• PVC Edgebanding	V.4.3

Raw MDF Door & Drawer Front Construction and Ordering

- MDF doors and drawer fronts are constructed of premium, ¾" [19.1mm] or 1" [25.4mm] thick 48# MDF that is precision routed in the Door or Drawer Front Style and Profiles that you select.
- **To Order MDF Doors or Drawer Fronts...**
  - **1)** Select one of the available Door Styles or Drawer Front Styles.
  - **2)** Select one of the available Stile & Rail / Panel Profile combinations starting on ***page V.1.6***.
  - **3)** Select an Outside Edge Profile (See ***Section E.15***).

3D Laminate (RTF) Door & Drawer Front Construction and Ordering

- 3D Laminate (RTF) doors and drawer fronts are constructed of premium ¾" [19.1mm] thick 48# MDF with an Almond or White-W300 True Thermofused Melamine back or a matching 3D Laminate (RTF) back.
  - ◦ When choosing a matching 3D Laminate (RTF) back, the product will be approximately 0.040" (1.02mm) thicker than normal.
  - ◦ Please note that there is little value in having a 3D Laminate Matching Back in White Crystal, White High Gloss, White Matte, White Wood Grain or Frosty White when we already have a White-W300 Melamine back. Likewise, there is little value in selecting 3D Laminate Matching Back in Almond Crystal, as our Almond Melamine is already a great match.
- They are precision routed in the Door or Drawer Front Styles and Profiles that you select.
- The 3D Laminate (RTF) foil covers the face and edges of the doors and drawer fronts.
- **To Order a 3D Laminate (RTF) Door...**
  - **1)** Select one of the available Door or Drawer Front Styles.
  - **2)** Select one of the available Stile & Rail / Panel Profile combinations starting on ***page V.1.6***.
  - **3)** Select one of the available Outside Edge Profiles starting on ***page V.1.20***.
  - **4)** Select one of the available foil colors for the face and edges and also a color for the back (See ***page V.1.22***).
    - ◦ For the back, specify either Almond or White-W300 Melamine or matching 3D Laminate (RTF).
    - ◦ For colors with a grain / pattern direction, please specify either horizontal or vertical grain for the doors and drawer fronts.
    - ◦ White High Gloss requires a special board for pressing and is only available with a White-W300 Melamine back.

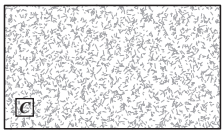
3D Laminate (RTF) Product Features

- **Construction:** Seamless, one-piece construction with grain pattern running all in the same direction.
- **Dimensional Stability:** Premium MDF core means less expansion and contraction and doors stay flatter than wood doors.
- **Heat Resistance:** Moderate heat resistance. Care should be taken when placed next to a high heat source such as an oven, especially during the self-cleaning cycle. Additional protection from the heat can be achieved with the use of an appliance heat shield between the 3D laminate product and the appliance. Please consult your appliance dealer.
- **Color Consistency:** Color consistency and fade resistance similar to melamine. Better color stability over time than solid wood doors.
- **Environment:** All components meet Carb2 standards for an environmentally friendly product.
- **Bacteria Resistance:** No built-in anti-microbial properties.
- **Easy Care:** Clean with a non-abrasive detergent and a damp sponge or cloth.
- **Scratch Resistance:** 3D Laminates have good scratch resistance.

3D Laminate (RTF) Cleaning and Care

- 3D Laminate (RTF) doors are built to need very little attention.
- We recommend that you use only warm soapy water (*dish soap*) to clean them. Never use anything with abrasive in it.
  - ◦ If using stronger cleaning materials, always test a new cleaning solution on a small, less conspicuous area before doing an entire kitchen.
- If 3D Laminate (RTF) doors are installed near a self cleaning oven, dishwasher or any other appliance emitting high heat, in addition to the use of a heat shield, we suggest you open the cabinet doors to avoid heat exposure.

MDF 1-Piece Doors & Drawer Fronts



Style: 500*
Drawer Front
Min. Size: 3x3
[76.2mm x 76.2mm]

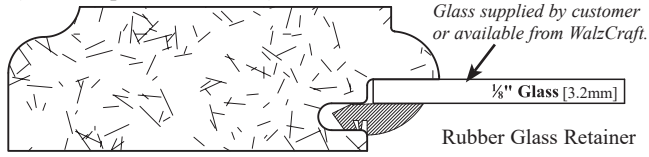
Rubber Glass Retainer

- Glass retainer fits into a slot, as shown in the drawing below, and can only be used with ⅛" [3.2mm] glass.
- See Frame and Mullion Door ***Section B.12*** for glass sizing formula and more information on Rubber Glass Retainer.
- Glass Retainer is available in Black, Brown, Clear & White.
  - You may order the glass retainer by the lineal foot, or in full rolls. (Both are priced the same.)
  - White is available in 500 foot rolls.
  - Black, Brown and Clear are available in 1,000 foot rolls.
- Please see ***Section B.12*** of our current **Wholesale Pricing Catalog** for Rubber Glass Retainer lineal foot pricing.



Rubber Glass Retainer

MDF & 3D Laminate (RTF) Raised Panel (RP) Drawer Front Profiles

Please see ***Notes*** at the end of this section and ***Section B.16*** for more information on Raised Panel (**RP**) Style Drawer Front **"Looks"** and available profiles in raw MDF and with 3D Laminate (RTF).

Ordering & Pricing Notes: MDF & 3D Laminate (RTF) Doors & Drawer Fronts		
	Ordering Guidelines	
1	**Order Forms**	Please use ***Door and/or Drawer Front Order Forms (E•Z Forms #2 and #3)***.
	Pricing	
1	**Pricing**	Please see ***Section V.1*** of our current **Wholesale Pricing Catalog**.

Technical Notes: MDF & 3D Laminate (RTF) Doors & Drawer Fronts		
	Cabinet Accessory Options (Chapter M)	
1	**Appliance Panels**	**Style "A"** and **Style "C"** are the only options available. See ***Section M.15***.

	Cabinet Door & Drawer Front Options (Chapter B, V)	
1	**Style 500***	**Style 500*** drawer fronts are similar to a **LOOK "A"** drawer front, see ***Section B.16***.
2	**Raised Panel (RP) Style Drawer Fronts**	Raw MDF Raised Panel (**RP**) Drawer Fronts are available in all Drawer Front **"LOOKS"** found in ***Section B.16***.
3	**Style 500**	• Can be paired with the **#1803**, **#1804** and **#2211** Finger Pull Moldings and a **D7** outside edge on raw **MDF**, or when using a **D33** outside edge with a 3D Laminate (RTF). • Finger Pull Moldings are shown on ***page F.8.1***. • **D7** is ***not an option*** on products using 3D Laminate (RTF).
		For a raw MDF slab door with maple wood veneer edgbanding, please see ***Section B.10 - Veneered and Edgebanded Doors.***
4	**Style 501**	Only available with fluted pattern as shown. The depth of the fluted pattern is the same as that of door **Style 522**, which is (approximately) 5/32" [4.0mm]. (See Flute Pattern Diagram for **Style 522** on ***page V.1.3***).
		Only available with a **D7** outside edge for raw **MDF** applications, or **D33** for 3D Laminate (RTF) applications.
5	**Style 522**	Only available with fluted pattern as shown. Hinge bores are available on the fluted side of the **Style 522** door as well as the side opposite the flutes. When ordering, indicate which side of the door gets bored.
		Only available with a **D7** outside edge for raw **MDF** applications, or **D33** for 3D Laminate (RTF) applications.
6	**Style 525**	Only available with the **SR24/PR24** Profiles. The placement of the routing is as described on ***page B.9.5*** for the **Style 1025** hardwood door.
7	**Style 570 & 570***	Only available with the **SR24/PR24** Profiles.
		Standard placement of the routing groove is 2¼" [57.2mm] from the top of the door to the center of the **SR24/PR24** profile.
		The placement of the routing groove shown on the **570*** on ***page V.1.3*** is 1½" [38.1mm] from the top of the drawer front to the center of the **SR24/PR24** profile.
8	**Style 580 & 580***	Only available with the **SR24/PR24** profile.
		• For doors 9½" [241.3mm] or higher, the standard placement of the pattern from the top/bottom of the door/drawer front will be 2¼" [57.2mm]. • The standard radius for the four corners will be 2" [50.8mm]. • A 1" [25.4mm] minimum is maintained in the flat area at the center of the pattern. • (2¼" + 2¼" + 2" +2" +1" = 9½" and up).
		• For doors from 7½" [190.5mm] up to 9½" [241.3mm], the standard placement of the pattern from the top/bottom of the door/drawer front will be 2¼" [57.2mm]. • The standard radius for the four corners will be 1" [25.4mm]. • A 1" [25.4mm] minimum is maintained in the flat area at the center of the pattern. • (2¼" + 2¼" + 1" +1" +1" = 7½" minimum).
		• For doors from a 6" [152.4mm] minimum up to 7½" [190.5mm], the standard placement of the pattern from the top/bottom of the door/drawer front will be 1½" [38.1mm]. • The standard radius for the four corners will be 1" [25.4mm]. • A 1" [25.4mm] minimum is maintained in the flat area at the center of the pattern. • (1½" + 1½" + 1" +1" +1" = 6" minimum).
		The placement of the routing groove shown on the **580*** on ***page V.1.3*** is 2¼" [57.2mm] from the top of the drawer front to the center of the **SR24/PR24** profile.
9	**Style 590**	Only available with the **SR24/PR24** Profiles. The placement of the routing is as described on ***page B.9.1*** for the **Style 1050** hardwood door.

Notes continued on next page...

Technical Notes: MDF & 3D Laminate (RTF) Doors & Drawer Fronts...continued

Cabinet Door & Drawer Front Options (Chapter B, V)...continued

10	**Frame & Mullion Doors**	The routed recessed areas on the back of 3D Laminate/RTF frame and mullion doors are painted to blend with the color/pattern on the back side of the frame or mullion door. The backs can be either White-W300 or Almond Melamine or they can match the face of the 3D Laminate/RTF door.
		Glass openings are routed to follow the contour of the shape for Styles **523, 524L, 524R, 526L, 526R, 527L, 527R, 528**.
		Rubber Glass Retainer is available with MDF/3D Laminate (RTF) Frame & Mullion doors. See ***page V.1.19***.
		The standard method of placement for mullions shall be to equally divide the openings, unless specified otherwise. Custom placements are available, please provide a drawing to quote.
11	**True Divided Lites**	***Not available*** with MDF and RTF Frame and Mullion doors.

Convex / Concave Options (Chapter D)

1	**Curved Products**	The C indicates door styles that are available Convex/Concave (curved). See ***Chapter D*** for more information.

Design Options (Chapter G)

1	**Radius Corners**	See ***Section G.13***.
2	**Center Panel Face Routing - CPFR**	Raw MDF Style 500/500* are the only One-Piece MDF door styles that can accept all CPFR.
		3D Laminate (RTF) Style 500/500* can accept the following CPFR patterns: **CPFR100, CPFR500, CPFR600, CPFR700, CPFR1900** and **CPFR2100**.

Finish Options (Chapter R)

1	**3D Laminate (RTF)**	When ordering MDF Drawer Fronts with 3D Laminate (RTF), the backs are available in White-W300 or Almond Melamine or matching 3D Laminate/RTF.
		The ★ indicates profiles that are available on products using 3D Laminate (RTF).
2	**Primed Only for Paint & SolidTone®**	See "Finishing Methods" for more information on pre-finishing MDF with "Primed Only for Paint" or "Solid Tone® Colors".

Functional Options (Chapter F)

1	**Hinge Boring**	Hinge boring is available for MDF 1-Piece / 3D Laminate (RTF) doors and drawer fronts. Please see ***Section F.1*** for additional hinge boring requirements, ordering instructions and compatibility.
2	**Finger Pulls**	**FP100, FP200, FP300, FP400, FP500** are available on all ¾" [19.1mm] or 1" [25.4mm] Raw MDF doors and drawer fronts.
		FP200 is ***not*** an option on ¾" [19.1mm] Raw MDF drawer front styles **300-32RP***, **301-25RP*** and **302-32RP***.
		FP500 is the only finger pull rout available with 3D Laminate (RTF) doors & drawer fronts.
3	**Lazy Susan Doors**	3D Laminate (RTF) mitered lazy susan doors will have the back corners clipped (using **MJ5**), see drawings on ***page F.6.2***.
		To facilitate the pressing operation, the mitered edges on the doors can not come to a sharp point.
		Lazy susan doors will come to you 1/16" [1.6mm] smaller in width than the size you order. When you assemble the pair, the size will be correct because you are matching up the inside corners.

Material Options

1	**MEDEX® NAUF - MDF, Raw**	1-Piece raw MDF doors & drawer fronts also available in moisture resistant MEDEX® NAUF - MDF, Raw. Upcharges will apply. Not available with 3D Laminate.

Miscellaneous

1	**Vertical Grain**	***Leather White Alligator*** and ***Peppered Crosswood*** have a distinct grain / pattern direction. When using these patterns, WalzCraft recommends vertical grain on drawer fronts when used in conjunction with vertical grain on the doors.

Notes continued on next page...

Technical Notes: MDF & 3D Laminate (RTF) Doors & Drawer Fronts...continued		
Profile Options (Chapter E)		
1	**"Passes"**	"Passes" refer to the number of CNC Router cycles required to complete a door. Complex doors require more "Passes".
2	**MDF Outside Edge Profiles**	• Most outside edge profiles shown in ***Section E.15 & E.16*** are available on MDF products. • Limitations apply for raised panel drawer fronts, see the compatibility chart on our website. • If ordering an applied molding outside edge on an MDF product, the applied molding will be made from a **Maple-Hard / Soft-Mixed Paint Grade** Wood Species.
3	**Varying Outside Edge Profiles**	**D7** can be used in combination with another outside edge to result in profiles that vary from side to side, on **Raw MDF *only***.
		D33 can be used in combination with another outside edge to result in profiles that vary from side to side, on **3D Laminate (RTF) Doors** to achieve a similar look.
4	**Applied Molding Outside Edge Options**	For solid wood applied molding outside edge options on raw MDF, please reference Notes, Applied Molding Outside Edge Profiles, ***Section E.16***.
5	**Raised Panel (RP) Style Drawer Front Profiles**	You must choose an RP **"Look"**, a Raised Panel Profile, and an Outside Edge Profile when ordering **RP** (Raised Panel) Drawer Fronts. The Raised Panel Profile # and the **"Look"** option define the Style # for your RP Drawer Front.
		See ***Section B.16*** for **RP** drawer front profiles. Raw MDF **RP** drawer fronts are available in all Drawer Front **"LOOKS".**
6	**PR40 Center Panel Profile**	Only available with 3D Laminate (RTF) material. • If looking for a raw MDF door with a flat panel "Look", please refer to ***Section B.3***. • Maximum size for products with a **PR40** Center Panel Profile is 18" x 36" [457.2mm x 914.4mm] or 36" x 18" [914.4mm x 457.2mm].
7	**PR41 Center Panel Profile**	Only available with 3D Laminate (RTF) material. • Available in the following door styles: **518, 520, 521, 531.** • If looking for a raw MDF door with a flat panel "Look", please refer to ***Section B.3***. • Maximum size for products with a **PR41** Center Panel Profile is 24" x 42" [609.6mm x 1066.8mm] or 42" x 24" [1066.8mm x 609.6mm].

Sizes / Dimensions		
1	**Maximum Sizes**	• The maximum size of a raw MDF product is 48"W x 96"H [1219.2mm x 2438.4mm]. • The maximum size of a 3D Laminate (RTF) product is 40"W x 90"H [1016mm x 2286mm].
		3D Laminate (RTF) products with a grain / pattern direction that exceed 40" [1016mm] in width, will be manufactured with a "horizontal" pattern due to maximum size limitations.
2	**Panel Opening**	• MDF & 3D Laminate (RTF) doors and drawer fronts are a one piece constructed product. If choosing a door style with a flat panel, the minimum panel opening size that can be accommodated would be 1" [25.4mm]. • The minimum panel opening size for a door style with a raised panel would be 1" [25.4mm] of flat on the face of the raised panel, plus the panel profile reveals.
3	**Stile & Rail**	The minimum ***width***, at the narrowest point, for any top/bottom rail with or without a "GRF" cut is 1¼" [31.8mm].
		The minimum ***width***, at the narrowest point, for any outside stile, center stile or center rail with or without a "GRF" cut is 1½" [38.1mm].
4	**Thicknesses**	• Raw MDF available in ¾" [19.1mm] and 1" [25.4mm] thicknesses. • Doors and drawer fronts with 3D Laminate (RTF) available in ¾" [19.1mm] thickness only.

► **For PRICING** ► *See Section V.1* in our current Wholesale Pricing Catalog.

Ordering & Pricing Notes: 3D Laminate Sheet Stock

Ordering Guidelines

1	**Order Forms**	Please use ***Sheet Goods Order Form (E•Z Form #8.2)*** and use part #89.

Pricing

1	**Pricing**	Please see ***Section V.1*** of our current **Wholesale Pricing Catalog**.

Technical Notes: 3D Laminate Sheet Stock

Finish Options (Chapter R)

1	**Colors / Patterns**	See chart above for available 3D Laminate Colors / Patterns.

Miscellaneous

1	**Cutting 3D Laminates**	When cutting 3D Laminate sheet stock, WalzCraft recommends using a laminate slitter, razor knife or table saw.

Material Options

1	**Material Availability**	3D Laminate (RTF) is available as a non-adhesive loose foil (no backer material), loose foil with a 3M PSA (peel & stick) back or as loose foil with a non-adhesive phenolic back.

Sheet Stock Options (Chapter K)

1	**Custom Pressing**	3D Laminate (RTF) is available custom pressed on ¼" thick through 1" thick MDF core or Combi-Core sheet stock. See *Custom Pressed* ***Section K.3***.

Notes Continued on Next Page...

Technical Notes: 3D Laminate Sheet Stock...Continued		
Sizes / Dimensions		
1	**Thickness**	3D Laminate thickness varies by color / pattern. See color / pattern availability chart.
		Phenolic material measures approximately .020" thick (does not include foil thickness).
2	**4' x 8' Sheet Sizes**	4'x8' sheets of **3D Laminate Loose Foil** will measure anywhere from 51" to 57" wide x 97" long, depending on the pattern.
		4'x8' panels are considered 95% "*free from defect*".
		All other 3D Laminate sheet stock products will start out as, or will be taken from, a 49" x 97" sheet.
		Some edges may need to be trimmed.
3	**RCSS - Rough Cut Stock Size**	A sheet that is only available in the following sizes: 4'x8', 2'x8', 4'x4', 2'x4'.
		Edges may need to be trimmed. Some sheets may be slightly oversized.
		Allow ⅛" per saw kerf.
4	**RTRW - Ripped to Rough Width**	Available in customer specified widths x 8' long only.
		Edges may need to be trimmed. Specified widths will not be oversized. Some lengths may be slightly oversized.
		Minimum width for 3D Laminate is ¾".
		Allow ⅛" per saw kerf.
5	**PCTS - Precision Cut to Size**	Available in customer specified widths and lengths (any size piece that the sheet will yield).
		No trimming of edges is needed. Pieces will not be oversized.
		Minimum width for 3D Laminate is ¾".
		Allow ⅛" per saw kerf.

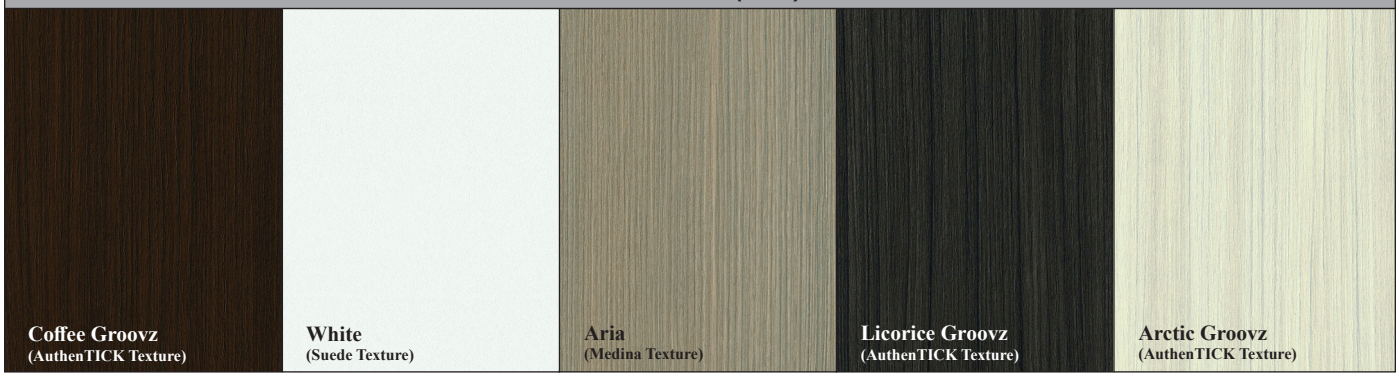
  - **Stile & Rail Profile Stock (9' Lengths Only)**

Decorative Laminate Veneer (DLV) Colors / Textures



Features of Decorative Laminate Veneer (DLV) Doors, Drawer Fronts & Accessories

Materials

Stile and Rail Profiles and Accessory Molding Profiles are manufactured using a premium grade of MDF. The MDF is profiled to tight tolerances, and then "wrapped" with Decorative Laminate Veneer (DLV) using precision Profile Wrapping Machines. Door center panels are 6mm thick Thermally Fused Melamine (TFM) that perfectly matches the Decorative Laminate Veneer. These are "prefinished" products that require no additional finishing.

Note: Other matching complimentary products exist within the industry, such as HPL, edgebanding, 3DL and other thicknesses of TFM. These products use the same names and numbers as noted in the chart below.

Decorative Laminate Veneer (DVL) / Prism Laminates Cross Reference					
DLV/Prism Color	Coffee Groovz	White	Aria	Licorice Groovz	Arctic Groovz
DLV/Prism Texture	AuthenTICK	Suede	Medina	AuthenTICK	AuthenTICK
Prism Number	WF395	W400	WF340	WF392	WF394
Please note that Prism was formerly Flakeboard.					

Construction

Doors and drawer fronts use mitered construction similar to that used for all WalzCraft solid wood doors and drawer fronts that utilize mitered construction. This ensures that the grain direction on all the parts of a 5-piece door are similar to the grain direction on a solid wood door. The combination of precisely wrapped stile and rail stock combined with WalzCraft's carefully monitored miter machining and assembly process produces joints of exceptional quality.

Quality Features of Decorative Laminate Veneer (DLV) Doors and Drawer Fronts

- **Construction:** Five-piece miter construction. Stiles & rails with perpendicular grain direction provide the overall look of a finished wood door.
- **Dimensional Stability:** Premium MDF means less expansion and contraction and doors stay flatter than wood doors.
- **Heat Resistance:** Great resistance to delamination up to 185° Fahrenheit.
- **Color Consistency:** Color consistency and fade resistance similar to melamine. Better color stability over time than solid wood doors.
- **Environment:** All components meet Carb2 standards for an environmentally friendly product.
- **Bacteria Resistance:** DLV products have an anti-microbial additive that is good for the life of the product.
- **Easy Care:** Clean with a non-abrasive detergent and a damp sponge or cloth.
- **Scratch Resistance:** Decorative Laminate Veneers are extremely scratch resistant.

Pricing

1	**Pricing**	Please see ***Section V.2*** of our current **Wholesale Pricing Catalog**.

Technical Notes: Decorative Laminate Veneer (DLV) Doors & Drawer Fronts

Cabinet Door & Drawer Front Options (Chapter B)

1	**Door Styles**	Available as **Style 41M** Flat Panel Mitered doors and **Style 41M*** Flat Panel Miter drawer fronts only.

Convex / Concave Options (Chapter D)

1	**Convex / Concave**	Decorative Laminate Veneer (DLV) doors and drawer fronts are not available convex/concave.

Dealer Aid Options (Chapter T)

1	**Promotional Items**	Stile & Rail Profile Sample Sets are available upon request and include one 6" length of the following profile/color combinations: **DLV4300-73/Coffee Groovz**, **DLV4346-57/White**, **DLV4546-76/Aria**, **DLV4459-57/Licorice Groovz** and **DLV4741-63/Arctic Groovz**. See ***Product Samples - Section T.2*** for more information. Use part **#184580**.

Design Options (Chapter G)

1	**Stile & Rail Profile Stock**	Stile & Rail Profile Stock is available with or without the GRF cut in 9' [2743.2mm] lengths only.
		9' [2743.2mm] lengths can only ship via Spee•Dee or common carrier.

Finish Options (Chapter R)

1	**Colors/Textures**	Available in the five colors shown at the beginning of this section. Each color is only available in the texture that it's noted with.
2	**Finish Options**	All Decorative Laminate Veneer products are prefinished. No additional finishing is needed.

Functional Options (Chapter F)

1	**Hinge Boring**	Decorative Laminate Veneer (DLV) doors and drawer fronts are only available with the 35mm hinge bore options (HBP100 - HBP500). Please see ***Section F.1*** for additional hinge boring requirements, ordering instructions and compatibility.
		Hinge boring is not available with 1½" [38.1mm] wide profiles.
2	**DLV4300-73 / DLV4346-57**	The -5.0mm Hinge boring drill distance is also available for these profiles.

Notes continued on next page...

Technical Notes: Decorative Laminate Veneer (DLV) Doors & Drawer Fronts...continued		
General Information (Chapter A)		
1	**Grain Direction**	Arrows (←→) shown throughout the catalog indicate standard grain direction. Grain direction may be specified at **NO** additional cost.
2	**Ready to Assemble (RTA)**	Ready to Assemble **(RTA)** is available as an option for DLV doors and drawer fronts. Assemble machined joints with wood glue.

Profile Options (Chapter E)		
1	**Stile & Rail Profiles**	Available in three stile & rail profiles of various widths and GRF options.

Sizes / Dimensions		
1	**Thickness**	Only available in the thicknesses indicated on the profile drawings.
2	**Stile & Rail Widths**	Stile & rail widths are fixed at the sizes indicated on the profile drawings.
3	**Minimum Door and Drawer Front Sizes per Stile & Rail Profile**	**DLV4300-73**: 7¼" x 7¼" [184.2mm x 184.2mm]
		DLV4346-57: 6" x 6" [152.4mm x 152.4mm]
		DLV4459-57: 6" x 6" [152.4mm x 152.4mm]
		DLV4546-76: 7½" x 7½" [190.5mm x 190.5mm]
		DLV4741-63: 6½" x 6½" [165.1mm x 165.1mm]
		DLV4856-38: 4½" x 4½" [114.3mm x 114.3mm]
		DLV4857-38: 4½ x 4½" [114.3mm x 114.3mm]
		DLV4858-38: 4½ x 4½" [114.3mm x 114.3mm]
4	**Maximum Size**	The maximum size for Style **41M** doors and drawer fronts is 48"W x 48"H [1219.2mm x 1219.2mm]. Please submit requests for dimensions over 48" to our Customer Support Team.

Dealer Aids (Chapter T)		
1	**Laminate Sample Chips**	A sample set of the six colors is available. See ***Product Samples - Section T.2*** for more information. • Use part **#186136**.
Finish Options (Chapter R)		
1	**Colors/Finishes**	Each stock color is only available in the finish that it's noted with.
Functional Options (Chapter F)		
1	**Hinge Boring**	Hinge boring is available for High Pressure Laminate doors & drawer fronts with a ¾" [19.1mm] finished thickness; please contact Customer Support to inquire about hinge bore options on doors & drawer fronts with a ⅝" [15.9mm] finished thickness. Please see ***Section F.1*** for additional hinge boring requirements, ordering instructions and compatibility.
2	**Finger Pulls**	Wood finger pulls are available. See ***Section F.8***.
Material Options		
1	**Core Material**	High Pressure Laminate (HPL) doors and drawer fronts will have an MDF core.
2	**Edgeband Material**	Matching PVC (**HPL-2**) ***or*** Laminate (**HPL-4**) edgebanding.
3	**HPL Manufacturer**	Formica (six colors kept in stock), Wilsonart, Nevamar, ***or*** another manufacturer of your choice.
Miscellaneous		
1	**Edgeband Grain Direction**	Choose from either **Lineal** grain direction or **Front to Back** grain direction for each edge. Limited to **HPL-4** only.
		Unless otherwise specified, WalzCraft's "standard" will be to apply the laminate edgebanding in a **Lineal** direction. **Front to Back** grain direction is limited to a maximum length of 48". See ***Section B.10*** for diagram.
Sizes / Dimensions		
1	**Thickness**	Available in finished thicknesses of **⅝"** (+ / - .015") or **¾"** (+ / - .015").
2	**Minimum Size**	Minimum part size is 3" x 3" [76.2mm x 76.2mm] with machine applied edgebanding. Smaller sizes may be edgebanded by hand, but additional charges may apply.

High Pressure Laminate (HPL) Sheet Stock					
HPL Name	**Brand**	**Color #**	**Thickness**	**Grade**	**Backing**
Natural Ash (Woodbrush Finish)	Formica	8843-WR	.027" [0.7mm]	Vertical	Phenolic
Weathered Ash (Woodbrush Finish)	Formica	8842-WR	.027" [0.7mm]	Vertical	Phenolic
Cardboard (Sculpted Finish)**	Formica	7813-SP	.035" [0.9mm]	Post Forming	Phenolic
Possum (Micro Dot Finish)	Formica	5343-MC	.027" [0.7mm]	Vertical	Phenolic
Wheat Strand (Matte Finish)	Formica	6212-58	.035" [0.9mm]	Post Forming	Phenolic
White (Matte Finish)	Formica	949-58	.027" [0.7mm]	Vertical	Phenolic
** = Standard grain direction for Cardboard with Sculpted Finish is horizontal. 4' x 8' sheets have the grain running with the 4' width.					

Ordering & Pricing Notes: High Pressure Laminate Sheet Stock		
Ordering Guidelines		
1	**Order Forms**	Please use ***Sheet Goods Order Form (E•Z Form #8.2)*** and part #185.
2	**Ordering Information**	Please provide our Customer Support Team with the below material and manufacturing options for your order or quote. • HPL manufacturer: Formica, Wilsonart, Nevamar, or another manufacturer of your choice. • HPL color name and number along with finish type (ex: Formica #6212-58, Wheat Strand-Matte Finish). ◦ If the HPL color has a pattern or grain, you will need to specify grain direction. ◦ Not available with metallic or high gloss laminate.
Pricing		
1	**Pricing**	See ***Section V.3*** of our current **Wholesale Pricing Catalog** for the six stock Formica colors shown. • For any other manufacturer, color or finish, please submit the ***Ordering Information*** referenced above to our Customer Support Team. A quote will be provided and your signature for approval to proceed will be required for all orders being processed.

Technical Notes: High Pressure Laminate Sheet Stock		
Dealer Aids (Chapter T)		
1	**Laminate Sample Chips**	A sample set of the six colors is available. See ***Product Samples - Section T.2*** for more information. • Use part **#186136**.
Finish Options (Chapter R)		
1	**Colors/Finishes**	Each stock color is only available in the finish that it's noted with.

Sheet Stock Options (Chapter K)			
1	**Laminate Sheets**	Laminate sheets with a non-adhesive phenolic back are available.	
		Rough Cut Stock Sizes (RCSS)	***Only*** available in the following sizes: 4'x8', 2'x8', 4'x4', 2'x4'.
		Ripped to Rough Width (RTRW)	Available in customer specified widths x 8' long only.
		Precision Cut to Size (PCTS)	Available in customer specified widths and lengths (any size piece that the sheet will yield).
2	**Custom Pressed**	Custom Pressed sheet stock is available using High Pressure Laminate (HPL). Please see ***Section K.3*** for more information.

Pricing

1	**Pricing**	Please see ***Section V.4*** of our current **Wholesale Pricing Catalog**.

Technical Notes: Melamine Sheet Stock

General Information (Chapter A)

1	**Shipping**	**PM18** (U-Channel Box) will be WalzCraft's preferred method of packaging sheet stock ⅛" thick or greater, unless otherwise specified.

Material Options

1	**NAUF**	No Added Urea Formaldehyde.
2	**TSCA Title VI**	All melamine listed above is compliant with **TSCA Title VI** standards related to formaldehyde emissions in composite wood products.

Sheet Stock Options (Chapter K)

1	**Edgebanding**	Please see ***Section L.1 - Basic Cabinet Box Components*** for edgebanding sheet stock parts.

Sizes / Dimensions

1	**4 x 8 Sheet Sizes**	4'x8' panels are considered 95% "*free from defect*". Actual sheet size is 49" x 97".
2	**RCSS - Rough Cut Stock Size**	A sheet that is only available in the following sizes: 4'x8', 2'x8', 4'x4', 2'x4'.
		Edges may need to be trimmed. Some sheets may be slightly oversized.
		Allow ⅛" per saw kerf.
3	**RTRW - Ripped to Rough Width**	Available in customer specified widths x 8' long only.
		Edges may need to be trimmed. Specified widths will not be oversized. Some lengths may be slightly oversized.
		Minimum width for Melamine sheet stock is ¾".
		Allow ⅛" per saw kerf.
4	**PCTS - Precision Cut to Size**	Available in customer specified widths and lengths (any size piece that the sheet will yield).
		No trimming of edges is needed. Pieces will not be oversized.
		Minimum width for Melamine sheet stock is ¾".
		Allow ⅛" per saw kerf.
