Crown Molding - Abbreviations and Symbols

The following symbols and abbreviations may appear on profile drawings in this section and indicate the following:

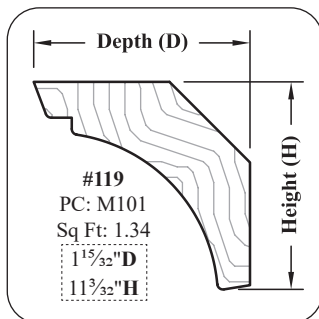

- (X) Molding can accept an additional accent or dentil molding (See *Section N.9* for options).
- (D) Depth of molding when installed.
- (H) Height of molding when installed.
- FRC Fastener Relief Cut.
-  Spring Angle
-  Molding is available convex/concave.
- ★ Molding is available with 3D laminate (RTF)

Note: All moldings are drawn at full scale unless noted otherwise.

Crown Molding Back-Up Blocks

These crown molding back-up blocks allow you to perfectly position your crown molding and speed up the installation process. Back-up block moldings #2318, #2585, #2586 and #2629 work with any crown molding that has either a 22.5°, 38° or 45° spring angle and our Fastener Relief Cut (FRC). Crown molding and back-up block sold separately.

Molding Options

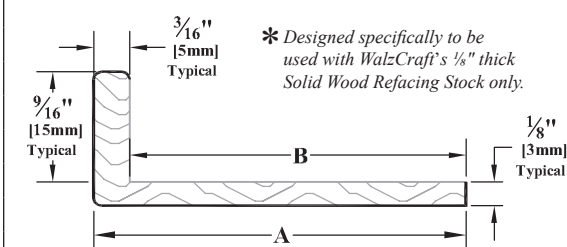

Refacing Molding

Solid Wood Refacing Stock (RFS100)

Ordering & Pricing Notes: Solid Wood Refacing Stock (RFS100)

Ordering Guidelines

1	Order Forms	Please use <i>Face Frame Stock Order Form (E•Z Form #9)</i> .
---	-------------	---

Pricing

1	Pricing	Please see <i>Section N.2</i> of our current Wholesale Pricing Catalog.
---	---------	---

Technical Notes: Solid Wood Refacing Stock (RFS100)

Finish Options (Chapter R)

1	Finishing	Solid Wood Refacing Stock will be considered a Two-Sided (2S) finished product. The backs will be sealed while the face and all edges will be sealed and top coated. Please see <i>Finish Section R.3</i> for information on Glazing.
---	-----------	---

Molding Options (Chapter N)

1	RFS100	Refacing Stock uses part #RFS100.
---	--------	-----------------------------------

Sizes / Dimensions

1	Thickness - RFS100	Available in 1/8" [3.2mm], 3/16" [4.8mm], 1/4" [6.4mm], 5/16" [7.9mm] and 3/8" [9.5mm] thicknesses.
2	Width - RFS100	Solid Wood Refacing Stock is available in a minimum width of 3/8" [15.9mm] and a maximum width of 6" [152.4mm]. 6" [152.4mm] Maximum Width: WalzCraft makes every attempt to produce these parts from one solid piece of wood. Due to lumber availability and/or wood species, widths under 6" [152.4mm] may need to be made from two or more edge glued pieces. For widths over 6" [152.4mm], please refer to our GUPFS product found in <i>Section M.16</i> .
3	Length - RFS100	Available in 8' [2438.4mm] Lengths, Cut-to-Length and Random Lengths. The minimum length for Cut-to-Length pieces is 3" [76.2mm]. Random length sizes vary between 36" [914.4mm] and 96" [2438.4mm] long. When measured, we round down to the next nearest 1/2 foot. Minimum quantity of 200 lineal feet. Solid wood refacing stock has a standard length of up to 96" [2438.4mm]. Lengths greater than 8' [2438.4mm] are subject to availability. <i>Please note that the choice of wood species and grade can impact the availability of lengths greater than 8' [2438.4mm].</i> See <i>Section N.12</i> for more information on molding lengths.
4	3D Laminate (RTF)	3D Laminate (RTF) Refacing Stock is made of a solid wood core (Maple - Paint Grade) and is not subject to the same thickness limitations as MDF. Only available in 8' [2438.4mm] lengths.

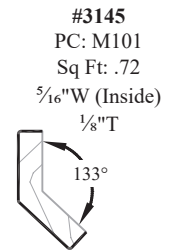

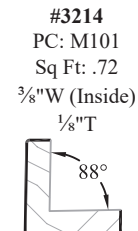

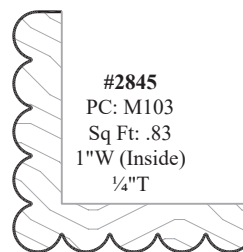

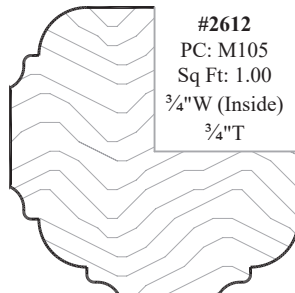

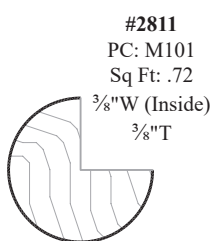

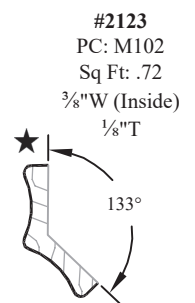

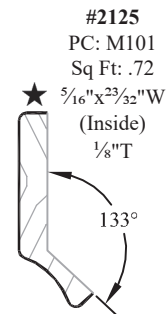

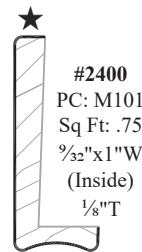

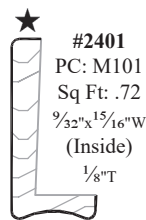

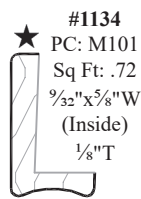

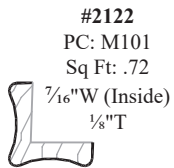

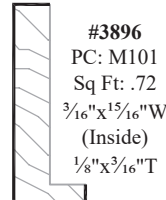

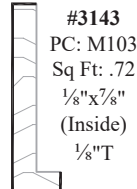

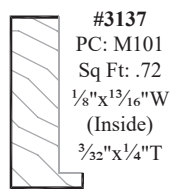

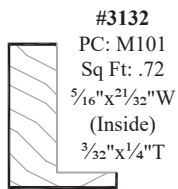

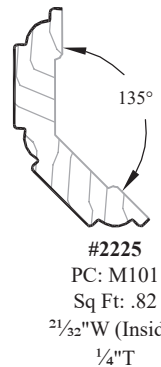

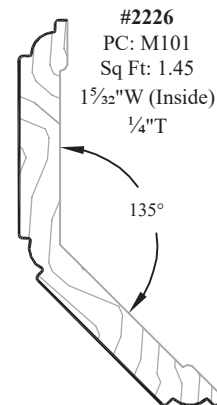

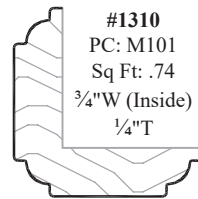

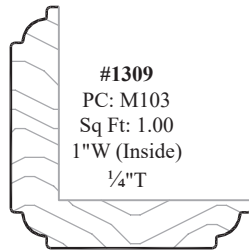

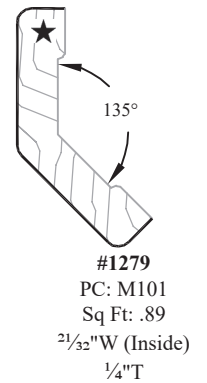

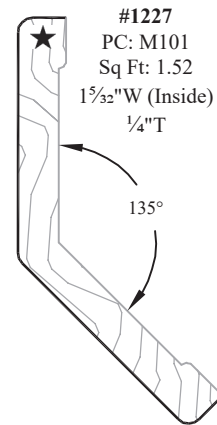

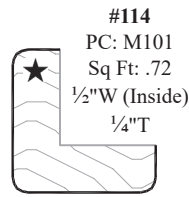

Wood Specie Options (Chapter S)

1	Knotty & Rustic Grades	Knotty and Rustic grade materials will only have small knots, if any.
---	------------------------	---

Cabinet Door & Drawer Front Options (Chapter B)

1	Cut to Size	See <i>Section B.12</i> for Cut to Size options and price classes.
---	-------------	--

Molding Options (Chapter N)...continued

1	#889, #1036, #1120, #3094 Wood Retainer Molding	Designed for use as a wood retainer molding that is fastened to the rear of the frame and can be trimmed to size. See Wood Retainer Molding Compatibility chart on our website: Resources > Technical Information > Compatibility Charts for which molding to be used based on glass thickness (1/8" or 1/4"), door thickness, and panel plow groove cut placement (PPGC). • Note: #889 not available as a precision cut molding.
2	#1246 GRF Wood Filler Molding	The illustration shows an example of how this molding fits into the GRF groove of the stile and rail profile. Designed to fill the void for the GRF groove in the stiles and rails of frame and mullion doors. For use with 3/4" [19.1mm] or 1" [25.4mm] thick doors.
3	#1312 Wood Tenon Filler Molding	The illustration shows an example of how this molding fits into the mortise of the stile and rail profile. Designed to fill the mortise PPGC (Panel Plow Groove Cut) of any stile and rail profile, for your custom frame requirements. For use with 3/4" [19.1mm] or 1" [25.4mm] thick doors.
4	#1317, #1329, #2369, #2871 Wood Retainer Molding	Fit into the GRF cut of the stile and rail profile and are designed to be used with 1/8" [3.2mm] materials.
5	#2090 Wood Retainer Molding	Designed for use as a wood retainer molding to accommodate 1/4" [6.4mm] material for use with 1" [25.4mm] thick frames.
6	#2933, #3041, #3042 Wood Retainer Molding for True Lite Retainer Groove	Designed to be used as a wood retainer molding for true divided mullion lites. Only available with the following mullion lite patterns: LP001, LP108, LP109, LP110, LP118, LP128, LP131, LP146, LP147 . Please submit requests for this application to our Customer Support Team.
7	#2671 Wood Retainer Molding	Fit into the GRF cut of the stile and rail profile and are designed to be used with 1/8" [3.2mm] materials. Designed for use with: • Traditional stile & rail GRF profiles: SR123, SR145, SR146, SR157, SR160, SR163, SR167, SR169 . • Mitered stile & rail GRF profile families: MP628, MP661, MP662, MP680, MP690, MP696, MP6104 . • All traditional and mitered Old World stile & rail GRF profiles from <i>Section E.3</i> and <i>E.11</i> .

Ordering & Pricing Notes: #869/#1049 Bar Rail Molding

Ordering Guidelines

1	Order Forms	Please use <i>Moldings & Miscellaneous Order Form (E•Z Form #5)</i> .
2	Ordering Information	Enter quantity, molding/part number and description.
Pricing		
1	Pricing	Please see <i>Section N.9</i> of our current Wholesale Pricing Catalog .

Technical Notes: #869/#1049 Bar Rail Molding

Finish Options (Chapter R)

1	Finishing	Only available unfinished.
2	MDF/3D Laminate	Not available with 3D Laminate (RTF).

Functional Options (Chapter F)

1	Draw Bolt Rout (Includes Draw Bolt)	WCI #186544: Used to connect two pieces of #1049 molding. Draw Bolt Routs are an option that can be added to the end of a straight 8' length of #1049 and to the Radius Transition Moldings. Bolts are included.
		Not available with #869 bar rail molding.
		To order bolt individually, without the rout, please use WCI #186536 .

General Information (Chapter A)

1	Assembly	Only available unassembled.
---	----------	-----------------------------

Material Options

1	Available Material	Only available in solid wood. Not available in raw MDF.
---	--------------------	---

Molding Options (Chapter N)

1	End Cap	End caps are an option that can be used to cap the finished end of a run of #869 or #1049 molding.
		BR010 can be used as a left or right end for #869.
		BR005 can be used as a left or right end for #1049.
		Only available shipped loose.

Sizes/Dimensions

1	Sizes	All part sizes are fixed.
---	-------	---------------------------

Wood Specie Options (Chapter S)

1	Available Wood Species	All of WalzCraft's standard solid wood species are available.
---	------------------------	---

Ordering & Pricing Notes: Arched Canopy Styles / Molding

Ordering Guidelines

1	Order Forms	Please use Molding & Miscellaneous Order Form (E•Z Form #5) .
2	Ordering Information	1) Select the Arched Canopy Style #. See examples at the front of this section. 2) Select the Arched Canopy Molding #. 3) Reference the line drawing in the Sizes / Dimensions table below. • Fax your line drawing with all relative dimensions, along with your order forms, to our Customer Support Team or email drawings to: customersupport@WalzCraft.com.
Pricing		
1	Pricing	Please see Section N.10 of our current Wholesale Pricing Catalog . A quote will be submitted to you for your approval prior to proceeding with your order.

Technical Notes: Arched Canopy Styles / Molding

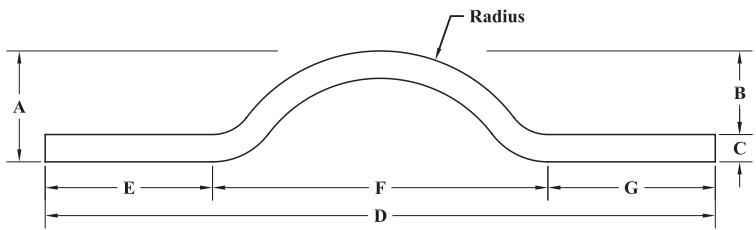

Material Options

1	Maple - Hard vs. Soft	For quality reasons, product requiring CNC machining will not be available in any Maple-Hard/Soft-Mixed species or Maple-Soft species. These items should instead be ordered in any of our Maple-Hard species.
---	-----------------------	--

Molding Options (Chapter N)

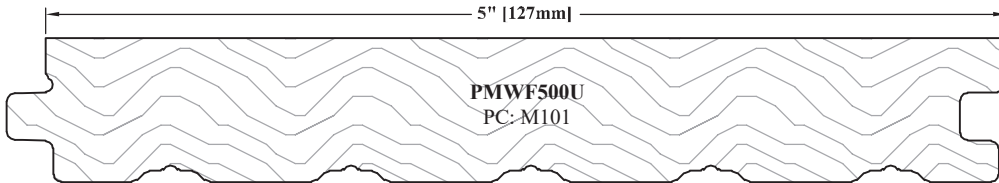

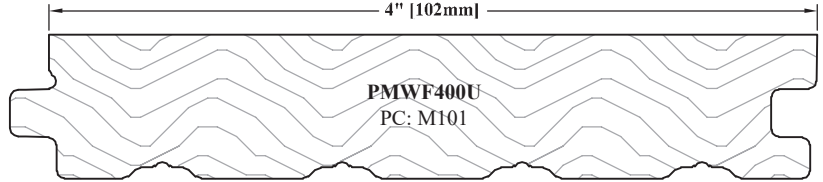

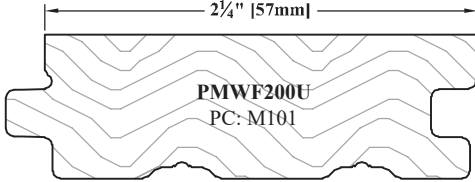

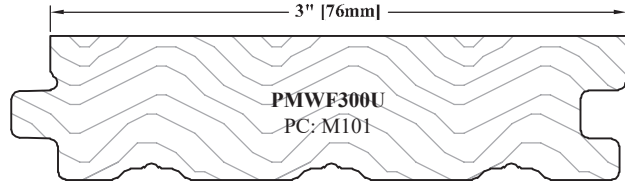

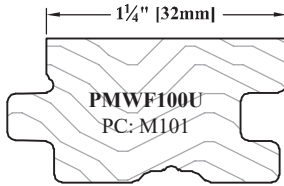

1	Arched Canopy Styles: Molding Profile Options	Arched Canopy Styles are only available with the following Arched Canopy Molding Profiles: 2175, 2179, 2182, 2184, 2262, 2292, 2864, 3175, 3188, 3190 . These arched canopy moldings and their matching crown moldings are also available in straight 8' [2438.4mm] lengths to use throughout your project. Both 8' [2438.4mm] straight stock molding profiles are shown.
---	---	---

Sizes/Dimensions

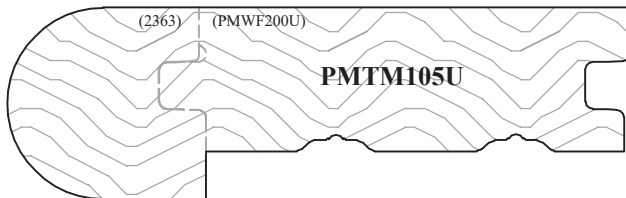

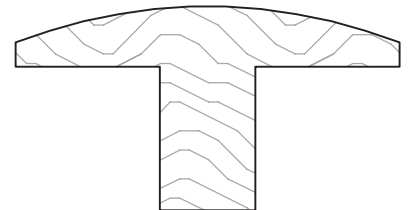

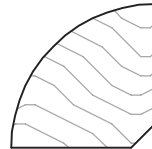

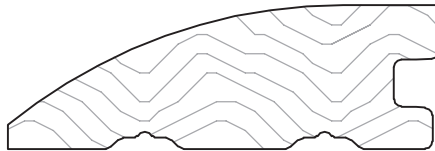

1	Customer Specified Relative Dimensions	When ordering, please specify the following dimensions: • A = Overall Height (B + C) • B = Canopy Rise • C = Molding Height • D = Overall Width (E + F + G) • E = Width of Flat to the Left • F = Width of Center Opening • G = Width of Flat to the Right • Radius of Arch  ** You will be provided with a CAD drawing for final approval prior to proceeding with your order.
2	Drawing Scale	Arched Canopy moldings and matching crown moldings in Section N.10 are drawn at full scale.

Ordering & Pricing Notes: Wood Flooring

Ordering Guidelines

1	Order Forms	Please use <i>Molding & Miscellaneous Order Form (E•Z Form #5)</i> .
2	Ordering Information	Total square footage must be supplied. (Note, your total square footage should accommodate a waste factor.)

Pricing

1	Pricing	Please see <i>Section N.11</i> of our current Wholesale Pricing Catalog .
---	---------	--

Technical Notes: Wood Flooring

Finish Options (Chapter R)

1	Finishing	Available unfinished only. WalzCraft's "cabinet grade finish" is not engineered for wood flooring.
---	-----------	--

General Information (Chapter A)

1	Sanding	Sanded to 180 grit. WalzCraft's precision molded wood flooring requires minimal sanding after installation. Moldings will also be end milled.
---	---------	---

Sizes / Dimensions

1	Drawings	Moldings are drawn at full scale.
2	Precision Molded Flooring	Precision molded wood flooring is sold in random lengths from 36" [914.4mm] to 96" [2438.4mm].
3	Transition Molding	Sold in 8' [2438.4mm] lengths, with 93" [2362.2mm] guaranteed to be usable. Moldings over 6" [152.4mm] in width may be produced from a glued up panel, due to lumber availability.

1	Pricing	Please see Section N.12 of our current Wholesale Pricing Catalog .
---	---------	--

Technical Notes: Molding

Convex/Concave Options (Chapter D)

1	Curved Products	The C indicates profiles that are available when ordering convex/concave products.
---	-----------------	---

Finish Options (Chapter R)

1	Finishing	Moldings will be considered a Two-Sided (2S) finished product (Chapter R). This includes solid wood refacing stock (Section N.2). The backs will be sealed while the face and all edges will be sealed and top coated. Please see individual drawings for location of clear sealer vs. clear sealer/clear top coat. - The thick black lines represent the face/edges (sealer/top coat) while the thinner gray lines represent the back (sealer only). - These locations are also applicable to standard SolidTone® applications. The thick black lines represent the face/edges (SolidTone® Topcoat and SolidTone® Primer) while the thinner gray lines represent the back (SolidTone® Primer Only). - For SolidTone® Woodgrain applications, the entire surface (face, edges, back) will be comprised of SolidTone® Topcoat only.
2	Stemware Molding	When "Cut to Length" stemware molding is prefinished by WalzCraft, the ends will also be finished.
3	3D Laminate (RTF)	★ = Products available with 3D Laminate (RTF). 3D Laminate (RTF) moldings use the same foil colors that are used on the doors, so the color match is exact. Only the face of the molding is covered with 3D Laminate (RTF) foil. The back is unfinished wood. The maximum length for moldings with 3D Laminate (RTF) is 96" [2438.4mm].

General Information (Chapter A)

1	Sanding	Moldings are sanded to 180 grit.
2	"Passes"	"Passes" refers to the number of times the 8' length of rough stock lumber is run through the molder and/or secondary machinery to complete the molding. All moldings are considered one pass moldings unless specified otherwise. Upcharges will apply for all moldings requiring more than one pass.

Material Options

1	3D Laminate (RTF)	For quality reasons, 3D Laminate (RTF) moldings have a solid wood core (Paint Grade Maple).
---	-------------------	---

Molding Options (Chapter N)

1	Radiused Molding	The R indicates moldings that can be radiused to follow the contour of a shaped rail.
2	Fastener Relief Cut	FRC = Fastener Relief Cut. See page N.1.3 for assembly detail. Hole drilling and wood screw by customer. FRC is not applicable with Convex/Concave or Canopy moldings.
3	Column Wraps	Column Wraps can be used as transition moldings between cabinets of different depths.
4	Molding #2160	When adding an accent molding to #2160 (Section N.1), the following work best: #239, 810, 812, 816, 818, 829, 832, 914, 922, 955, 956, 1043, 1164, 1203, 1398, 1732, 1810, 1815, 1816, 1821, 1895, 1902, 1911, 1928, 1971, 1998, 2008, 2044.

Molding Notes

Molding Options

Technical Notes: Molding...continued

Sizes/Dimensions...continued

3	Random Length Molding Program	If your project requires 200 lineal feet or more of the same molding (and species), you can take advantage of our Random Length Molding Program. • Available random lengths from 3'-93", 3'-8' or 3'-12'. • Please indicate the total lineal feet required in the "Description" column on the order form. • When measuring random length moldings, we round down to the next nearest ½ foot. • Random lengths that range from 3' to 12' must be either picked up or shipped via common carrier. • Lengths greater than 8' [2438.4mm] are subject to availability. ◦ Note that the choice of wood species and grade can impact the availability of lengths greater than 8'. Total lineal foot quantity of random length molding will be 90% usable • Use Moldings Shorts program if under minimum quantity.
4	Molding Shorts program	When working with solid wood, occasionally defects are exposed through the manufacturing process that will not allow us to sell the molding as a clear 8' Select/Premium or Natural/Standard Grade. We are sometimes left with 3' - 7' of usable material. Part of our mission is to use our materials and resources in the most efficient manner, which is why we offer the availability of 3' - 7' moldings through this program. As an incentive, there will be a discount offered if 3' - 7' moldings are available.
5	Molding Over 8' in Length	For those occasions when you need a molding longer than 8', we will do our best to produce those lengths up to 12' long. • Lengths greater than 8' [2438.4mm] are subject to availability. • The choice of wood species and grade can impact the availability of lengths greater than 8' [2438.4mm]. • Please contact our Customer Support Team, and ask that they research material availability and wait-times. • Please see "Usable Molding Lengths" chart below for minimum usable material based on length ordered.
6	Molding Widths Over 6"	Due to lumber availability, moldings over 6" [152.4mm] wide may be produced from glued up panels.
7	Usable Molding Lengths	WalzCraft offers standard 8' [2438.4mm] long moldings. • Upon request and availability, we also manufacture moldings from 9' to 16' in even foot increments. • In all cases, WalzCraft will ship a molding that is at a minimum 97% usable, rounded down to the nearest inch. • Please see "Usable Molding Lengths" chart below for minimum usable material based on length ordered.
8	Stemware Molding	Stemware moldings #388 & #1774 are available Cut-to-Length (minimum of 3" [76.2mm]).
9	Round Column Wrap Molding	Round Column Wrap moldings are available in individual 8' lengths for cutting and assembly by customer. • WalzCraft can also cut to length and assemble the moldings for you, in which case additional charges will apply. • All radii are measured ⅜" [9.5mm] in from the face of molding.
10	Tambour Molding	#2679: Due to its height, the minimum inside radius this molding can follow is 6" [152.4mm]. #2927: Due to its height, the minimum inside radius this molding can follow is 2⅝" [60.3mm].

Wood Species Options (Chapter S)

1	Rustic and Knotty Grades	When ordering rustic or knotty grades, narrow moldings, applied moldings and mullion stock moldings might not have knots.
2	Maple - Hard vs. Soft	For quality reasons, product requiring CNC machining will not be available in any Maple-Hard/Soft-Mixed species or Maple-Soft species. These items should instead be ordered in any of our Maple-Hard species. When specifying small moldings in Maple-Soft, WalzCraft reserves the right to substitute with Maple-Hard.

Molding Length Ordered	Expected Minimum Usable Material
8' [2438.4mm]	93" [2362.2mm]
9' [2743.2mm]	104" [2641.6mm]
10' [3048.0mm]	116" [2946.4mm]
11' [3352.8mm]	128" [3251.2mm]
12' [3657.6mm]	139" [3530.6mm]
13' [3962.4mm]	151" [3835.4mm]
14' [4267.2mm]	162" [4114.8mm]
15' [4572.0mm]	174" [4419.6mm]
16' [4876.8mm]	186" [4724.4mm]

Molding Options

Outsourced Molding

Ordering & Pricing Notes: Outsourced Molding

Ordering Guidelines

1 Order Forms Please use **Molding & Miscellaneous Order Form (E•Z Form #5)**.

Pricing

1 Pricing Please see **Section N.13** of our current **Wholesale Pricing Catalog**.

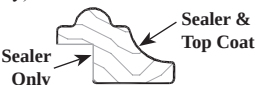

Technical Notes: Outsourced Molding

Finish Options (Chapter R)

1 Finishing Moldings will be considered a two-sided (2S) finished product. This includes solid wood refacing stock (**Section N.2**). The backs will be sealed while the face and all edges will be sealed and top coated.

Please see individual drawings for location of clear sealer vs. clear sealer/clear top coat. The thick black lines represent the face/edges (sealer/top coat) while the thinner gray lines represent the back (sealer only).

- These locations are also applicable to standard SolidTone applications. The thick black lines represent the face/edges (SolidTone® Topcoat and SolidTone® Primer) while the thinner gray lines represent the back (SolidTone® Primer Only).
- For SolidTone® Woodgrain applications, the entire surface (face, edges, back) will be comprised of SolidTone® Topcoat only.

Molding Options (Chapter N)

1 Rope Molding Molding #3259 is cut from the #3255 Half Round Rope molding.

- #3259 is a modified cut.

Profile Options (Chapter E)

1 Applied Molding Profiles These moldings may also be applied to some Traditional & Mitered stile and rail profiles with a shelf. See **Chapter E**.

Sizes / Dimensions

1 Random Length Molding When ordering random length molding, please indicate the total lineal feet required in the **"Description"** column on the **Molding & Miscellaneous Order Form (E•Z Form #5)**.

Moldings #1356, 2381, 3162 are only available in various random lengths. See **Section N.13** of our current **Wholesale Pricing Catalog**.

2 Size Tolerance As an outsourced product, it is beyond WalzCraft's ability to control the final dimensions of these moldings. Therefore, outsourced molding, and any molding created from an outsourced molding, will have a size tolerance of $\pm \frac{1}{16}$ " [1.6mm] in width and height.

Outsourced Molding - END
