement of special materials may add extra "Wait Time" days.
- Sheet sizes are dependent upon material availability which varies by species and grade.
- More costly than Option #1.

Example of Option #2: Continuous Grain Match (Horizontal Grain)

In this example, the grain and color coordination option that was chosen is **#2 - Continuous Grain Match (Horizontal Grain)**. The grain direction for the project is horizontal. Since all eight Style 60 doors and drawer fronts ended up being cut from the same sheet of material, most grain color issues are minor. Also, since CGM has been carefully watched, the correct horizontal grain match has been attained.

Die-Stamped for Proper Orientation

Once the Grain and Color Coordination layout has been established for the doors and drawer fronts, it becomes very important to keep track of which surface is the face and which surface is the back. Proper orientation is required as the product moves through the plant and also when the customer receives the items for installation.

- In an effort to help clarify face and grain orientation, WalzCraft has added a die-stamped reference number to these products which will match the reference number from the quote/order acknowledgements and CAD drawings that WalzCraft provides.
- WalzCraft stamps this reference number into the bottom of these products to help eliminate guesswork during production and installation.
- When oriented properly, this 1/8" high reference number will be on the bottom edge of the product (towards the right end) and when read correctly the product will be face up.
- Die-Stamped reference numbers will only be used with Grain and Color Coordination Option #2.
- *If you have any questions or concerns with Grain and Color Coordination products, please contact our Customer Support Team.*

G

Die-Stamped Reference Number

Example of Reference Numbers from WalzCraft Paperwork				
Continuous grain * See CAD drawing *				
Ref#	Qty	Style	Width	Height
1.1	1	60 *	38.78125	7.875
1.2	1	60 *	38.78125	11.0625
1.3	1	60 *	38.78125	11.0625

Square Foot Option - SFO100

Shown with foot length of 3 1/2" [88.9mm].

Ordering & Pricing Notes: Square / Tapered Foot Options

Ordering Guidelines

1	Order Forms	Please use Door Order Form (E•Z Form #2) .
		Denote SFO or TFO option in Special Instructions column on order form.
		Fax your drawings along with your order forms to our Customer Support Team or email drawings to: customersupport@WalzCraft.com .
2	Ordering Information	Specify Length of Foot: Typical lengths for this application are 3 1/2" [88.9mm] or 4" [101.6mm].
		Taper Start Point (TFO100): Please denote dimension from bottom of door panel, as shown in the illustration on previous page. • <i>Note:</i> Taper start point for TFO200 is fixed at 0".
		Taper Width (TFO100, TFO200): Remaining flat dimension will vary with stile width.
Pricing		
1	Pricing	Please see Section G.18 of our current Wholesale Pricing Catalog .

Technical Notes: Square / Tapered Foot Options

Cabinet Door & Drawer Front Options (Chapter B)

1	Available Door Styles	The Square and Tapered Foot options are available with all traditional mortise & tenon constructed raised and flat panel doors from Sections B.1 and B.3 .
2	Location	These options are available on the left and right stiles only.

Profile Options (Chapter E)

1	Stile & Rail Profiles	Only available with the SR100 stile & rail profile.
2	Outside Edge Profiles	Only available with the D7 outside edge profile.

Sizes/Dimensions

1	Door Panel Height	When applying the Square or Tapered Foot options to a door panel, the door height must include the length of the foot, as shown in the Style 10 illustrated on previous page.
2	Maximum Foot Length	The maximum foot length is 10" [254.0mm].
3	Width of Foot	The width of the foot at the Taper Start Point will be equal to the overall stile width.
4	Standard S/R Width	Standard S/R width for traditional mortise & tenon constructed doors is 2 1/4" [57.2mm].

Square/Tapered Foot - END

► For PRICING ► See Section G.18 in our current Wholesale Pricing Catalog.

Faux Cut (Saw Kerf)

A **Faux Cut** is a dado groove that simulates a gap between two doors or drawer fronts. Applied horizontally or vertically, this groove allows you to install one large door or drawer front while giving the appearance of two smaller doors or drawer fronts.

Faux Cut FX01 Shown

Faux Cut - FX01
 $\frac{1}{8}$ " x $\frac{1}{8}$ " dado with square edges.
 Used with D7 outside edge profile.

Faux Cut - FX02
 $\frac{1}{8}$ " x $\frac{1}{8}$ " dado with $\frac{1}{16}$ " radius edges.
 Used with D33/D66 outside edge profile.

Without Faux Cut

With Faux Cut

Example: Style 8000 door shown without and with Faux Cut.
 Horizontal dado simulates the look of two Style 10* drawer fronts.

Without Faux Cut

With Faux Cut

Example: Style 1010 door shown without and with Faux Cut.
 Vertical dado simulates the look of two Style 10 doors.
