	◦ PVC Edgebanding Rolls	V.4.3

Raw MDF Door & Drawer Front Construction and Ordering

- MDF doors and drawer fronts are constructed of premium, ¾" [19.1mm] or 1" [25.4mm] thick 48# MDF that is precision routed in the door or drawer front style and profiles that you select.
- **To Order MDF Doors or Drawer Fronts...**
 - 1) Select one of the available door styles or drawer front styles.
 - 2) Select one of the available Stile & Rail/Panel Profile combinations starting on *page V.1.6*.
 - 3) Select one of the available Outside Edge Profiles starting on *page V.1.22*.

3D Laminate (RTF) Door & Drawer Front Construction and Ordering

- 3D Laminate (RTF) doors and drawer fronts are constructed of premium ¾" [19.1mm] thick 48# MDF with an Almond or White-W300 True Thermofused Melamine back or a matching 3D Laminate (RTF) back.
 - When choosing a matching 3D Laminate (RTF) back, the product will be approximately 0.040" (1.02mm) thicker than normal.
 - Please note that there is little value in having a 3D Laminate Matching Back in White Crystal, White High Gloss, White Matte, White Wood Grain or Frosty White when we already have a White-W300 Melamine back. Likewise, there is little value in selecting 3D Laminate Matching Back in Almond Crystal, as our Almond Melamine is already a great match.
- Precision routed in the door or drawer front styles and profiles that you select.
- The 3D Laminate (RTF) foil covers the face and edges of the doors and drawer fronts.
- **To Order a 3D Laminate (RTF) Door...**
 - 1) Select one of the available door or drawer front styles.
 - 2) Select one of the available Stile & Rail/Panel Profile combinations starting on *page V.1.6*.
 - 3) Select one of the available Outside Edge Profiles starting on *page V.1.22*.
 - 4) Select one of the available foil colors for the face and edges and also a color for the back (see *page V.1.24*).
 - For the back, specify either Almond Melamine, White-W300 Melamine or matching 3D Laminate (RTF).
 - Note: White High Gloss is only available with a White-W300 Melamine back.
 - For colors with a grain/pattern direction, please specify either horizontal or vertical grain for the doors and drawer fronts.

3D Laminate (RTF) Product Features

- **Construction:** Seamless, one-piece construction with grain pattern running all in the same direction.
- **Dimensional Stability:** Premium MDF core means less expansion and contraction and doors stay flatter than wood doors.
- **Heat Resistance:** Moderate heat resistance. Care should be taken when placed next to a high heat source such as an oven, especially during the self-cleaning cycle. Additional protection from the heat can be achieved with the use of an appliance heat shield between the 3D laminate product and the appliance. Please consult your appliance dealer.
- **Color Consistency:** Color consistency and fade resistance similar to melamine. Better color stability over time than solid wood doors.
- **Environment:** All components meet Carb2 standards for an environmentally friendly product.
- **Bacteria Resistance:** No built-in anti-microbial properties.
- **Easy Care:** Clean with a non-abrasive detergent and a damp sponge or cloth.
- **Scratch Resistance:** 3D Laminates have good scratch resistance.

3D Laminate (RTF) Cleaning and Care

- 3D Laminate (RTF) doors are built to need very little attention.
- We recommend that you use only warm soapy water (*dish soap*) to clean them. Never use anything with abrasive in it.
 - If using stronger cleaning materials, always test a new cleaning solution on a small, less conspicuous area before doing an entire kitchen.
- If 3D Laminate (RTF) doors are installed near a self cleaning oven, dishwasher or any other appliance emitting high heat, in addition to the use of a heat shield, we suggest you open the cabinet doors to avoid heat exposure.

Ordering & Pricing Notes: MDF & 3D Laminate (RTF) Doors & Drawer Fronts**Ordering Guidelines**

1	Order Forms	Please use <i>Door and/or Drawer Front Order Forms (E•Z Forms #2 and #3)</i> .
Pricing		
1	Pricing	Please see <i>Section V.1</i> of our current Wholesale Pricing Catalog .

Technical Notes: MDF & 3D Laminate (RTF) Doors & Drawer Fronts**Cabinet Accessory Options (Chapter M)**

1	Appliance Panels	Style "A" and Style "C" are the only options available. See <i>Section M.15</i> .
---	------------------	-----------------------------------------------------------------------------------

Cabinet Door & Drawer Front Options (Chapter B, V)

1	Style 500*	Style 500* drawer fronts are similar to a LOOK "A" drawer front, see <i>Section B.16</i> .
2	Raised Panel (RP) Style Drawer Fronts	Raw MDF Raised Panel (RP) Drawer Fronts are available in all Drawer Front "LOOKS" found in <i>Section B.16</i> .
3	Style 500	Can be paired with the #1803, #1804 and #2211 Finger Pull Moldings and a D7 outside edge on raw MDF, or when using a D33 outside edge with a 3D Laminate (RTF). <ul style="list-style-type: none"> Finger Pull Moldings are shown on <i>page F.8.1</i>. D7 is not an option on products using 3D Laminate (RTF). For a raw MDF slab door with maple wood veneer edgbanding, please see <i>Section B.10 - Veneered and Edgbanding Doors</i> .
4	Style 501	Only available with fluted pattern as shown. The depth of the fluted pattern is the same as that of door Style 522, which is (approximately) 5/32" [4.0mm]. (See Flute Pattern Diagram for Style 522 on <i>page V.1.3</i>). Only available with a D7 outside edge for raw MDF applications, or D33 for 3D Laminate (RTF) applications.
5	Style 522	Only available with fluted pattern as shown. Hinge bores are available on the fluted side of the Style 522 door as well as the side opposite the flutes. When ordering, indicate which side of the door gets bored. Style 522 in raw MDF is available with all outside edge profiles from <i>Section E.15</i> . Style 522 with 3D Laminate (RTF) is only available with a D33 outside edge profile.
6	Style 525	Only available with the SR24/PR24 Profiles. The placement of the routing is as described on <i>page B.9.5</i> for the Style 1025 hardwood door.
7	Style 570 & 570*	Only available with the SR24/PR24 Profiles. Standard placement of the routing groove is 2¼" [57.2mm] from the top of the door to the center of the SR24/PR24 profile. The placement of the routing groove shown on the 570* on <i>page V.1.3</i> is 1½" [38.1mm] from the top of the drawer front to the center of the SR24/PR24 profile.
8	Style 580 & 580*	Only available with the SR24/PR24 profile. <ul style="list-style-type: none"> For doors 9½" [241.3mm] or higher, the standard placement of the pattern from the top/bottom of the door/drawer front will be 2¼" [57.2mm]. The standard radius for the four corners will be 2" [50.8mm]. A 1" [25.4mm] minimum is maintained in the flat area at the center of the pattern. (2¼" + 2¼" + 2" + 2" + 1" = 9½" and up). For doors from 7½" [190.5mm] up to 9½" [241.3mm], the standard placement of the pattern from the top/bottom of the door/drawer front will be 2¼" [57.2mm]. The standard radius for the four corners will be 1" [25.4mm]. A 1" [25.4mm] minimum is maintained in the flat area at the center of the pattern. (2¼" + 2¼" + 1" + 1" + 1" = 7½" minimum). For doors from a 6" [152.4mm] minimum up to 7½" [190.5mm], the standard placement of the pattern from the top / bottom of the door/drawer front will be 1½" [38.1mm]. The standard radius for the four corners will be 1" [25.4mm]. A 1" [25.4mm] minimum is maintained in the flat area at the center of the pattern. (1½" + 1½" + 1" + 1" + 1" = 6" minimum). The placement of the routing groove shown on the 580* on <i>page V.1.3</i> is 2¼" [57.2mm] from the top of the drawer front to the center of the SR24/PR24 profile.
9	Style 590	Only available with the SR24/PR24 Profiles. The placement of the routing is as described on <i>page B.9.1</i> for the Style 1050 hardwood door.

Technical Notes: MDF & 3D Laminate (RTF) Doors & Drawer Fronts...continued

Cabinet Door & Drawer Front Options (Chapter B, V)...continued

10	Frame & Mullion Doors	The routed recessed areas on the back of 3D Laminate/RTF frame and mullion doors are painted to blend with the color / pattern on the back side of the frame or mullion door. The backs can be either White-W300 or Almond Melamine or they can match the face of the 3D Laminate/RTF door.
		Glass openings are routed to follow the contour of the shape for Styles 523, 524L, 524R, 526L, 526R, 527L, 527R, 528 .
		Rubber Glass Retainer is available with MDF/3D Laminate (RTF) Frame & Mullion doors. See page V.1.19 .
		The standard method of placement for mullions shall be to equally divide the openings, unless specified otherwise. Custom placements are available, please provide a drawing to quote.
11	True Divided Lites	<i>Not available</i> with MDF and RTF Frame and Mullion doors.

Convex/Concave Options (Chapter D)

1	Curved Products	The ☐ indicates door styles that are available Convex/Concave (curved). See Chapter D for more information.
---	-----------------	-----------------------------------------------------------------------------------------------------------------------------

Design Options (Chapter G)

1	Radius Corners	See Section G.13 .
2	Center Panel Face Routing - CPFR	Raw MDF Style 500/500* are the only One-Piece MDF door styles that can accept all CPFR.
		3D Laminate (RTF) Style 500/500* can accept the following CPFR patterns: CPFR100, CPFR500, CPFR600, CPFR700, CPFR1900 and CPFR2100 .

Finish Options (Chapter R)

1	3D Laminate (RTF)	When ordering MDF Drawer Fronts with 3D Laminate (RTF), the backs are available in White-W300 or Almond Melamine or matching 3D Laminate / RTF.
		The ★ indicates profiles that are available on products using 3D Laminate (RTF).
2	Primed Only for Paint & SolidTone®	See “Finishing Methods” for more information on pre-finishing MDF with “Primed Only for Paint” or “SolidTone® Colors”.
3	White High Gloss 3DL (RTF)	Not available with center panel profiles PR40, PR41, PR42, PR43, PR44 .

Functional Options (Chapter F)

1	Hinge Boring	Hinge boring is available for MDF 1-Piece / 3D Laminate (RTF) doors and drawer fronts. Please see Section F.1 for additional hinge boring requirements, ordering instructions and compatibility.
		The SR213SC and SR217TC families are not available with 35mm hinge boring at 13.5mm deep.
2	Finger Pulls	FP100, FP200, FP300, FP400, FP500 are available on all ¾" [19.1mm] or 1" [25.4mm] Raw MDF doors and drawer fronts.
		FP200 is <i>not</i> an option on ¾" [19.1mm] Raw MDF drawer front styles 300-32RP* , 301-25RP* and 302-32RP* .
		FP500 is the only finger pull rout available with 3D Laminate (RTF) doors & drawer fronts.
3	Lazy Susan Doors	3D Laminate (RTF) mitered lazy susan doors will have the back corners clipped (using MJ5), see drawings on page F.6.2 .
		To facilitate the pressing operation, the mitered edges on the doors can not come to a sharp point. Lazy susan doors will come to you ⅛" [1.6mm] smaller in width than the size you order. When you assemble the pair, the size will be correct because you are matching up the inside corners.

General Information (Chapter A)

1	Warranty - MDF Products	See Section A.8 for information regarding size, warping and twisting warranties for MDF products.
---	-------------------------	-------------------------------------------------------------------------------------------------------------------

Material Options

1	MDF - MR	1-Piece doors and drawer fronts made from raw MDF - MR (Moisture Resistant) are not available with 3D Laminate.
---	----------	-----------------------------------------------------------------------------------------------------------------

Miscellaneous

1	Vertical Grain	<i>Leather White Alligator</i> has a distinct grain / pattern direction. When using this pattern, WalzCraft recommends vertical grain on drawer fronts when used in conjunction with vertical grain on the doors.
---	----------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Profile Options (Chapter E)

1	“Passes”	“Passes” refer to the number of CNC Router cycles required to complete a door. Complex doors require more “Passes”.
2	MDF Outside Edge Profiles	<ul style="list-style-type: none"> Most outside edge profiles shown in Section E.15 & E.16 are available on MDF products. Limitations apply for raised panel drawer fronts, see the compatibility chart on our website. If ordering an applied molding outside edge on an MDF product, the applied molding will be made from a Maple-Hard/Soft-Mixed Paint Grade Wood Species.

► For PRICING ► See [Section V.1](#) in our current Wholesale Pricing Catalog.

Technical Notes: MDF & 3D Laminate (RTF) Doors & Drawer Fronts...continued

Profile Options (Chapter E)...continued

3	Varying Outside Edge Profiles	D7 can be used in combination with another outside edge to result in profiles that vary from side to side, on Raw MDF only . D33 can be used in combination with another outside edge to result in profiles that vary from side to side, on 3D Laminate (RTF) Doors to achieve a similar look.
4	AM Outside Edge Options	For solid wood applied molding outside edge options on raw MDF, please see Section E.16 .
5	Raised Panel (RP) Style Drawer Front Profiles	You must choose an RP "Look", a Raised Panel Profile, and an Outside Edge Profile when ordering RP (Raised Panel) Drawer Fronts. The Raised Panel Profile # and the "Look" option define the Style # for your RP Drawer Front. See Section B.16 for RP drawer front profiles. Raw MDF RP drawer fronts are available in all Drawer Front "LOOKS".
6	PR40 Center Panel Profile	Only available with 3D Laminate (RTF) material. • See Finish Options notes within this section for 3D Laminate (RTF) restrictions. • If looking for a raw MDF door with a flat panel, please see the PR42 center panel profile within this section or refer to Section B.3 for 5-piece raw MDF flat panel doors. Max size for products with a PR40 center panel profile is 18" x 36" [457.2mm x 914.4mm] or 36" x 18" [914.4mm x 457.2mm].
7	PR41 Center Panel Profile	Only available with 3D Laminate (RTF) material. • See Finish Options notes within this section for 3D Laminate (RTF) restrictions. • Available in the following door styles: 518, 520, 521, 531 . • If looking for a raw MDF door with a flat panel, please see the PR42 center panel profile within this section or refer to Section B.3 for 5-piece raw MDF flat panel doors. Maximum size for products with a PR41 center panel profile is 24" x 42" [609.6mm x 1066.8mm] or 42" x 24" [1066.8mm x 609.6mm]. • For door styles 518, 520 and 521 , when combining PR41 with SR92TC the maximum size may be increased to 24" x 60" [609.6mm x 1524.0mm] or 60" x 24" [1524.0mm x 609.6mm]. • Doors over 48" will require a center rail or stile (ex: door style 520, 521).
8	PR42 Center Panel Profile	When combining the PR42 center panel profile with the SR92TC stile & rail profile, 1-piece MDF doors and drawer fronts are only available in raw MDF (for SolidTone® application). • When combining the PR42 center panel profile with the SR211, SR212, SR215 or SR215SC stile & rail profile, 1-piece MDF doors and drawer fronts are available in raw MDF (for SolidTone® application) or with 3D Laminate. • See Finish Options notes within this section for 3D Laminate (RTF) restrictions. • Please also refer to Section B.3 for 5-piece raw MDF flat panel doors. Maximum size for raw MDF products with a PR42 center panel profile is 24" x 70" [609.6mm x 1778.0mm]. • Since raw MDF does not have a grain direction, the max dimensions can be 24"W x 70"H or 70"W x 24"H. • When one dimension is greater than 24", the other dimension must be 24" or less. • Doors from 42½" to 70" (high or wide) will carry no warranty. Maximum size for 3D Laminate products with a PR42 center panel profile is 24" x 42" [609.6mm x 1066.8mm] or 42" x 24" [1066.8mm x 609.6mm].
9	PR43 Center Panel Profile	Only available with 3D Laminate (RTF) material. • See Finish Options notes within this section for 3D Laminate (RTF) restrictions. • Available in the following door styles: 518, 520, 521, 531 . • If looking for a raw MDF door with a flat panel, please see the PR42 center panel profile within this section or refer to Section B.3 for 5-piece raw MDF flat panel doors. Maximum size for products with a PR43 center panel profile is 24" x 42" [609.6mm x 1066.8mm] or 42" x 24" [1066.8mm x 609.6mm].
10	PR44 Center Panel Profile	Available in raw MDF or with 3D Laminate (RTF) material. • See Finish Options notes within this section for 3D Laminate (RTF) restrictions. • Available in the following door styles: 518, 520, 521, 531 . • 5-Piece raw MDF doors with a flat panel can be found in Section B.3 . Maximum size for raw MDF products with a PR44 center panel profile is 24" x 70" [609.6mm x 1778.0mm]. • Since raw MDF does not have a grain direction, the max dimensions can be 24"W x 70"H or 70"W x 24"H. • When one dimension is greater than 24", the other dimension must be 24" or less. • Doors from 42½" to 70" (high or wide) will carry no warranty. Maximum size for 3D Laminate products with a PR44 center panel profile is 24" x 42" [609.6mm x 1066.8mm] or 42" x 24" [1066.8mm x 609.6mm].
11	SR213, SR217 Families	Only available with D32 or D33 outside edge profiles.
12	SR214	Only available with door/df styles 518, 518*, 520, 521, 531 . As part of the stile & rail profile, the v-groove for SR214 will follow the outside perimeter of the door only. • It will not be applied to center stiles or center rails.

Technical Notes: MDF & 3D Laminate (RTF) Doors & Drawer Fronts...continued

Sizes/Dimensions

1	Maximum Sizes	<ul style="list-style-type: none"> The maximum size of a raw MDF product is 48"W x 96"H [1219.2mm x 2438.4mm]. The maximum size of a 3D Laminate (RTF) product is 40"W x 90"H [1016mm x 2286mm].
		<p>The maximum width for 1-Piece MDF doors/drawer fronts that WalzCraft will warrant is 24".</p> <p>The maximum height for 1-Piece MDF doors/drawer fronts that WalzCraft will warrant is 72".</p> <ul style="list-style-type: none"> Sizes greater than this will carry no warranty against warping or twisting. See Section A.8 for more information on warping and twisting tolerances.
		3D Laminate (RTF) products with a grain/pattern direction that exceed 40" [1016mm] in width, will be manufactured with a "horizontal" pattern due to maximum size limitations.
2	Panel Opening	<ul style="list-style-type: none"> MDF & 3D Laminate (RTF) doors and drawer fronts are a one piece constructed product. If choosing a door style with a flat panel, the minimum panel opening size that can be accommodated would be 1" [25.4mm]. The minimum panel opening size for a door style with a raised panel would be 1" [25.4mm] of flat on the face of the raised panel, plus the panel profile reveals.
3	Stile & Rail	<p>The minimum <i>width</i> at the narrowest, for any top/bottom rail with or without a GRF cut is 1¼" [31.8mm].</p> <p>The minimum <i>width</i> at the narrowest, for any outside or center stile or center rail with or without a GRF cut is 1½" [38.1mm].</p>
4	SR213, SR217 Families	These two profile families do not accommodate width flexibility. Only available at the widths shown.
5	Thicknesses	<p>Doors and drawer fronts in raw MDF are available ¾" [19.1mm] and 1" [25.4mm] thick.</p> <ul style="list-style-type: none"> Raw MDF Style 500/500* will also be available ⅝" and ⅜" thick when using one of the compatible Applied Molding Outside Edge profiles for ⅝" or ⅜" thick raw MDF or solid wood slabs from Section E.16.
		Doors and drawer fronts with 3D Laminate (RTF) are available ¾" [19.1mm] thick only.

Technical Notes: 3D Laminate (RTF) Sheet Stock...Continued**Sheet Stock Options (Chapter K)**

1	Custom Pressing	3D Laminate (RTF) is available custom pressed on ¼" thick through 1" thick MDF core or Combi-Core sheet stock. See <i>Custom Pressed Section K.3</i> .
----------	------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------

Sizes/Dimensions...continued

1	Thickness	3D Laminate thickness varies by color/pattern. See color/pattern availability chart. Phenolic material measures approximately .020" thick (does not include foil thickness).
2	4' x 8' Sheet Sizes	4'x8' sheets of 3D Laminate Loose Foil will measure anywhere from 51" to 57" wide x 97" long, depending on the pattern. 4'x8' panels are considered 95% free from defect. All other 3D Laminate sheet stock products will start out as, or will be taken from, a 49" x 97" sheet. Some edges may need to be trimmed.
3	RCSS - Rough Cut Stock Size	A sheet that is only available in the following sizes: 4'x8', 2'x8', 4'x4', 2'x4'. Edges may need to be trimmed. Some sheets may be slightly oversized. Allow ⅛" per saw kerf.
4	RTRW - Ripped to Rough Width	Available in customer specified widths x 8' long only. Edges may need to be trimmed. Specified widths will not be oversized. Some lengths may be slightly oversized. Minimum width for 3D Laminate is ¾". Allow ⅛" per saw kerf.
5	PCTS - Precision Cut to Size	Available in customer specified widths and lengths (any size piece that the sheet will yield). No trimming of edges is needed. Pieces will not be oversized. Minimum width for 3D Laminate is ¾". Allow ⅛" per saw kerf. Precision Cut to Size (PCTS) 3D Laminate is only available in the "3D Laminate Loose Foil with Phenolic Back" option.

Decorative Laminate Veneer (DLV) Colors/Textures

Features of Decorative Laminate Veneer (DLV) Doors, Drawer Fronts & Accessories

Materials

Stile and rail profiles and accessory molding profiles are manufactured using a premium grade of MDF. The MDF is profiled to tight tolerances, and then “wrapped” with Decorative Laminate Veneer (DLV) using precision profile wrapping machines. Door center panels are 6mm thick Thermally Fused Melamine (TFM) that perfectly matches the Decorative Laminate Veneer. These are prefinished products that require no additional finishing.

Note: Other matching complimentary products exist within the industry, such as HPL, edgebanding, 3DL and other thicknesses of TFM. These products use the same names and numbers as noted in the chart below.

Decorative Laminate Veneer (DLV) / Prism Laminates Cross Reference

DLV/Prism Color	Coffee Groovz	White	Aria	Licorice Groovz	Arctic Groovz
DLV/Prism Texture	AuthenTICK	Suede	Medina	AuthenTICK	AuthenTICK
Prism Number	WF395	W100	WF340	WF392	WF394

Please note that Prism was formerly Flakeboard.

Construction

Doors and drawer fronts use mitered construction similar to that used for all WalzCraft solid wood doors and drawer fronts that utilize mitered construction. This ensures that the grain direction on all the parts of a 5-piece door are similar to the grain direction on a solid wood door. The combination of precisely wrapped stile and rail stock combined with WalzCraft’s carefully monitored miter machining and assembly process produces joints of exceptional quality.

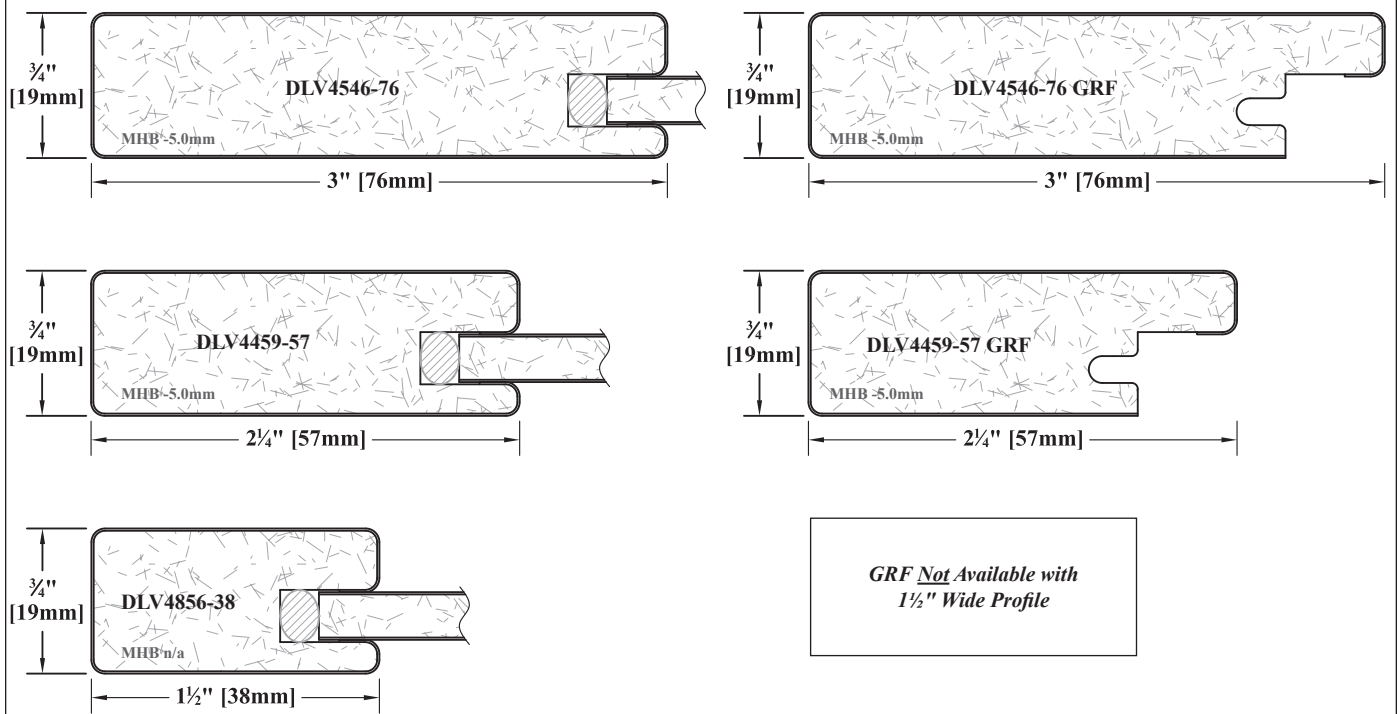

Quality Features of Decorative Laminate Veneer (DLV) Doors and Drawer Fronts

- **Construction:** Five-piece miter construction. Stiles & rails with perpendicular grain direction provide the overall look of a finished wood door.
- **Dimensional Stability:** Premium MDF means less expansion and contraction and doors stay flatter than wood doors.
- **Heat Resistance:** Great resistance to delamination up to 185° Fahrenheit.
- **Color Consistency:** Color consistency and fade resistance similar to melamine. Better color stability over time than solid wood doors.
- **Environment:** All components meet Carb2 standards for an environmentally friendly product.
- **Bacteria Resistance:** DLV products have an anti-microbial additive that is good for the life of the product.
- **Easy Care:** Clean with a non-abrasive detergent and a damp sponge or cloth.
- **Scratch Resistance:** Decorative Laminate Veneers are extremely scratch resistant.

Ordering & Pricing Notes: Decorative Laminate Veneer (DLV) Sheet Stock

Ordering Guidelines

1	Order Forms	Please use <i>Sheet Goods Order Form (E-Z Form #8.2)</i> and part #185.
---	-------------	-------------------------------------------------------------------------

Pricing

1	Pricing	Please see <i>Section V.2</i> of our current Wholesale Pricing Catalog .
---	---------	---------------------------------------------------------------------------------

Technical Notes: Decorative Laminate Veneer (DLV) Sheet Stock

Finish Options (Chapter R)

1	Colors/Textures	Available in the five colors shown at the beginning of this section. Each color is only available in the texture that it's noted with.
2	Finish Options	All Decorative Laminate Veneer products are prefinished. No additional finishing is needed.

Sheet Stock Options (Chapter K)

1	Laminate Sheets with Paper Back, Non-Adhesive	Rough Cut Stock Sizes (RCSS)	Only available in the following sizes: 4'x8', 2'x8', 4'x4', 2'x4'.
		Ripped to Rough Width (RTRW)	Available in customer specified widths x 8' long only.
2	Laminate Sheets with Paper Back, 3M PSA	Rough Cut Stock Sizes (RCSS)	Only available in the following sizes: 4'x8', 2'x8', 4'x4', 2'x4'.
		Ripped to Rough Width (RTRW)	Available in customer specified widths x 8' long only.
3	Matching Melamine (2S)	Rough Cut Stock Sizes (RCSS)	Only available in the following sizes: 4'x8', 2'x8', 4'x4', 2'x4'.
		Ripped to Rough Width (RTRW)	Available in customer specified widths x 8' long only.
		Precision Cut to Size (PCTS)	Available in customer specified widths and lengths (any size piece that the sheet will yield).
4	Custom Pressed	Laminate sheets of DLV are available custom pressed on 1/4" thick through 1" thick MDF sheet stock. See <i>Custom Pressed Section K.3</i> .

WalzCraft.com

(Phone) 1-800-237-1326

6:00AM - 5:30PM CST

(24 Hour Fax) 1-608-781-3667

Technical Notes: High Pressure Laminate Doors & Drawer Fronts

Dealer Aids (Chapter T)

1	Laminate Sample Chips	A sample set of the six colors is available. See <i>Product Samples - Section T.2</i> for more information. • Use part #186136.
---	-----------------------	------------------------------------------------------------------------------------------------------------------------------------

Finish Options (Chapter R)

1	Colors/Finishes	Each stock color is only available in the finish that it's noted with.
---	-----------------	------------------------------------------------------------------------

Functional Options (Chapter F)

1	Hinge Boring	Hinge boring is available for High Pressure Laminate doors & drawer fronts with a ¾" [19.1mm] finished thickness; please contact Customer Support to inquire about hinge bore options on doors & drawer fronts with a ⅝" [15.9mm] finished thickness. Please see <i>Section F.1</i> for additional hinge boring requirements, ordering instructions and compatibility.
2	Finger Pull Moldings	Wood finger pull moldings are available. See <i>Section F.8</i> . Not all HPL Door Manufacturing options are compatible. Please see the EBT - Fingerpull Molding Compatibility chart on our website: Resources/Technical Information .

Material Options

1	Core Material	High Pressure Laminate (HPL) doors and drawer fronts will have an MDF core.
2	Edgeband Material	Matching PVC (HPL-2) <i>or</i> Laminate (HPL-4) edgebanding.
3	HPL Manufacturer	Formica (six colors kept in stock), Wilsonart, Nevamar, <i>or</i> another manufacturer of your choice.

Miscellaneous

1	Edgeband Grain Direction	Choose from either Lineal grain direction or Front to Back grain direction for each edge. Limited to HPL-4 only. Unless otherwise specified, WalzCraft's "standard" will be to apply the laminate edgebanding in a Lineal direction. Front to Back grain direction is limited to a maximum length of 48". See <i>Section B.10</i> for diagram.
---	--------------------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Sizes/Dimensions

1	Thickness	Available in finished thicknesses of ⅝" (+ / - .015") or ¾" (+ / - .015").
2	Minimum Size	Minimum part size is 3" x 3" [76.2mm x 76.2mm] with machine applied edgebanding. Smaller sizes may be edgebanded by hand, but additional charges may apply.

HPL Doors & Drawer Fronts - END
