Ordering & Pricing Notes: "Traditional" Mortise & Tenon Raised Panel Door and Drawer Fronts

Ordering Guidelines

1	Order Forms	Please use <i>Door and/or Drawer Front Order Forms (E•Z Forms #2 and #3)</i> .
Pricing		
1	Pricing	Please see <i>Section B.1</i> of our current Wholesale Pricing Catalog .

Technical Notes: "Traditional" Mortise & Tenon Raised Panel Door and Drawer Fronts

Cabinet Door & Drawer Front Options (Chapter B)

1	Frame & Mullion Doors	Glass openings are routed to follow the contour of the shape for Styles 1020, 1055, 1060, 1065, 1070, 1075, 1080, 1090, 2011L, 2011R, 2021L, 2021R, 2077L, 2077R, 2100L, 2100R, 2121L, 2121R, 2156, 2187, 2231L, 2231R, 2232L, 2232R, 2234, 2235, 2284L, 2284R, 2287 (Center rail only), 2289L, 2289R, 2416, 2418, 2498L, 2498R, 2501L, 2501R, 2563L, 2563R, 2631L, 2631R, 2834, 2928, 3056L, 3056R . For pricing, please see <i>Section B.12</i> of our current Wholesale Pricing Catalog .
2	Style 1026*	Only available as a drawer front.
		Only available in solid wood and raw MDF (not available in a hybrid species).
		Maximum height is 12" [304.8mm]. Heights up to 6" [152.4mm] will be constructed without glue-ups whenever possible.
3	Style 2021L, 2021R	Available with the SR100 stile & rail profile from <i>Section E.1</i> or any Mirror Joint stile & rail profile from <i>Section E.2</i> . • When paired with any stile & rail door (ex: Style 10, Style 40, etc.), the door must utilize the same stile & rail profile and have the same width stiles as the 1026* drawer front.
		Minimum radius = 2" [50.8mm]. The radius will equal 90 degrees of an arc on the outside edge.
		The horizontal dimension of the curved stile (as shown in the illustration) equals the radius. <i>These door style illustrations depict a 14" x 18" [355.6mm x 457.2mm] door with a curved stile radius of 5" [127mm].</i>
		The vertical dimension of the curved stile (as shown in the illustration) equals the radius plus the width of the top rail. <i>Based on the 14" x 18" [355.6mm x 457.2mm] door size illustrated along with the 5" [127mm] radius, this dimension would be 7¼" [184.2mm].</i>
4	Style 2156	When ordering, please provide the overall width and height of the door and note the horizontal dimension (radius) in the Special Instructions column on the order form.
		A CAD drawing must be approved prior to manufacturing the product.
		Width cannot be greater than the height. • Minimum visual opening width for center circle is 7¼" [184.2mm].
		Minimum height must be 2 times the width minus 4" [101.6mm].
		Available with all "Traditional" and Old World "Traditional" stile and rail profiles.
		The center panel is ⅝" [15.9mm] thick and is flush to the stiles & rails on the face and recessed ⅛" [3.2mm] from the back.
5	Style 2231L, 2231R	When ordered in a rustic or ultra-rustic grade, the center rail / circle will not have large knots. It may contain small knots or possibly, no knots at all. WalzCraft will try to maintain a rustic grade look utilizing other characteristics. See <i>Section S.1</i> for more information on rustic and ultra rustic grades.
		A CAD drawing must be approved prior to manufacturing the product.
		Please provide overall width (W) and height (H).
6	Style 2232L, 2232R, 2234	Angles will vary as dimensions vary.
		A CAD drawing must be approved prior to manufacturing the product.
		Please provide overall width (W) and height (H), as well as the secondary width (W2) at the top of door.
7	Style 2235	Angles will vary as dimensions vary.
		A CAD drawing must be approved prior to manufacturing the product.
		Center stile will be centered on width (50/50 split), unless otherwise noted.
8	Style 2284L, 2284R	A CAD drawing must be approved prior to manufacturing the product.
		Please provide overall width (W) and height (H), as well as the secondary height (H2) along the side of door.
		Angles will vary as dimensions vary.

Technical Notes: "Traditional" Mortise & Tenon Raised Panel Door and Drawer Fronts...continued

Cabinet Door & Drawer Front Options (Chapter B)...continued

9	Style 2289L, 2289R	Please provide overall width (W) and height (H), as well as the secondary width (W2) at the top of door and the secondary height (H2) at the side of the door.
		Angle will vary as dimensions vary.
		Center rail is shown at its highest point, which is also its standard placement, unless otherwise noted.
		A CAD drawing must be approved prior to manufacturing the product.
10	Style 2631L, 2631R	Please provide overall width (W) and height (H), as well as the secondary width (W2) at the top of door and the secondary height (H2) at the side of the door.
		Angle will vary as dimensions vary.
		A CAD drawing must be approved prior to manufacturing the product.
11	Style 2928	Overall width of door and stile & rail width will determine size of interior diamond.
		Sides of interior diamond will remain equal in length to one another.
		Angles are fixed at 45°.
		A CAD drawing must be approved prior to manufacturing the product.
12	Style 3056L & 3056R	Minimum radius = 2" [50.8mm]. The radius will equal 90 degrees of an arc on the outside edge.
		The horizontal dimension of the curved rail (as shown in the illustration) equals the radius. <i>These door style illustrations depict a 14" x 18" [355.6mm x 457.2mm] door with a curved stile radius of 5" [127mm].</i>
		The vertical dimension of the curved rail (as shown in the illustration) equals the radius. <i>These door style illustrations depict a 14" x 18" [355.6mm x 457.2mm] door with a curved stile radius of 5" [127mm].</i>
		When ordering, please provide the overall width and height of the door and note the horizontal dimension (radius) in the Special Instructions column on the order form.
		A CAD drawing must be approved prior to manufacturing the product.
13	Style 34DT*	Only available as a drawer front.
		Simulates the look of a dovetail drawer box. Dovetail size may vary as the height changes.
		Only available in solid wood (not available in raw MDF or in a hybrid species).
		Heights up to 6" [152.4mm] will be constructed without glue-ups whenever possible.
		Only available with a D7 outside edge profile.
		For 1" [25.4mm] thickness, order as a Style 100DT* .
14	Style 8060	Style 8060 is constructed with alternating 40/60 splits.
15	Style 8160	Style 8160 is constructed with a 50/50 split in both the width and height.

Convex/Concave Options (Chapter D)

1	Available Products	The <input type="checkbox"/> indicates door styles that are available convex/concave (curved). See Chapter D for more information.
2	5-Piece MDF, Raw & MDF - MR, NAF, Raw	Not available convex/concave.

Design Options (Chapter G)

1	5-Piece MDF, Raw & MDF - MR, NAF, Raw	Not available with Simulated or Renaissance Distressing.
---	---------------------------------------	--

Finish Options (Chapter R)

1	5-Piece MDF, Raw & MDF - MR, NAF, Raw	See "Finishing Methods" for information on MDF with "Primed Only for Paint" or "SolidTone® Colors".
		Not available with 3D Laminate (RTF).
		Rub Through Options RBT100 and RBT200 are not available.

Technical Notes: “Traditional” Mortise & Tenon Raised Panel Door and Drawer Fronts...continued

Functional Options (Chapter F)

1	Finger Pulls	Available with FP100, FP200, FP400 and FP500 from <i>Section F.7</i> .
		Please see the Outside Edge Profile Compatibility chart on our website: Resources/Technical Information .
2	Hinge Boring	Hinge boring is available for all “Traditional” Mortise & Tenon - Raised Panel doors and drawer fronts. Please see <i>Section F.1</i> for additional hinge boring requirements, ordering instructions and compatibility.

General Information (Chapter A)

1	Grain Direction	Arrows (←→) shown indicate standard grain direction. Grain direction may be specified at NO additional cost.
		<p><i>Corner blocks</i> on all applicable door styles (ex: Style 1080) will have a standard <i>horizontal</i> grain direction.</p> 
2	Ready to Assemble	Traditional mortise & tenon raised panel doors and drawer fronts are available Ready to Assemble (RTA).
3	Center Rail Placement	Custom center rail placement may be specified and refers to the distance from the top of the top rail to the top of the center rail for most door styles (<i>see below for exceptions</i>).
		Styles 2156, 2424, 2171, 2416, 2456, 2928: For custom rail placement, measure from the top of the door to the center of the center rail.
		Styles 2563L, 2563R: For custom rail placement, measure from the top of the door to the center of the center rail at its highest point.
		Style 2287: For custom rail placement, measure from the top of the door to the bottom of the center rail at its lowest point.
		See Center Rail Placement in <i>Section A.4</i> for more information.
4	Stile & Rail Dimensions	Standard stile and rail dimensions are 2¼" [57.2mm] wide. Non-standard part sizes may be ordered, however, additional up-charges may apply. See <i>Section A.5</i> for more information.

Material Options

1	Materials Available	Available in all of the species/grades noted in <i>Section B.1</i> of our current Wholesale Pricing Catalog . See individual door style notes for exceptions.
2	5-Piece MDF, Raw & MDF - MR, NAF, Raw	The following “Traditional” mortise & tenon raised panel door styles are available in standard 5-Piece MDF, Raw or MDF - MR (Moisture Resistant), NAF, Raw: 10, 10*, 1000, 1010, 1010*, 1800, 1800*, 1801, 1801*, 1941, 2231L, 2231R, 2232L, 2232R, 2234, 2235, 2271, 2272, 2284L, 2284R, 2289L, 2289R, 2291L, 2291R, 2427, 2433, 2465, 2631L, 2631R, 8000, 8010, 8020, 8030, 8045, 8050, 8060L, 8060R, 8160, 8170 . See MDF-Raw in price grid for square foot pricing.
3	MDF - MR, NAF, Raw	Hybrid/MDF species of raised panel doors and drawer fronts are also available with MDF - MR (Moisture Resistant), NAF, Raw. <ul style="list-style-type: none"> • Available with raised and recessed raised panel profiles that finish at ⅜" and ¾" thick (<i>Section E.12, E.14</i>). • Available with the RVSCP-PR324 reverse solid center panel profile (<i>Section E.13</i>).
4	Door Style 2156/Raw MDF Center Rail	When ordering door style 2156 in Hybrid/MDF (solid wood stiles & rails with raw MDF center panel), the center rail/circle will be made from raw MDF for SolidTone® or Primed Only for Paint applications.

Molding Options (Chapter N)

1	Applied Moldings on MDF	When an applied molding is added to an MDF product, the molding will be made from Maple - Hard/Soft Mixed Value/Budget/Paint Grade.
---	-------------------------	---

Profile Options (Chapter E)

1	5-Piece MDF, Raw & MDF - MR, NAF, Raw	Stile & Rail Profiles: All “Traditional” stile & rail profile options shown in <i>Section E.1</i> are available.
		Center Panel Profiles = All center panel profile options shown in <i>Section E.12</i> are available.
		Outside Edge Profiles = All outside edge profile options shown in <i>Section E.15 & E.16</i> are available.
2	Door Styles 25, 2550, 2727, 2826	When adding an applied molding to the stiles and rails of these door styles, the molding for the arched rails will be made from two pieces, so as to have a miter joint at the peak of the arch.

 Outside Radius

Quarter Circle Radius Explanation

The difference between Outside & Inside Radius

All *Outside Radius* doors feature a radius that is measured from the outside edge of the door stile.

To Calculate Radius Center Point:
From door width

Measure down from the top of the door and mark the radius center point on the outside edge of the stile.

All *Inside Radius* doors feature a radius that is measured from the inside edge of the door stile.

To Calculate Radius Center Point:
Door width minus the Stile Width: 2¼" [57.2mm].

Measure down from the top of the door and mark the radius center point on the inside edge of the stile.

Technical Notes: Quarter & Half Circle Doors - Raised Panel

Cabinet Door & Drawer Front Options (Chapter B)

1	Frame & Mullion Doors	Glass openings are routed to follow the contour of the shape for Styles 995L, 995R, 996L, 996R, 997L, 997R, 1990, 1996, 2431L, 2431R, 2902, 2903, 2960, 2962, 2964, 2966 . For pricing, please see <i>Section B.12</i> of our current Wholesale Pricing Catalog .
2	Radius Explanation	See beginning of this section (<i>B.2</i>) for an explanation of Inside and Outside radius door measurements.
3	Styles 2902, 2966	Available with all "Traditional" and Old World "Traditional" Stile and Rail profiles.
		Available with all Outside Edge Profiles. A CAD drawing must be approved prior to manufacturing the product.
4	Style 2903, 2964	Available with all "Traditional" and Old World "Traditional" Stile and Rail profiles.
		Only available with the following Outside Edge Profiles: D7, D12, D15, D17, D18, D21, D24, D32, D41, D52, D67, D93, D101, D102, D115, D118, D120 .
		A CAD drawing must be approved prior to manufacturing the product.
5	Center Rail Placement	Center rail placement must be specified and refers to the distance from the top of the top rail to the top of the center rail for most door styles. See Center Rail Placement in <i>Section A.4</i> for more information.

Functional Options (Chapter F)

1	Hinge Boring	Hinge boring is available for all Quarter & Half Circle - Raised Panel doors. Please see <i>Section F.1</i> for additional hinge boring requirements, ordering instructions and compatibility.
---	--------------	--

General Information (Chapter A)

1	Ready to Assemble (RTA)	RTA is <i>not</i> available as an option.
---	-------------------------	---

Material Options

1	MDF - MR, NAF, Raw	Hybrid /MDF species of raised panel doors and drawer fronts are also available with MDF - MR (Moisture Resistant), NAF, Raw. <ul style="list-style-type: none"> • Available with raised and recessed raised panel profiles that finish at 3/8" and 3/4" thick (<i>Section E.12, E.14</i>). • Available with the RVSCP-PR324 reverse solid center panel profile (<i>Section E.13</i>).
---	--------------------	---

Profile Options (Chapter E)

1	Stile & Rail Profile Options	Compatible with all "Traditional" and "Old World" stile and rail profiles (excluding Mirror Joints).
2	Style 2902, 2903, 2964, 2966	Only available with the RVSCP-PR324 reverse solid center panel profile (<i>Section E.13</i>).

Sizes/Dimensions

1	Door Widths	Styles 995L/R, 996L/R, 997L/R, 1990, 1996, 2431L/R, 2960 and 2962 widths can only be ordered in 1/4" [6.4mm] increments.
		Styles 2902, 2903, 2964 and 2966 are available from 12" [304.8mm] to 24" [609.6mm] wide in 1" [25.4mm] increments only.
2	Outside Radius	Style 995L, 995R, 996L, 996R : The height must be at least 2 1/4" [57.2mm] greater than the width. Style 2431L, 2431R : The height must be at least two times the width of the door.
3	Inside Radius	Height must be equal to or greater than the width.
4	Half Circle Doors	Width must be less than or equal to the door height, less the width of the (bottom rail x 2).
		Height must be greater than or equal to 1/2 of the door width, plus the width of the bottom rail and center rail (if applicable).
5	Stile & Rail Widths	Stiles and rails are available in 2 1/4" [57.2mm] and 3" [76.2mm] widths. Please submit requests for other widths to our Customer Support Team as additional charges may apply.
6	Thicknesses	When using Traditional stile and rail profiles, Quarter Circle and Half Circle raised panel doors made from solid wood are available 3/4" [19.3mm] and 1" [25.4mm] thick.
		When using Old World stile and rail profiles, Quarter Circle and Half Circle raised panel doors made from solid wood are available 1" [25.4mm], 1 1/8" [28.6mm] and 1 1/4" [31.8mm] thick.
		See <i>Section S.3</i> for possible thickness restrictions based on wood species.

Quarter & Half Circle Raised Panel Doors - END

Gothic Doors - Raised Panel

Style: 9100
 PC: 905
 Frame: PC905 x 0.6
 Min. Size: 10x11
 [254mm x 279.4mm]

Style: 9200
 PC: 906
 Frame: PC906 x 0.6
 Min. Size: 10x11
 [254mm x 279.4mm]

Ordering & Pricing Notes: Gothic Doors - Raised Panel

Ordering Guidelines

1	Order Forms	Please use <i>Door Order Form (E•Z Form #2)</i> .
Pricing		
1	Pricing	Please see <i>Section B.2</i> of our current Wholesale Pricing Catalog .

Technical Notes: Gothic Doors - Raised Panel

Cabinet Door & Drawer Front Options (Chapter B)

1	Frame & Mullion Doors	Glass openings will be routed to follow the contour of the shape for Styles 9100 and 9200 . For pricing, please see <i>Section B.12</i> of our current Wholesale Pricing Catalog .
---	-----------------------	---

Functional Options (Chapter F)

1	Hinge Boring	Hinge boring is available for all Gothic - Raised Panel doors. Please see <i>Section F.1</i> for additional hinge boring requirements, ordering instructions and compatibility.
---	--------------	---

Profile Options (Chapter E)

1	Stile & Rail Profile Options	Compatible with all “Traditional” and “Old World” stile and rail profiles (excluding Mirror Joints). Mitered Stile and Rail profiles are <u>not</u> an option for Gothic doors.
---	------------------------------	--

Sizes/Dimensions

1	Minimum Height	Minimum height equals door width plus 1" [25.4mm].
2	Absolute Minimum Width	The absolute minimum width for a raised panel Gothic door is 10" [254.0mm].
3	Top Rail Width	In order to maintain the “look” and shape of the Gothic arch, the width of the top rail at the peak of the arch will vary slightly from the width of the remaining stiles and rail. This dimension will also fluctuate based on the overall width of the door. If needing to specify this dimension, please submit your request to our Customer Support Team.
4	Thicknesses	When using Traditional stile and rail profiles, Gothic raised panel doors made from solid wood are available ¾" [19.3mm] and 1" [25.4mm] thick.
		When using Old World stile and rail profiles, Gothic raised panel doors made from solid wood are available 1" [25.4mm], 1¼" [28.6mm] and 1½" [31.8mm] thick.
See <i>Section S.3</i> for possible thickness restrictions based on wood species.

Cabinet Door & Drawer Front Options

B

Ordering & Pricing Notes: “Traditional” Mortise & Tenon - 1/4" Flat Panel Doors and Drawer Fronts

Ordering Guidelines

1	Order Forms	Please use Door and/or Drawer Front Order Forms (E•Z Forms #2 and #3) .
		When placing an order for a 1/4" Flat Panel door, please indicate the word “Flat” in the space provided for the panel profile on the order form.

Profile Info

Stile & Rail or Miter Profile **SR107**

Panel Profile **Flat**

Outside Edge Profile **D17**

Pricing		
1	Pricing	Please see Section B.3 of our current Wholesale Pricing Catalog.

Technical Notes: “Traditional” Mortise & Tenon - 1/4" Flat Panel Doors and Drawer Fronts

Cabinet Door & Drawer Front Options (Chapter B)

1	1/4" Flat Panel Doors and Drawers Fronts	1/4" Flat Panel doors are available with 1/4" veneered or MDF center panels.
		To simulate the “look” of a “Flat Panel” door or drawer front, in a solid wood species, please order using a solid wood raised panel door style with the RVSCP-PR324 center panel profile. See Section B.1 for Raised Panel Door & Drawer Front Styles and Section E.13 for the RVSCP-PR324 center panel profile. For pricing, please see Section B.1 of our current Wholesale Pricing Catalog.
2	Frame and Mullion Doors	Glass openings are routed to follow the contour of the shape for Styles 2012L, 2012R, 2072L, 2072R, 2413, 2414, 2415, 2417, 2419, 2499L, 2499R, 2502L, 2502R, 2562L, 2562R, 2632L, 2632R, 2829, 2929, 3021L, 3021R, 3057L, 3057R, 3100L, 3100R, 3131L, 3131R, 3156, 3187, 3231L, 3231R, 3232L, 3232R, 3234, 3235, 3284L, 3284R, 3287 (Center rail only), 3289L, 3289R, 4010, 4060, 4070, 4080, 4090 . For pricing, please see Section B.12 of our current Wholesale Pricing Catalog.
3	Style 1026*	Only available as a drawer front.
		Only available in solid wood and raw MDF (not available in a hybrid species).
		Maximum height is 12" [304.8mm]. Heights up to 6" [152.4mm] will be constructed without glue-ups whenever possible.
4	Style 2632L, 2632R	Available with the SR100 stile & rail profile from Section E.1 or any Mirror Joint stile & rail profile from Section E.2 .
		• When paired with any stile & rail door (ex: Style 10, Style 40, etc.), the door must utilize the same stile & rail profile and have the same width stiles as the 1026* drawer front.
4	Style 2632L, 2632R	Please provide overall width (W) and height (H), as well as the secondary width (W2) at the top of door and the secondary height (H2) at the side of the door.
		Angle will vary as dimensions vary. A CAD drawing must be approved prior to manufacturing the product.
5	Style 2929	Overall width of door and stile & rail width will determine size of interior diamond.
		Sides of interior diamond will remain equal in length to one another.
		Angles are fixed at 45°. A CAD drawing must be approved prior to manufacturing the product.
6	Style 3021L & 3021R	Minimum radius = 2" [50.8mm]. The radius will equal 90 degrees of an arc on the outside edge.
		The horizontal dimension of the curved stile (as shown in the illustration) equals the radius. <i>These door style illustrations depict a 14" x 18" [355.6mm x 457.2mm] door with a curved stile radius of 5" [127mm].</i>
		The vertical dimension of the curved stile (as shown in the illustration) equals the radius plus the width of the top rail. <i>Based on the 14" x 18" [355.6mm x 457.2mm] door size illustrated along with the 5" [127mm] radius, this dimension would be 7 1/4" [184.2mm].</i>
		When ordering, please provide the overall width and height of the door and note the horizontal dimension (radius) in the Special Instructions column on the order form. A CAD drawing must be approved prior to manufacturing the product.

Technical Notes: “Traditional” Mortise & Tenon - ¼" Flat Panel Doors and Drawer Fronts ...continued

Cabinet Door & Drawer Front Options (Chapter B)...continued

7	Style 3057L & 3057R	Minimum radius = 2" [50.8mm]. The radius will equal 90 degrees of an arc on the outside edge.
		The horizontal dimension of the curved rail (as shown in the illustration) equals the radius. <i>These door style illustrations depict a 14" x 18" [355.6mm x 457.2mm] door with a curved stile radius of 5" [127mm].</i>
		The vertical dimension of the curved rail (as shown in the illustration) equals the radius. <i>These door style illustrations depict a 14" x 18" [355.6mm x 457.2mm] door with a curved stile radius of 5" [127mm].</i>
		When ordering, please provide us with the overall width and height of the door and note the horizontal dimension (radius) in the Special Instructions column on the order form. A CAD drawing must be approved prior to manufacturing the product.
8	Style 3156	Width cannot be greater than the height. • Minimum visual opening width for center circle is 7¼" [184.2mm].
		Minimum height must be 2 times the width minus 4" [101.6mm].
		Available with all “Traditional” and Old World “Traditional” Stile and Rail profiles. When ordered in a rustic or ultra rustic grade, the center rail / circle will not have large knots. It may contain small knots or possibly, no knots at all. WalzCraft will try to maintain a rustic grade look utilizing other characteristics. See Section S.I for more information on rustic and ultra rustic grades. A CAD drawing must be approved prior to manufacturing the product.
9	Style 3231L, 3231R	Please provide overall width (W) and height (H).
		Angles will vary as dimensions vary. A CAD drawing must be approved prior to manufacturing the product.
10	Style 3232L, 3232R, & 3234	Please provide overall width (W) and height (H), as well as the secondary width (W2) at the top of door.
		Angles will vary as dimensions vary. A CAD drawing must be approved prior to manufacturing the product.
11	Style 3235	Please provide overall width (W) and height (H), as well as the secondary width (W2) at the top of door.
		Angles will vary as dimensions vary. Center stile will be centered on width (50/50 split), unless otherwise noted. A CAD drawing must be approved prior to manufacturing the product.
12	Style 3284L, 3284R	Please provide overall width (W) and height (H), as well as the secondary height (H2) along the side of door.
		Angles will vary as dimensions vary. A CAD drawing must be approved prior to manufacturing the product.
13	Style 3289L, 3289R	Please provide overall width (W) and height (H), as well as the secondary width (W2) at the top of door and the secondary height (H2) at the side of the door.
		Angle will vary as dimensions vary. Center rail is shown at its highest point, which is also its standard placement, unless otherwise noted. A CAD drawing must be approved prior to manufacturing the product.
14	Style 34DT*	Only available as a drawer front.
		Simulates the look of a dovetail drawer box. Dovetail size may vary as the height changes.
		Only available in solid wood (not available in raw MDF or in a hybrid species). Heights up to 6" [152.4mm] will be constructed without glue-ups whenever possible.
		Only available with a D7 outside edge profile. For 1" [25.4mm] thickness, order as a Style 100DT* .
15	Style 3139, 4050 & 4055	If ordered below 10½ [266.7mm] wide, the corner blocks will be reduced to accommodate the width, based on 2¼" [57.2mm] stiles & rails.
		Can only be ordered with the SR100 stile and rail profile.
		Not available with the RVSCP-PR324 reverse solid center panel profile.

Convex/Concave Options (Chapter D)

1	Available Products	The ☐ indicates door styles that are available Convex/Concave (curved). See Chapter D for more information.
2	5-Piece MDF, Raw / MDF - MR, NAF, Raw	Not available Convex/Concave.

Continued on next page...

► For PRICING ► See Section B.3 in our current Wholesale Pricing Catalog.

Technical Notes: “Traditional” Mortise & Tenon - 1/4" Flat Panel Doors and Drawer Fronts ...continued

Design Options (Chapter G)

1	5-Piece MDF, Raw / MDF - MR, NAF, Raw	Not available with Simulated Distressing.
---	--	---

Finish Options (Chapter R)

1	5-Piece MDF, Raw / MDF - MR, NAF, Raw	See “Finishing Methods” for more information on pre-finishing MDF with “Primed Only for Paint” or “SolidTone® Colors”.
		Not available with 3D Laminate (RTF).
		Rub Through options RBT100 and RBT200 are not available.

Functional Options (Chapter F)

1	Hinge Boring	Hinge boring is available for all "Traditional" Mortise & Tenon - 1/4" Flat Panel doors and drawer fronts. Please see Section F.1 for additional hinge boring requirements, ordering instructions and compatibility.
---	--------------	---

General Information (Chapter A)

1	Grain Direction	Arrows (↔) shown throughout the catalog indicate standard grain direction. Grain direction may be specified at NO additional cost.
		<p>Corner blocks on all applicable door styles (ex: Style 4080) will have a standard <i>horizontal</i> grain direction.</p> 
2	Ready to Assemble (RTA)	RTA is available as an option.
3	Center Rail Placement	Custom center rail placement may be specified and refers to the distance from the top of the top rail to the top of the center rail for most door styles (<i>see below for exceptions</i>).
		Styles 2417, 2929, 3156, 3171, 3434, 3456: For custom rail placement, measure from the top of the door to the center of the center rail.
		Styles 2562L, 2562R: For custom rail placement, measure from the top of the door to the center of the center rail at its highest point.
		Style 3287: For custom rail placement, measure from the top of the door to the bottom of the center rail at its lowest point. See Center Rail Placement in Section A.4 for more information.
4	Stile & Rail Dimensions	Standard stile and rail dimensions are 2 1/4" [57.2mm] wide. Non-standard part sizes may be ordered, however, additional up-charges may apply. See Section A.5 for more information.

Material Options

1	Core Material	Veneered flat panel doors are constructed using a 1/4" [6.4mm] “A” face grade veneer with an MDF Core.
2	Materials Available	Available in all of the species /grades noted in Section B.3 of our current Wholesale Pricing Catalog . See individual door style notes for exceptions.
3	5-Piece MDF, Raw	The following “Traditional” mortise & tenon flat panel door styles are available in standard 5-Piece MDF, Raw or MDF - MR (Moisture Resistant), NAF, Raw: 40, 40*, 1400, 1400*, 1401, 1401*, 2428, 2434, 2632L, 2632R, 3010, 3060L, 3060R, 3160, 3170, 3231L, 3231R, 3232L, 3232R, 3234, 3235, 3271, 3272, 3284L, 3284R, 3289L, 3289R, 3291L, 3291R, 3465, 4020, 4030, 4040, 4040*, 4041, 4043, 4044, 4045, 4150 . See MDF-Raw in price grid for square foot pricing.
4	MDF - MR, NAF, Raw	Hybrid/MDF species of flat panel doors and drawer fronts are also available with MDF - MR (Moisture Resistant), NAF, Raw.
5	Door Style 3156/Raw MDF Center Rail	When ordering door style 3156 in Hybrid/MDF (solid wood stiles & rails with raw MDF center panel), the center rail/ circle will be made from raw MDF for SolidTone® or Primed Only for Paint applications.

Molding Options (Chapter N)

1	Applied Moldings on MDF	When an applied molding is added to an MDF product, the molding will be made from Maple-Hard/Soft Mixed-Value / Budget/Paint Grade.
---	-------------------------	---

Continued on next page...

► For PRICING ► See Section B.3 in our current Wholesale Pricing Catalog.

Technical Notes: "Traditional" Mortise & Tenon - 1/4" Flat Panel Doors and Drawer Fronts ...continued

Profile Options (Chapter E)

1	5-Piece MDF, Raw	Stile & Rail Profiles: All "Traditional" Stile & Rail Profile options shown in <i>Section E.1</i> are available.
		Center Panel Options: 1/4" MDF center panel.
		Outside Edge Profiles: All Outside Edge Profile options shown in <i>Section E.15 & E.16</i> are available.
2	Door Styles 31, 2435, 2827	When adding an applied molding to the stiles and rails of these door styles, the molding for the arched rails will be made from two pieces, so as to have a miter joint at the peak of the arch.

Sizes/Dimensions

1	Minimum W x H	Use the dimensions noted below the image of your chosen door style on the preceding pages.
2	Thicknesses	When using Traditional stile and rail profiles, Traditional Mortise & Tenon 1/4" flat panel doors and DFs made from solid wood are available 3/4" [19.3mm] and 1" [25.4mm] thick.
		When using Old World stile and rail profiles, Traditional Mortise & Tenon 1/4" flat panel doors and DFs made from solid wood are available 1" [25.4mm], 1 1/8" [28.6mm] and 1 1/4" [31.8mm] thick.
		See <i>Section S.3</i> for possible thickness restrictions based on wood species.
		Traditional (5-Piece) Mortise & Tenon 1/4" flat panel doors and DFs made from MDF, Raw are available 3/4" [19.1mm] and 1" [25.4mm] thick.
		Traditional (5-Piece) Mortise & Tenon raised panel doors and DFs made from MDF - MR, NAF, Raw are only available 3/4" [19.1mm] thick.
3	5-Piece MDF Maximum Size	Old World (5-Piece) Mortise & Tenon raised panel doors and DFs made from MDF, Raw are only available 1" [25.4mm] thick.
		The maximum size for a 5-Piece raw MDF door will be 48" x 96" [1219.2mm x 2438.4mm] or 96" x 48" [2438.4mm x 1219.2mm].
4	Maximum Center Panel Size Limitation	Given the 1/4" [6.4mm] veneered flat panel material used for center panels is 48"W x 96"H [1219.2mm x 2438.4mm], the maximum visible center panel width in a door with vertical grain and no center stile is 47 1/8" [1197mm]; the maximum visible center panel height with no center rail is 95 1/8" [2416.2mm].
5	Maximum Width for Doors with Shaped Rails	The maximum width for a WalzCraft standard door with a shaped rail or rails is 30" [762.0mm] - (based on 2 1/4" [57.2mm] wide stiles). <ul style="list-style-type: none"> • Please submit requests for doors with shaped rails over 30" wide to our Customer Support Team, as additional charges may apply. • This does not include doors made with corner blocks (Price Classes 207, 211, 214, 221, 224, 228, 229).

Outside Radius

Quarter Circle Radius Explanation
The difference between Outside & Inside Radius

All *Outside Radius* doors feature a radius that is measured from the outside edge of the door stile.

To Calculate Radius Center Point:
From door width

Measure down from the top of the door and mark the radius center point on the outside edge of the stile.

All *Inside Radius* doors feature a radius that is measured from the inside edge of the door stile.

To Calculate Radius Center Point:
Door width minus the Stile Width: 2 1/4" [57.2mm].

Measure down from the top of the door and mark the radius center point on the inside edge of the stile.

Style: 897L

PC: 951
Frame: PC905 x 0.6

Cabinet Door & Drawer Front Options (Chapter B)

1	Frame & Mullion Doors	Glass openings are routed to follow the contour of the shape for Styles 895L, 895R, 896L, 896R, 897L, 897R, 1890, 1896, 2432L, 2432R, 2961, 2963, 2965, 2967, 3020, 3022 . For pricing, please see <i>Section B.12</i> of our current Wholesale Pricing Catalog .
2	Radius Explanation	See beginning of this section (<i>B.4</i>) for an explanation of Inside and Outside radius door measurements.
3	Styles 3022, 2967	Available with all "Traditional" and Old World "Traditional" Stile and Rail profiles.
		Available with all Outside Edge Profiles. A CAD drawing must be approved prior to manufacturing the product.
4	Style 3020, 2965	Available with all "Traditional" and Old World "Traditional" Stile and Rail profiles.
		Only available with the following Outside Edge Profiles: D7, D12, D15, D17, D18, D21, D24, D32, D41, D52, D67, D93, D101, D102, D115, D118, D120 .
		A CAD drawing must be approved prior to manufacturing the product.
5	Center Rail Placement	Center rail placement must be specified and refers to the distance from the top of the top rail to the top of the center rail for most door styles. See Center Rail Placement in <i>Section A.4</i> for more information.

Functional Options (Chapter F)

1	Hinge Boring	Hinge boring is available for all Quarter & Half Circle - 1/4" Flat Panel doors. Please see <i>Section F.1</i> for additional hinge boring requirements, ordering instructions and compatibility.
---	--------------	---

General Information (Chapter A)

1	Ready to Assemble (RTA)	RTA is <i>not</i> available as an option.
---	-------------------------	---

Material Options

1	Core Material	Veneered flat panel doors are constructed using a 1/4" [6.4mm] "A" face grade veneer with an MDF Core.
2	MDF - MR, NAF, Raw	Hybrid / MDF species of flat panel doors and drawer fronts are also available with MDF - MR (Moisture Resistant), NAF, Raw.

Profile Options (Chapter E)

1	Stile & Rail Profile Options	Compatible with all "Traditional" and "Old World" stile and rail profiles (excluding Mirror Joints).
2	1/4" Flat Panel Doors and Drawers Fronts	To simulate the "look" of a "Flat Panel" door or drawer front, in a solid wood species, please order using a solid wood raised panel door style with the RVSCP-PR324 center panel profile. See <i>Section B.2</i> for Raised Panel Door & Drawer Front Styles and <i>Section E.13</i> for the RVSCP-PR324 center panel profile. For pricing, please see <i>Section B.2</i> of our current Wholesale Pricing Catalog .

Sizes/Dimensions

1	Door Widths	Styles 895L/R, 896L/R, 897L/R, 1890, 1896, 2432L/R, 2961 and 2963 widths can only be ordered in 1/4" [6.4mm] increments.
		Styles 3020, 3022, 2965 and 2967 are available from 12" [304.8mm] to 24" [609.6mm] wide in 1" [25.4mm] increments only.
2	Outside Radius	Style 895L, 895R, 896L, 896R : The height must be at least 2 1/4" [57.2mm] greater than the width. Style 2432L, 2432R : The height must be at least two times the width of the door.
3	Inside Radius	Height must be equal to or greater than the width.
4	Half Circle Doors	Width must be less than or equal to the door height, less the width of the (bottom rail x 2).
		Height must be greater than or equal to 1/2 of the door width, plus the width of the bottom rail and center rail (if applicable).
5	Stile & Rail Sizes	2 1/4" [57.2mm] or 3" [76.2mm] stiles and rails are considered standard part sizes; other part sizes may require a custom tooling setup. In this case, additional "custom engineering" charges may apply.
6	Thicknesses	When using Traditional stile and rail profiles, Quarter Circle and Half Circle 1/4" flat panel doors made from solid wood are available 3/4" [19.3mm] and 1" [25.4mm] thick.
		When using Old World stile and rail profiles, Quarter Circle and Half Circle 1/4" flat panel doors made from solid wood are available 1" [25.4mm], 1 1/8" [28.6mm] and 1 1/4" [31.8mm] thick.

Quarter & Half Circle 1/4" Flat Panel Doors - END

Ordering & Pricing Notes: Gothic Doors - 1/4" Flat Panel

Ordering Guidelines

1	Order Forms	Please use <i>Door Order Form (E•Z Form #2)</i> .
Pricing		
1	Pricing	Please see <i>Section B.4</i> of our current Wholesale Pricing Catalog.

Technical Notes: Gothic Doors - 1/4" Flat Panel

Cabinet Door & Drawer Front Options (Chapter B)

1	Frame & Mullion Doors	Glass openings will be routed to follow the contour of the shape for Styles 4100 and 4200 . For pricing, please see <i>Section B.12</i> of our current Wholesale Pricing Catalog.
---	-----------------------	---

Functional Options (Chapter F)

1	Hinge Boring	Hinge boring is available for all Gothic - 1/4" Flat Panel doors. Please see <i>Section F.1</i> for additional hinge boring requirements, ordering instructions and compatibility.
---	--------------	--

Profile Options (Chapter E)

1	Stile & Rail Profile Options	Compatible with all "Traditional" and "Old World" stile and rail profiles (excluding Mirror Joints). Mitered stile and rail profiles are <i>not</i> an option for Gothic doors.
2	1/4" Flat Panel Doors and Drawers Fronts	To simulate the "look" of a "Flat Panel" door or drawer front, in a solid wood species, please order using a solid wood raised panel door style with the RVSCP-PR324 center panel profile. See <i>Section B1</i> for Raised Panel Door & Drawer Front Styles and <i>Section E.13</i> for the RVSCP-PR324 center panel profile. For pricing, please see <i>Section B.1</i> of our current Wholesale Pricing Catalog.

Sizes/Dimensions

1	Minimum Height	Minimum height equals door width plus 1" [25.4mm].
2	Absolute Minimum Width	The absolute minimum width for a flat panel Gothic door is 10" [254mm].
3	Top Rail Width	In order to maintain the "look" and shape of the Gothic arch, the width of the top rail at the peak of the arch will vary slightly from the width of the remaining stiles and rail. This dimension will also fluctuate based on the overall width of the door. If needing to specify this dimension, please submit your request to our Customer Support Team.
4	Thicknesses	When using Traditional stile and rail profiles, Gothic 1/4" flat panel doors made from solid wood are available 3/4" [19.3mm] and 1" [25.4mm] thick. When using Old World stile and rail profiles, Gothic 1/4" flat panel doors made from solid wood are available 1" [25.4mm], 1 1/8" [28.6mm] and 1 1/4" [31.8mm] thick.

Ordering & Pricing Notes: “Mitered” Mortise & Tenon - Raised Panel

Ordering Guidelines

1	Order Forms	Please use <i>Door and/or Drawer Front Order Forms (E•Z Forms #2 and #3)</i> .
Pricing		
1	Pricing	Please see <i>Section B.5</i> of our current Wholesale Pricing Catalog .

Technical Notes: “Mitered” Mortise & Tenon - Raised Panel

Cabinet Door & Drawer Front Options (Chapter B)

1	Mitered Frame or Mullion Doors	All of the mitered profiles shown in this catalog are also available with the GRF profile. When ordering, please indicate whether the door is a frame or mullion. If a mullion, please indicate the lite pattern and number of lites. <i>Not all mitered profiles are available with mullions.</i>
---	--------------------------------	---

Convex/Concave Options (Chapter D)

1	Curved Products	The ☐ indicates door styles are available for Curved Products. For ordering guidelines, see <i>Chapter D</i> .
---	-----------------	--

Design Options (Chapter G)

1	Radius Corners	Mitered profiles in the MP600 / MP6000 Series , which accept an additional outside edge, may also accept radius outside corners.
		1½" [38.1mm] wide Mitered Profiles can accept up to a ¾" [19.1mm] radius.
		2¼" [57.2mm] to 4½" [114.3mm] wide Mitered Profiles can accept up to a 1" [25.4mm] radius.
		For more information, please refer to <i>Section G.13</i> .
2	“Mitered” Stile/Rail Stock (Part #SRP100)	“Mitered” Stile & Rail stock is produced and priced the same as “Traditional” Stile and Rail stock. To order use Part #SRP100.
		Available in 8', Random Length and Cut to Length sizes. See <i>Section G.16</i> for additional information.

Functional Options (Chapter F)

1	Hinge Boring	Hinge boring is available for “Mitered” Mortise & Tenon - Raised Panel doors and drawer fronts. Please see <i>Section F.1</i> for additional hinge boring requirements, ordering instructions and compatibility.
		Hinge boring is <i>not available</i> on any of the 1½" [38.1mm] wide miter profiles.

General Information (Chapter A)

1	Grain Direction	Arrows (←→) indicate standard grain direction. Grain direction may be specified at NO extra cost .
2	Ready to Assemble	RTA (<i>Ready to Assemble</i>) is available as an option for mitered doors.
3	Warranty	Please see <i>Section A.8 - Warranties</i> for more information on warping, bowing (i.e.: barrel effect) and twisting.

Material Options

1	MDF - MR, NAF, Raw (Center Panel Material Only)	Hybrid / MDF species of raised panel doors and drawer fronts are also available with MDF - MR (Moisture Resistant), NAF, Raw center panels. <ul style="list-style-type: none"> • Available with raised and recessed raised panel profiles that finish at ⅜" and ¼" thick (<i>Section E.12, E.14</i>). • Available with the RVSCP-PR324 reverse solid center panel profile (<i>Section E.13</i>).
---	---	---

Miscellaneous

1	Compatibility Charts	Please reference our website: Resources / Technical Information.
2	Center Stile and Rail Construction	Most center stiles & rails will be haunched into the outside stiles & rails creating a mitered joint where they are conjoined. Exceptions will apply where the haunch distance is too small to miter. In these cases, a butt joint will be used (ex: MP612 / MP1468).

Profile Options (Chapter E)

1	D7 Edges	A D7 Edge can be used along with any MP600 / MP6000 Series Mitered Profile that accepts an additional outside edge.
2	Lipped Outside Edge Profiles	D5, D16, D20, D22, D36, D44, D58, D123, D144, D180 Outside Edges are <i>not available</i> with any mitered construction. These edge treatments will leave a void in the tenon joint on profiles.
3	MP660 Family	Designed to accept Applied Molding #1168, #1169 and #3149 . Molding must be ordered separately.
4	MP744, MP763 Families	Designed to accept Applied Molding #1008 . Molding must be ordered separately.

Continued on next page...

► For PRICING ► See Section B.5 in our current Wholesale Pricing Catalog.

Technical Notes: “Mitered” Mortise & Tenon - Raised Panel...continued

Sizes/Dimensions

1	Thicknesses	When using Traditional mitered stile and rail profiles, Mitered Mortise & Tenon raised panel doors and DFs made from solid wood are available ¾" [19.3mm] and 1" [25.4mm] thick.
		When using Old World mitered stile and rail profiles, Mitered Mortise & Tenon raised panel doors and DFs made from solid wood are available 1" [25.4mm], 1⅝" [28.6mm] and 1¼" [31.8mm] thick.
		See Section S.3 for possible thickness restrictions based on wood species.
2	Non-Standard Parts	Some mitered profiles accommodate width flexibility, see the MP600/MP6000 series of mitered profiles in Section E.9 . The top rail, bottom rail, left stile and right stile must all be the same profile and the same width .
		Stiles/Rails can be ordered in widths from 1½" [38.1mm] to 3" [76.2mm] in ¼" [6.4mm] increments without incurring a non-standard part size charge. See Section A.5 for more information.
		Please submit requests for widths that range from over 3" [76.2mm] to a maximum 4½" [114.3mm] to our Customer Support Team; these may be subject to up-charges.
3	Minimum Sizes	All mitered door and drawer front minimum sizes are calculated based on 2¼" [57.2mm] wide profiles.
		If using a 3" [76.2mm] wide profile, please add 1½" [38.1mm] to the published minimum door size.
		If using a 1½" [38.1mm] wide profile, deduct 1½" [38.1mm] from the published minimum size.

Technical Notes: “Mitered” Mortise & Tenon - 1/4" Flat Panel...continued

Profile Options (Chapter E)...continued

1	1/4" Flat Panel Doors and Drawers Fronts	1/4" Flat Panel doors are available with 1/4" veneered or MDF center panels. To simulate the “look” of a “Flat Panel” door or drawer front, in a solid wood species, please order using a solid wood raised panel door style with the RVSCP-PR324 center panel profile. See Section B.1 for Raised Panel Door & Drawer Front Styles and Section E.13 for the RVSCP-PR324 center panel profile. For pricing, please see Section B.1 of our current Wholesale Pricing Catalog .
2	D7 Edges	A D7 Edge can be used along with any MP600 / MP6000 Series Mitered Profile that accepts additional outside edges.
3	Lipped Outside Edge Profiles	D5, D16, D20, D22, D36, D44, D58, D123, D144, D180 Outside Edges are <u>not available</u> with any mitered construction. These edge treatments will leave a void in the tenon joint on profiles.
4	MP623-76, MP623-57, MP623-38	Only available in 3/4" [19.1mm] thickness. To obtain a center panel that is flush with the face of the stiles and rails, use one of these Solid Wood Center Panel Profiles: PR318-25, PR319-10, PR320-25, PR320-32, PR320-44, PR321-32, PR328-32 or PR329-19.
5	MP624-76, MP624-57 and MP624-38	Available in 3/4" [19.1mm] or 1" [25.4mm] thicknesses with a 1/4" [6.4mm] Veneered Flat Panel or these Solid Wood Profiles: PR318-25, PR320-25, PR320-32, PR320-44, PR321-32, PR328-32, PR329-19 or the RVSCP-PR324 (Reversed Solid Center Panel).
6	MP660 Family	Designed to accept Applied Molding #1168, #1169 and #3149 . Molding must be ordered separately.
7	MP744, MP763 Families	Designed to accept Applied Molding #1008 . Molding must be ordered separately.

Sizes/Dimensions

1	Thicknesses	When using Traditional mitered stile and rail profiles, Mitered Mortise & Tenon 1/4" flat panel doors and DFs made from solid wood are available 3/4" [19.3mm] and 1" [25.4mm] thick. When using Old World mitered stile and rail profiles, Mitered Mortise & Tenon 1/4" flat panel doors and DFs made from solid wood are available 1" [25.4mm], 1 1/8" [28.6mm] and 1 1/4" [31.8mm] thick.
2	Non-Standard Parts	Some mitered profiles accommodate width flexibility, see the MP600/MP6000 series of mitered profiles in Section E.9 . The top rail, bottom rail, left stile and right stile must all be the same profile and the same width . Stiles/Rails can be ordered in widths from 1 1/2" [38.1mm] to 3" [76.2mm] in 1/4" [6.4mm] increments without incurring a non-standard part size charge. See Section A.5 for more information. Please submit requests for widths that range from over 3" [76.2mm] to a maximum 4 1/2" [114.3mm] to our Customer Support Team; these may be subject to up-charges.
3	Minimum Sizes	All mitered door and drawer front minimum sizes are calculated based on 2 1/4" [57.2mm] wide profiles. If using a 3" [76.2mm] wide profile, please add 1 1/2" [38.1mm] to the published minimum door size. If using a 1 1/2" [38.1mm] wide profile, deduct 1 1/2" [38.1mm] from the published minimum size.
4	Maximum Center Panel Size Limitation	Given the 1/4" [6.4mm] veneered flat panel material used for center panels is 48"W x 96"H [1219.2mm x 2438.4mm], the maximum visible center panel width in a door with vertical grain and no center stile is 47 7/8" [1197mm]; the maximum visible center panel height with no center rail is 95 1/8" [2416.2mm].

Mitered Mortise & Tenon - 1/4" Flat Panel - END

► For PRICING ► See Section B.6 in our current Wholesale Pricing Catalog.

French Miter Joinery Benefits

Our **French Miter** door construction was introduced in an effort to be a more cost effective alternative to an applied molding door. However, the **French Miter** door has other advantages as well. It provides more structural integrity than an applied molding door because the molding detail is an integral part of the stiles and rails instead of a separate piece. It provides a more traditional look than a formal mitered door while still having the applied molding look. If in extremely dry or humid regions, WalzCraft recommends the use of French Miter doors & drawer fronts. The door will be less likely to "barrel" than a traditional miter door (see **Warranty on Bowing in Section A.8** for more information on the "barrel effect"). There are more outside edge profile options available than with a mitered door, and you have the flexibility to vary your stile and rail widths.

Drawer Front Style 40FM*

Shown with: MP604-76, 3" [76mm] Wide Stiles;
MP604-57, 2 1/4" [57mm] Wide Rails
Flat Center Panel and D79 Outside Edge

Door Style 10FM

Shown with: MP604-76,
3" [76.2mm] Wide Stiles & Rails
PR302-38 and D79 Outside Edge

Ordering Guidelines

1	Order Forms	Please use <i>Door and/or Drawer Front Order Forms (E•Z Forms #2 and #3)</i> .
Pricing		
1	Pricing	Please see <i>Section B.7</i> of our current Wholesale Pricing Catalog .

Continued on next page...

► For PRICING ► See Section B.7 in our current Wholesale Pricing Catalog.

Technical Notes: French Miter Doors and Drawer Fronts

Cabinet Door & Drawer Front Options (Chapter B)

1	Door Styles	Available in all of the same door styles as the raised and flat panel mitered doors. Simply add an "FM" to the style number (ie: Style 10FM). See <i>Sections B.5 and B.6</i> .
		Convex/Concave door styles 10FM and 10FM* are only available in radii 12" [304.8mm] and greater.
		French Miter construction is only available on door styles with a square frame (Ex: Style 10). Not available on doors styles with shaped rails (Ex: Style 2000).
2	Frames & Mullions	<p>Please reference Frame & Mullion notes & glass size calculation in <i>Section B.12</i> when calculating the visual opening size and / or glass size for doors with French Miter construction.</p> <ul style="list-style-type: none"> See Sizes / Dimensions notes on the following page when determining finished stile and rail widths for French Miter doors need for the above calculations.

Functional Options (Chapter F)

1	Hinge Boring	Hinge boring is available for French Miter Mortise & Tenon - Raised & 1/4" Flat Panel doors and drawer fronts. Please see the Outside Edge Profile Compatibility chart on our website: Resources / Technical Information for compatible profile options.
		The minimum width, at the narrowest point, for any stile or rail with 35mm hinge boring, without a "GRF" cut is 1 3/4" [44.5mm]. French Mitered doors ordered with this part size minimum will be limited to a Cup Drilling Distance of 3.0mm or less.

General Information (Chapter A)

1	Ready to Assemble (RTA)	RTA (<i>Ready to Assemble</i>) is available as an option.
---	-------------------------	---

Material Options

1	MDF - MR, NAF, Raw (Center Panel Material Only)	<p>Hybrid / MDF species of French Mitered doors and drawer fronts are also available with MDF - MR (Moisture Resistant), NAF, Raw center panels.</p> <ul style="list-style-type: none"> Available with raised and recessed raised panel profiles that finish at 3/8" and 3/4" thick (<i>Section E.12, E.14</i>). Available with the RVSCP-PR324 reverse solid center panel profile (<i>Section E.13</i>). Available with the 1/4" thick flat center panel profile.
---	---	--

Profile Options (Chapter E)

1	Stile & Rail Profiles	French Mitered doors are available with many of our MP600/MP6000 Series Mitered Profiles. Please see <i>Section E.9</i> . Any MP600 / MP6000 series profile number that has a corresponding [FM] symbol is available for a French Miter door.
		French Miter doors are also available with some of our "Traditional" Mortise & Tenon Stile & Rail profiles. Please see <i>Section E.1</i> . Any profile number that has a corresponding [R-FM] symbol is recommended for French Miter construction. If choosing to order these R-FM profiles with French Miter construction, please use the matching French Miter door style along with the matching miter profile. For example, if you want a Style 10 door with stile & rail profile SR119 , but made with French Miter construction, please order door Style 10FM with mitered stile & rail profile MP603-57, Page E.9.2 .
		SR108 matches MP618-57 , SR119 matches MP603-57 , SR121 matches MP626-57 , SR127 matches MP637-57 , SR160 matches MP690-57 .
2	Outside Edge Profiles	Available with most outside edge profiles found in <i>Section E.15 & E.16</i> .
		<ul style="list-style-type: none"> Exceptions will apply where thicknesses are not compatible. <p>Not compatible with Molder Edge profiles.</p>
3	1/4" Flat Panel Doors and Drawers Fronts	<p>1/4" Flat Panel doors are available with 1/4" veneered or MDF center panels.</p> <p>To simulate the look of a 1/4" Flat Panel door or drawer front in a solid wood species, please order using a solid wood raised panel door style with the RVSCP-PR324 center panel profile.</p> <ul style="list-style-type: none"> See <i>Section B.5</i> for mitered raised panel door and drawer front styles. See <i>Section E.13</i> for the RVSCP-PR324 center panel profile. For pricing, please see <i>Section B.7/B.5</i> of our current <i>Wholesale Pricing Catalog</i>.

Continued on next page...

► For PRICING ► See Section B.7 in our current Wholesale Pricing Catalog.

Technical Notes: French Miter Doors and Drawer Fronts...continued

Sizes/Dimensions

1	Thicknesses	<p>When using French Mitered stile and rail profiles, French Mitered Mortise & Tenon raised panel and 1/4" flat panel doors and DFs made from solid wood are available 3/4" [19.3mm] and 1" [25.4mm] thick.</p> <p>See <i>Section S.3</i> for possible thickness restrictions based on wood species.</p>
2	Minimum & Maximum Sizes	<p>The minimum width for your French Miter door varies and is based on the stile and rail profile guidelines you've chosen. Please contact our Customer Support Team for more information.</p> <p>The minimum height for your French Miter door will be the same minimum height as the Mitered Door Style you've chosen.</p> <p>The maximum height for a door using French Mitered construction is 96" [2438.4mm].</p> <p>The minimum visual rail length for doors with French Miter construction is 5 1/2" [139.7mm].</p> <p>The minimum width for any stile and/or rail on a French Miter door is 1 1/2" [38.1mm].</p> <p>The maximum width for any stile and / or rail on a French Miter door is 8 3/8" [228.0mm].</p> <p>French Miter doors with any of the following would require non-standard construction:</p> <ul style="list-style-type: none"> • Doors greater than 96" [2438.4mm] high. • Rails less than 5 1/2" [139.7mm] long. • Stiles and / or rails greater than 8 3/8" [228.0mm] wide. <p>Please submit these requests to our Customer Support Team. A quote will be provided, as additional charges may apply.</p>
3	Standard & Non-Standard Stile & Rail Widths	<p>Standard stile & rail widths for French Miter doors utilizing Traditional (<i>E.1</i>) profiles will be 2 1/4" [57mm] unless otherwise specified.</p> <p>Standard stile & rail widths for French Miter doors utilizing Miter (<i>E.9</i>) profiles will be either 3" [76mm], 2 1/4" [57mm] or 1 1/2" [38mm] unless otherwise specified. Standard widths are determined by the profile number. If ordering stile & rail widths at their standard sizes, please note the full MP profile number on the order form.</p> <ul style="list-style-type: none"> • Example: MP604-76 Stiles • Example: MP604-57 Rails <p>If you choose to deviate from the standard profile width, please include the first set of numbers of the MP profile (MP604) with the width dimension you prefer formatted after the hyphen (-).</p> <ul style="list-style-type: none"> • Example: MP604 - 2 3/4" • Example: MP604 - 70mm <p>Indicate any non-standard part sizes in the <i>Special Instructions</i> column on your order forms.</p> <p>All standard and non-standard part size rules apply. See <i>Section A.5</i> for more information.</p>
4	Miter Profile Sizing	<p>Due to the manufacturing process, outside stiles and rails for French Miter doors utilizing miter profiles will finish at 1/16" [1.5mm] less in width than what is denoted by the stile and rail profile number.</p> <ul style="list-style-type: none"> • For example, a French Miter door that is ordered with stile & rail profile MP604-76, will have outside stiles and rails that finish at 2 11/16" [74.5mm] wide rather than 3" [76mm]. <ul style="list-style-type: none"> ◦ To result in a "true" 3" [76mm] wide stile & rail width, the outside stile and rail sizes must be ordered at 3 1/16" [77.50mm], rather than 3" [76mm]. <p>The same would apply for outside stile and rail widths specified that deviate from the widths denoted by the profile number.</p> <ul style="list-style-type: none"> • For example, if ordering a French Miter door with stile & rail profile MP604, and you specify the outside stiles and rails to be 2 3/4" [70mm] wide, they will finish at 2 11/16" [68.5mm] wide rather than 2 3/4" [70mm]. <ul style="list-style-type: none"> ◦ To result in a "true" 2 3/4" [70mm] wide stile & rail width, the outside stile and rail sizes must be ordered at 2 13/16" [71.50mm], rather than 2 3/4" [70mm]. <p>Center stiles and center rails for French Miter construction will finish at specified dimensions.</p>
5	Flat Panel Door Maximum Sizes	<p>The 1/4" [6.4mm] veneered flat panel material used for center panels is 48"W x 96"H [1219.2mm x 2438.4mm]. Due to this, the maximum visible center panel <u>width</u> in a door with vertical grain and no center stile is 47 1/8" [1197mm]. The maximum visible center panel <u>height</u> with no center rail is 95 5/8" [2416.2mm].</p>

French Miter Mortise & Tenon Raised & 1/4" Flat Panel Doors and Drawer Fronts - END

► For PRICING ► See Section B.7 in our current Wholesale Pricing Catalog.

Adventure Series Construction

The *Adventure Series* door style was introduced to give you more design flexibility to create a truly unique look. This series of doors allows you to pair a square edged stile or rail profile with any of the profiles from *Sections E.1, E.3, E.5 or E.9* designated with an **AS**. See *Profile* notes on following pages for more information.

With **Styles 10ASTP, 1801ASTP, 40ASTP and 1401ASTP** you can either apply a detailed profile to the rails while keeping the stiles square, or reverse the construction and apply a detailed profile to the stiles while keeping the rails square.

- For **Styles 8000ASTP, 1000ASTP, 3098ASTP, 3101ASTP, 4044ASTP, 4043ASTP, 3097ASTP, 3099ASTP, 10ASMP, 8000ASMP, 1000ASMP, 40ASMP, 4044ASMP and 4043ASMP** you can apply a detailed profile to the rails while keeping the stiles square.
- For **Styles 1010ASTP, 3096ASTP, 4040ASTP, 3095ASTP, 1801ASMP, 3096ASMP, 1401ASMP and 3095ASMP** you can apply a detailed profile to the stiles while keeping the rails square.

The mortise & tenon construction even allows you to vary the stile & rail widths for more flexibility.

Step 1) Choose your door style. This will define the center panel type (raised or flat), how your stiles and rails will intersect, and what type of profile (traditional vs. miter) can be used.

Step 2) Choose the profile that you want applied to the detailed stiles or detailed rails.

- **Example: Style 10ASMP** will give you a square raised panel. The stiles will run the full height of the door with the rails running between the stiles. The detailed profile on the rails can be chosen from any of the mitered profiles in *Section E.9* that have a corresponding **AS** on the profile drawing.
- The example below shows a **Style 10ASMP** with the **MP643-57** profile applied to the *rails*.

Not drawn to scale.

Ordering & Pricing Notes: Adventure Series - Raised & 1/4" Flat Panel

Ordering Guidelines

1	Order Forms	Please use <i>Adventure Series Order Form (E•Z Form #2.7)</i> .
Pricing		
1	Pricing	Please see <i>Section B.7</i> of our current Wholesale Pricing Catalog .

Technical Notes: Adventure Series - Raised & 1/4" Flat Panel

Cabinet Door & Drawer Front Options (Chapter B)

1	Available Door Styles	Available with traditional profiles and raised panel door Styles 10, 1000, 1010, 1801, 8000 . Simply add an ASTP to the style number (ex: Style 10ASTP). • Also available as Style 3096ASTP, 3098ASTP, 3101ASTP for Adventure Series doors only.
		Available with miter profiles and raised panel door Styles 10, 1000, 1801, 8000 . Simply add an ASMP to the style number (ex: Style 10ASMP). • Also available as Style 3096ASMP for Adventure series doors only.
		Available with traditional profiles and flat panel door Styles 40, 1401, 4040, 4043, 4044 . Simply add an ASTP to the style number (ex: Style 40ASTP). • Also available as Style 3095ASTP, 3097ASTP, 3099ASTP for Adventure series doors only.
		Available with miter profiles and flat panel door Styles 40, 1401, 4043, 4044 . Simply add an ASMP to the style number (ex: Style 40ASMP). • Also available as Style 3095ASMP for Adventure series doors only.

Functional Options (Chapter F)

1	Hinge Boring	Hinge boring is available for Adventure Series - Raised & 1/4" Flat Panel doors and drawer fronts. Please see <i>Section F.1</i> for additional hinge boring requirements, ordering instructions and compatibility.
---	--------------	---

General Information (Chapter A)

1	Center Rail Placement	For styles 8000ASTP, 3098ASTP, 4044ASTP, 3097ASTP, 8000ASMP and 4044ASMP , center rail placement will be standard at a 50/50 split.
		For a center rail placement other than a 50/50 split, please order as Style 1000ASTP, 3101ASTP, 4043ASTP, 3099ASTP, 1000ASMP or 4043ASMP . These styles require center rail placement to be specified and refers to the distance from the top of the top rail to the top of the center rail. Please indicate this dimension in the special instructions area on the order form.
2	Ready to Assemble (RTA)	RTA is available as an option.

Material Options

1	MDF - MR, NAF, Raw	Hybrid / MDF species of Adventure Series doors and drawer fronts are also available with the center panel as MDF - MR (Moisture Resistant), NAF, Raw.
		• Available with raised and recessed raised panel profiles that finish at 3/8" and 3/4" thick (<i>Section E.12, E.14</i>). • Available with the RVSCP-PR324 reverse solid center panel profile (<i>Section E.13</i>). • Available with the 1/4" thick flat center panel profile.

Profile Options (Chapter E)

1	Traditional Profile (ASTP)	This style is available with many of our stile & rail profiles from the following sections: • <i>Section E.1</i> : Traditional mortise & tenon stile & rail profiles. • <i>Section E.3</i> : Old World - Traditional mortise & tenon stile & rail profiles. • <i>Section E.5</i> : Shelf applied molding stile & rail profiles. Any profile number that has a corresponding [AS] symbol is available for an Adventure Series door.
		Additional approved profile combinations not marked in catalog: • Door styles 10ASTP & 40ASTP : SR108 stiles with SR152 rails. • Door styles 1801ASTP & 1401ASTP : SR152 stiles with SR108 rails.
2	Miter Profiles (ASMP)	This style is available with many of our stile & rail profiles from the following section: • <i>Section E.9</i> : MP600 / MP6000 series mitered stile & rail profiles. Any profile number that has a corresponding [AS] symbol is available for an Adventure Series door.
		Additional approved profile combinations not marked in catalog: • Door styles 10ASMP & 40ASMP : MP618 stiles with MP672 rails. • Door styles 1801ASMP & 1401ASMP : MP672 stiles with MP618 rails.

Technical Notes: Adventure Series - Raised & 1/4" Flat Panel...continued

Profile Options (Chapter E)...continued

3	Square Stiles & Rails	Your chosen stile or rail profile can only be used in conjunction with an adjacent square stile or rail, unless noted otherwise. <ul style="list-style-type: none"> • If your rails are profiled, your stiles will be square. • If your stiles are profiled, your rails will be square.
		SR100 is the square profile used with the majority of compatible traditional mortise & tenon (Section E.1) and shelf applied molding (Section E.5) profiles. <ul style="list-style-type: none"> • Due to the Panel Plow Groove Cut (PPGC) location, SR118 will use the SR104 square profile. • SR145, SR146, SR157, SR160, SR163, SR167, SR169 will use the SR123 square profile.
		SR195 is the square profile used with the compatible Old World mortise & tenon profiles (Section E.3).
		MP612 is the square profile family used with the majority of compatible MP600/MP6000 series mitered mortise & tenon stile & rail profiles (Section E9). <ul style="list-style-type: none"> • Due to the Panel Plow Groove Cut (PPGC) location, MP690, MP6112, MP6114 will use the MP628 square profile.
4	1/4" Flat Panel Doors and Drawers Fronts	1/4" Flat Panel doors are available with 1/4" veneered or MDF center panels.
		To simulate the "look" of a "Flat Panel" door or drawer front in a solid wood species, please order using a solid wood raised panel door style with the RVSCP-PR324 center panel profile. See Section B.1 for Raised Panel Door & Drawer Front Styles and Section E.13 for the RVSCP-PR324 center panel profile. For pricing, please see Section B.1 of our current Wholesale Pricing Catalog.
5	Outside Edge Profiles	Available with most Outside Edge Profiles from Sections E.15 & E.16. Please see "Outside Edge Profile Compatibility" chart and/or "Profile-Reveal Widths" chart on our website for more information.

Sizes/Dimensions

1	Thicknesses	When using Traditional stile and rail profiles, Adventure Series raised and 1/4" flat panel doors made from solid wood are available 3/4" [19.3mm] and 1" [25.4mm] thick.
		When using Old World stile and rail profiles, Adventure Series raised and 1/4" flat panel doors made from solid wood are available 1" [25.4mm], 1 1/8" [28.6mm] and 1 1/4" [31.8mm] thick.
		See Section S.3 for possible thickness restrictions based on wood species.
2	Standard & Non-Standard Stile & Rail Widths	Modification of stile and rail widths is allowed. Adventure Series construction also gives you the flexibility to vary your stile widths from your rail widths.
		Standard stile & rail widths for Adventure Series doors utilizing Traditional (E.1) or Shelf Applied (E.5) profiles will be 2 1/4" [57mm] unless otherwise specified.
		Standard stile & rail widths for Adventure Series doors utilizing Old World (E.3) profiles will be 3" [76mm] unless otherwise specified.
		Standard stile & rail widths for Adventure Series doors utilizing Miter (E.9) profiles will be either 3" [76mm], 2 1/4" [57mm] or 1 1/2" [38mm] unless otherwise specified. Standard widths are determined by the profile number. If ordering stile & rail widths at their standard sizes, please note the full MP profile number on the order form. <ul style="list-style-type: none"> • Example: MP612-57 Stiles • Example: MP643-76 Rails
		If you choose to deviate from the standard profile width, please include the first set of numbers of the MP profile (MP643) with the width dimension you prefer formatted after the hyphen (-). <ul style="list-style-type: none"> • Example: MP643 - 2 3/4" • Example: MP643 - 70mm
		Indicate any non-standard part sizes in the "Special Instructions" column on your order forms.
3	Adventure Series - Miter Profile Sizing	All standard and non-standard part size rules apply. See Section A.5 for more information.
		Due to the manufacturing process, outside stiles and rails for Adventure Series doors utilizing miter profiles will finish at 1/16" [1.5mm] less in width than what is denoted by the stile and rail profile number. <ul style="list-style-type: none"> • For example, an Adventure Series door that is ordered with stile & rail profile MP643-76, will have outside stiles and rails that finish at 2 1/16" [74.5mm] wide rather than 3" [76.0mm]. <ul style="list-style-type: none"> ◦ To result in a "true" 76mm wide stile & rail width, the outside stile and rail sizes must be ordered at 77.50mm, rather than 76mm.
		The same would apply for outside stile and rail widths specified that deviate from the widths denoted by the profile number. <ul style="list-style-type: none"> • For example, if ordering an Adventure Series door with stile & rail profile MP643, and you specify the outside stiles and rails to be 2 3/4" [70mm] wide, they will finish at 2 1/16" [68.5mm] wide rather than 2 3/4" [70.0mm]. <ul style="list-style-type: none"> ◦ To result in a "true" 70mm wide stile & rail width, the outside stiles and rail sizes must be ordered at 71.50mm, rather than 70.0mm.

Ordering & Pricing Notes: No-Panel Cut (NPC) Frame Only Doors

Ordering Guidelines

1	Order Forms	Please use <i>Door Order Form (E•Z Form #2)</i> .
2	Required Information	Note “NPC” at the end when indicating your chosen Stile & Rail profile (ex: MP609-57-NPC) and check the “Frame Only” box when entering your quantities, door style and sizes.
Pricing		
1	Pricing	Please see <i>Section B.8</i> of our current Wholesale Pricing Catalog .

Technical Notes: No-Panel Cut (NPC) Frame Only Doors

Cabinet Door & Drawer Front Options (Chapter B)

1	Door Styles	Available as a Style 10 Frame Only, Style 10M Frame Only and Style 10FM Frame Only door.
---	-------------	---

Functional Options (Chapter F)

1	Hinge Boring	Hinge boring is available for No-Panel Cut Frame Only doors. Please see <i>Section F.1</i> for additional hinge boring requirements, ordering instructions and compatibility.
---	--------------	---

General Information (Chapter A)

1	Ready to Assemble (RTA)	RTA is available as an option.
---	-------------------------	--------------------------------

Profile Options (Chapter E)

1	Stile & Rail Profiles	Style 10 Frame Only Doors: Available with all Traditional and Old World stile & rail profiles from <i>Sections E.1</i> and <i>E.3</i> . Stile and rail joints will be French Mitered unless utilizing square edged profiles. <ul style="list-style-type: none"> • Square edged profiles SR100, SR104, SR123 and SR195 will be Traditional joinery, as shown in the SR100-NPC drawing to the left.
		Style 10M Frame Only Doors: Available with all MP600/MP6000 , MP700 and MP900 Mitered Stile & Rail profiles. All stile and rail joints will be fully mitered.
		Style 10FM Frame Only Doors: Available with many of our MP600/MP6000 Series Mitered Stile & Rail profiles. Any MP600/MP6000 series profile number that has a corresponding [FM] symbol is available for a French Miter door. All stile and rail joints will be French Mitered.
2	Outside Edge Profiles	Available with most outside edge profiles found in <i>Section E.15 & E.16</i> . <ul style="list-style-type: none"> • Exceptions will apply where thicknesses are not compatible.
		Style 10FM doors not compatible with Molder Edge profiles.
3	Applied Moldings	Modified Inside Edge Applied Moldings are available for No-Panel Cut (NPC) Frame Only doors. Please see <i>Section N.5</i> for available options. For a cross-reference guide detailing standard Applied Moldings and the corresponding NPC Applied Moldings, please reference the <i>NPC Applied Molding Cross-Reference Guide</i> on our website under: Resources / Technical Information .

Sizes/Dimensions

1	Thicknesses	When using Traditional stile & rail profiles, No-Panel Cut Style 10 doors made from solid wood are available ¾" [19.3mm] and 1" [25.4mm] thick.
		When using Old World stile & rail profiles, No-Panel Cut Style 10 doors made from solid wood are available 1" [25.4mm], 1½" [28.6mm] and 1¼" [31.8mm] thick.
		When using Traditional mitered stile & rail profiles, No-Panel Cut Style 10M doors made from solid wood are available ¾" [19.3mm] and 1" [25.4mm] thick.
		When using Old World mitered stile & rail profiles, No-Panel Cut Style 10M doors made from solid wood are available 1" [25.4mm], 1½" [28.6mm] and 1¼" [31.8mm] thick.
		When using French Mitered stile and rail profiles, No-Panel Cut Style 10FM doors made from solid wood are available ¾" [19.3mm] and 1" [25.4mm] thick.
		See <i>Section S.3</i> for possible thickness restrictions based on wood species.
2	Minimum & Maximum Sizes	The maximum height for a door using French Miter construction is 96" [2438.4mm].
		The minimum length for a rail on a door using French Miter construction is 5½" [139.7mm].
		The maximum width for any stile and / or rail on a door using French Miter construction is 8¾" [228.0mm].
		No-Panel Cut Frame Only doors with any of the following would require non-standard construction: <ul style="list-style-type: none"> • Doors greater than 96" [2438.4mm] high. • Rails less than 5½" [139.7mm] long. • Stiles and / or rails greater than 8¾" [228.0mm] wide. Please submit these requests to our Customer Support Team. A quote will be provided, as additional charges may apply.
3	Stile & Rail Widths	No-Panel Cut (NPC) Frame Only doors using French Miter construction will have the stiles & rails finish at the exact width specified. There will be no width reduction due to the French Miter manufacturing process.

Technical Notes: Contemporary Slab & Batten Doors...continued

General Information (Chapter A)

1	Grain Direction	Arrows (↔) indicate standard grain direction; grain direction may be specified at NO additional cost.
2	Warranty	Solid wood slab doors ordered without battens or with battens shipped unattached will carry no warranty against warpage. Please see <i>Section A.8 - Warranties</i> for more information on Glued Up Panel expansion/contraction, warping, bowing and twisting. • For sizes outside of warranty limitations, we recommend using our Style 60 wood veneer doors with an MDF core (see <i>Section B.10 & B.11</i>).
3	Ready to Assemble (RTA)	RTA is not available as an option for Contemporary Slab & Batten doors.

Hardware Options (Chapter I)

1	165° & 170° Hinges and Hinge Boring	Please note that our 165° long arm hinges, Series 200 shown in <i>Section I.1</i> and the 170° long arm hinges shown in <i>Section I.7</i> , when used with the standard hinge bore placement shown in <i>Section F.1</i> , are not compatible with our standard batten placement shown on <i>page B.9.3</i> (<i>custom batten placement may be an option</i>).
---	-------------------------------------	---

Material Options

1	Solid Wood	With this product being produced in solid wood, you could experience sunken glue joints or variances in thickness on the face of the staves due to expansion and contraction of the wood. This is more noticeable in darker stain colors and solid tone finishes and product finished with a water base finish. If this is a concern, we would recommend you order your door in raw MDF when applying a SolidTone, or order as a Style 60/60* (<i>Section B.10 or B.11</i>), which are MDF based, if ordering with a darker stain color.
---	------------	---

Miscellaneous

1	Full Overlay or Inset Door Applications	Styles 1050, 1270, 1271 and 1272 are not recommended for applications with tight tolerances due to concerns regarding expansion and contraction of overall width dimensions on vertical grain doors and height dimensions on horizontal grain doors.
2	Continuous Grain (End Matched Pattern)	Upon request, WalzCraft will manufacture hardwood components using a Continuous Grain - End Matched Pattern. This refers exclusively to the matching of grain in the direction of the grain. Available only with Contemporary Slab & Batten Doors and solid wood slab and RP drawer fronts. Additional custom engineering charges will apply. To inquire, please contact our Customer Support Team. Drawings and order details may be emailed to: customersupport@WalzCraft.com
3	Battens	Dashed lines on drawings indicate the battens that are attached to the back side of the door. Styles 1050, 1270, 1271 and 1272 can be ordered without battens. Indicate " No Battens " in the <i>Special Instructions</i> on your order form. See warranty information above. Styles 1050, 1270, 1271 and 1272 can be ordered with battens shipped unattached. Indicate " Ship Battens Unattached " in the <i>Special Instructions</i> on your order form. See warranty information above. Battens will always run across the grain. • Battens are not glued to the doors, they are attached with screws. • Holes in the battens are drilled oversized to allow for expansion and contraction. • Battens that are requested to be shipped unattached, will have the holes drilled (in the battens only) and screws will be included. • See warranty information above.

Profile Options (Chapter E)

1	Style 1270/1270*	Available with your choice of outside edge profile from <i>Section E.15</i> .
2	Style 1271/1271*	Outside Edge Profiles: Available with all standard Outside Edge profiles from <i>Section E.15</i> except those noted as ¾" Only. Raised Panel (RP) Drawer Front Profiles: Only available with the following RP Drawer Front profiles from <i>Section B.16</i> : 318-25RP*, 319-10RP*, 320-32RP*, 321-32RP*, 328-32RP*, 329-19RP*. When applying an RP profile, you must also specify an Outside Edge profile (ie: D7, D33 , etc.). There is no additional charge to add an outside edge.
3	Style 1272/1272*	Outside Edge Profiles: Available with all standard Outside Edge profiles from <i>Section E.15</i> except those noted as ¾" Only. Raised Panel (RP) Drawer Front Profiles: Available with any RP drawer front profile from <i>Section B.16</i> with the exception of those listed for Style 1271 above. When applying an RP profile, you must also specify an Outside Edge profile (ie: D7, D33 , etc.). There is no additional charge to add an outside edge.

Technical Notes: Contemporary Slab & Batten Doors...continued

Sizes/Dimensions

1	Minimum Sizes: • Style 1271/1271* • Style 1272/1272*	See Style 1270/1270* when applying an Outside Edge profile only.
		See Section B.16 for minimum size calculation when applying an RP profile with an outside edge profile.
2	Thicknesses	Contemporary Slab & Batten door and DF styles 1050, 1050*, 1270 and 1270* made from solid wood are available ¾" [19.1mm] and 1" [25.4mm] thick.
		Style 1271/1271* doors and drawer fronts finish at 15/16" [23.8mm] thick.
		Style 1272/1272* doors and drawer fronts finish at 17/8" [28.6mm] thick.
		See Section S.3 for possible thickness restrictions based on wood species.

Batten Placement (As seen from backside of door/drawer front)

View from Back

- Door Styles 1050, 1270, 1271 and 1272 are shipped with matching wood battens attached by screws, to the back of the door.
- Battens measure 5/8" [16.0mm] thick x 1 9/16" [40.0mm] wide.
- Positioned 2 1/4" [57.2mm] from the left and right edges of the door and 2 1/2" [63.5mm] down from the top and up from the bottom of the door.
- Special batten placement or size is available if our standard guidelines conflict with hardware. Please refer these requests to our Customer Support Team. Additional design charges will apply.
- Drawings depict batten placement on back side of door.

Ordering & Pricing Notes: Contemporary Mortise & Tenon Doors

Ordering Guidelines

Standard width for all S/R = 2 1/4"

1	Order Forms	Please use <i>Door and/or Drawer Front Order Forms (E•Z Forms #2 and #3)</i> .
Pricing		
1	Pricing	Please see <i>Section B.9</i> of our current Wholesale Pricing Catalog .

Technical Notes: Contemporary Mortise & Tenon Doors

Cabinet Door & Drawer Front Options (Chapter B)

1	Mortise & Tenon	Allows for center panel expansion and contraction.
---	-----------------	--

General Information (Chapter A)

1	Grain Direction	Arrows (←→) shown indicate standard grain direction. Grain direction may not be specified.
2	Ready to Assemble (RTA)	RTA is available as an option for Contemporary Mortise & Tenon doors.

Functional Options (Chapter F)

1	Hinge Boring	Hinge boring is available for Contemporary Mortise & Tenon doors. Please see <i>Section F.1</i> for additional hinge boring requirements, ordering instructions and compatibility. For Styles 2510, 2511, 2515 and 2522 , please check hinge bore placement compatibility when increasing the width of top and bottom rails.
---	--------------	--

Profile Options (Chapter E)

1	Stile & Rail and Panel Profiles	Available with the SR116/PR314-06 or SR149/PR339-04 profile combinations.
2	Outside Edge Matches	The D21 Outside Edge matches the SR116 and the D32 or D51 match the SR149 .

Sizes/Dimensions

1	Styles 1025, 1125 & 2523 (See above illustrations)	Bottom Rail dimension will vary depending on the height; the remaining stiles and rails will be 2 1/4" [57.2mm] wide. When ordering stile & rail sizes other than 2 1/4" [57.2mm] wide, plank sizes may be compromised requiring custom configuration. Additional charges may apply to customize configuration.
2	Styles 2510, 2511, 2515 and 2522 (See above illustrations)	Left and right stile dimensions will vary depending on the overall width of door. The top and bottom rails will be 2 1/4" [57.2mm] wide. When ordering stile sizes other than noted in the illustration above , plank sizes may be compromised requiring custom configuration. Additional charges may apply to customize configuration.
3	Non-Standard Parts	If you plan to align Contemporary Mortise & Tenon doors with other, "Frame Only" Contemporary Mortise & Tenon doors, part sizes could vary due to required opening sizes. WalzCraft does not automatically modify the width of the stiles/rails to compensate for this.
4	Thicknesses	Contemporary mortise & tenon raised panel doors and drawer fronts are available 3/4" [19.1mm] and 1" [25.4mm] thick. See <i>Section S.3</i> for possible thickness restrictions based on wood species.

Contemporary Mortise & Tenon Doors - END

► For PRICING ► See Section B.9 in our current Wholesale Pricing Catalog.

Style 60 - Veneered MDF Core Doors & Drawer Fronts

WalzCraft has created the **Style 60** Veneered Door and Drawer Front with a wide range of design flexibility. It has an MDF core with wood veneer on the face and back. Edge options include raw/exposed MDF, wood veneer edgbanding or solid wood edgbanding.

With the **Style 60** door you can control:

- Edgbanding material and sequence in which the face veneer, back veneer and edgbanding is applied to the MDF core (**Edgband Treatment Options - EBT**).
- Sequence in which the edgbanding is applied to the top, bottom, left and right edges (**Edgband Application Sequence**). This only applies to edges where butt joinery is used rather than mitered corners.
- Grain direction of edgbanding material, **Lineal** or **Front to Back (EBT401)** only).
- Please see notes for more information on **Style 60 Frame Only** doors.

Style: 60

PC: Variable
Frame: See 60 Frame Only

Style: 60F Frame Only

PC: Variable

Style: 60* Drawer Front

PC: Variable
Frame: See 60 Frame Only

- Step 1)** Choose a Standard Veneer Edgband Treatment (**EBT101 - EBT801**). These will define:
- Edgband material and thickness (Wood Veneer or Solid wood).
 - Sequence of application for face veneer, back veneer and edgbanding material.
- Step 2)** Choose your **Edgband Application Sequence** where applicable (ex: Top, Bottom, Left, Right).
- Step 3)** Choose the edgband grain direction (**EBT401** only).
- Step 4)** Choose your wood species and finish option.

Edgband Application Sequence (*Top, Bottom, Left, Right*)

- Choose the order in which the edgband material is applied to the edges.
- WalzCraft's standard will be to apply the top edge first, bottom edge second, left edge third and right edge last.

► For PRICING ► See Section **B.10** in our current Wholesale Pricing Catalog.

Edgeband Grain Direction (*Lineal or Front to Back*)

Choose the grain direction of each edge independently of one another. WalzCraft's standard will be to apply the edgebanding in a lineal direction (EBGD100). Applies to wood veneer edgebanding only (limited to EBT401).

Example of horizontal grain on face, with lineal grain direction on top, bottom, left & right.

Example of horizontal grain on face, with lineal grain direction on top & bottom and front to back grain direction on left & right.

Example of horizontal grain on face, with front to back grain direction on top, bottom, left & right.

Example of vertical grain on face, with front to back grain direction on top & bottom and lineal grain direction on left & right.

Grain and Color Coordination - Standard Veneer

- Upon request, WalzCraft will manufacture wood veneer components using one of two possible Grain and Color Coordination options.
- Additional custom engineering charges will be applied. To inquire, please contact our Customer Support Team.
- Drawings and order details may be emailed to: customersupport@WalzCraft.com
- Please see *Section G.17* for more information.

EBT100 (*Raw Edge*)

Shown with D7.

- Only available with Applied Molding Outside Edge profiles for 1/16" thick Veneered & Edgebanded doors.

Minimum Size: 3" x 3" [76.2mm x 76.2mm]

► For PRICING ► See Section B.10 in our current Wholesale Pricing Catalog.

EBT101 (Raw Edge)

Minimum Size: 3" x 3" [76.2mm x 76.2mm]

- Available with a **D7** Outside Edge Profile and Applied Molding Outside Edge profiles for 3/4" thick Veneered & Edged doors.

EBT101 - Frame Only (Raw Edge)

Minimum Size: 6 5/8" x 6" [168.3mm x 152.4mm] after edgebanding.

- Available with a **D7** Outside Edge Profile and Applied Molding Outside Edge profiles for 3/4" thick Veneered & Edged doors.
- Only available with **SR100GRF** S/R Profile.

EBT101 - Frame Only - NPC (Raw Edge)

Minimum Size: 6" x 6" [152.4mm x 152.4mm] after edgebanding.

- Available with a **D7** Outside Edge Profile and Applied Molding Outside Edge profiles for 3/4" thick Veneered & Edged doors.
- Only available with **MP612-57-NPC** or **MP612-76-NPC** Stile/Rail Profile.

EBT102 (Wood Veneer Edge - Machine Applied)

This edgebanding option is recommended when a SolidTone® finish will be applied on MDF or MDF - MR, NAF, Raw Doors and Drawer Fronts with a **D7** Outside Edge Profile.

Minimum Size: 3" x 3" [76.2mm x 76.2mm].

- MDF, Raw or MDF - MR, NAF, Raw with veneer edgebanding on 4 edges.
- Only available with **D7** Outside Edge Profile.

► For PRICING ► See Section **B.10** in our current Wholesale Pricing Catalog.

EBT103 (1/8" [3.2mm] Solid Wood Edge - Machine Applied)

This edging option is recommended when a SolidTone® finish will be applied on MDF or MDF - MR, NAF, Raw Doors and Drawer Fronts with a D7 Outside Edge Profile.

Minimum Size: 3 1/4" x 3 1/4" [82.6mm x 82.6mm] after edging.

- MDF, Raw or MDF - MR, NAF, Raw with 1/8" solid wood edging on 4 edges.
- Choose the Edgeband Application Sequence.
- Only available with **D7**, **D33**, **D66**, **D147** OSE.

EBT201 (Wood Veneer Edge - Machine Applied)

Minimum Size: 3" x 3" [76.2mm x 76.2mm] after edging.

- Choose the Edgeband Application Sequence.
- Only available with **D7** Outside Edge Profile.

EBT201 - Frame Only (Wood Veneer Edge - Machine Applied)

Minimum Size: 6 1/8" x 6" [168.3mm x 152.4mm] after edging.

- Choose the Edgeband Application Sequence.
- Only available with **D7** Outside Edge Profile.
- Only available with **SR100GRF** S/R Profile.

EBT201 - Frame Only - NPC (Wood Veneer Edge - Machine Applied)

Minimum Size: 6" x 6" [152.4mm x 152.4mm] after edging.

- Choose the Edgeband Application Sequence.
- Only available with **D7** Outside Edge Profile.
- Only available with **MP612-57-NPC** or **MP612-76-NPC** Stile/Rail Profile.

► For PRICING ► See Section B.10 in our current Wholesale Pricing Catalog.

EBT202 (1/8" [3.2mm] Solid Wood Edge - Machine Applied)

- Choose the Edgeband Application Sequence.
- Only available with **D7, D33, D66, D147** OSE.

Minimum Size: 3/4" x 3/4" [82.6mm x 82.6mm] after edgebanding.

EBT202 - Frame Only (1/8" [3.2mm] Solid Wood Edge - Machine Applied)

- Choose the Edgeband Application Sequence.
- Only available with **D7, D33, D66, D147** OSE.
- Only available with **SR100GRF** S/R Profile.

Minimum Size: 6 3/8" x 6" [168.3mm x 152.4mm] after edgebanding.

EBT202 - Frame Only - NPC (1/8" [3.2mm] Solid Wood Edge - Machine Applied)

- Choose the Edgeband Application Sequence.
- Only available with **D7, D33, D66, D147** OSE.
- Only available with **MP612-57-NPC** or **MP612-76-NPC** Stile/Rail Profile.

Minimum Size: 6" x 6" [152.4mm x 152.4mm] after edgebanding.

► For PRICING ► See Section **B.10** in our current Wholesale Pricing Catalog.

EBT203 (1/4" [6.4mm] Solid Wood Edge - Machine Applied)

- Choose the Edgeband Application Sequence.
- Only available with **D7, D32, D33, D51, D66, D147 OSE.**

Minimum Size: 3 1/2" x 3 1/2" [88.9mm x 88.9mm] after edgebanding.

EBT203 -Frame Only (1/4" [6.4mm] Solid Wood Edge - Machine Applied)

- Choose the Edgeband Application Sequence.
- Only available with **D7, D32, D33, D51, D66, D147 OSE.**
- Only available with **SR100GRF S/R Profile.**

Minimum Size: 6 5/8" x 6" [168.3mm x 152.4mm] after edgebanding.

EBT203 -Frame Only - NPC (1/4" [6.4mm] Solid Wood Edge - Machine Applied)

- Choose the Edgeband Application Sequence.
- Only available with **D7, D32, D33, D51, D66, D147 OSE.**
- Only available with **MP612-57-NPC or MP612-76-NPC** Stile/Rail Profile.

Minimum Size: 6" x 6" [152.4mm x 152.4mm] after edgebanding.

► For PRICING ► See Section B.10 in our current Wholesale Pricing Catalog.

EBT401 (Wood Veneer Edge - Machine Applied)

- Choose the Edgeband Application Sequence.
- Choose the Edgeband Grain Direction.
- Only available with **D7** Outside Edge Profile.

Minimum Size: 3" x 3" [76.2mm x 76.2mm] after edgebanding.

EBT401 - Frame Only (Wood Veneer Edge - Machine Applied)

- Choose the Edgeband Application Sequence and/or Grain Direction.
- Only available with **D7** Outside Edge Profile.
- Only available with **SR100GRF** S/R Profile.

Minimum Size: 6 5/8" x 6" [168.3mm x 152.4mm] after edgebanding.

EBT401 - Frame Only - NPC (Wood Veneer Edge - Machine Applied)

- Choose the Edgeband Application Sequence and/or Grain Direction.
- Only available with **D7** Outside Edge Profile.
- Only available with **MP612-57-NPC** or **MP612-76-NPC** Stile/Rail Profile.

Minimum Size: 6" x 6" [152.4mm x 152.4mm] after edgebanding.

EBT402 (1/8" [3.2mm] Solid Wood Edge - Machine Applied)

- Choose the Edgeband Application Sequence.
- Only available with **D7**, Outside Edge Profile.

Minimum Size: 3 1/4" x 3 1/4" [82.6mm x 82.6mm] after edgebanding.

► For PRICING ► See Section B.10 in our current Wholesale Pricing Catalog.

EBT403 (1/4" [6.4mm] Solid Wood Edge - Machine Applied)

- Choose the Edgeband Application Sequence.
- Only available with **D7**, Outside Edge Profile.

Minimum Size: 3 1/2" x 3 1/2" [88.9mm x 88.9mm] after edgebanding.

EBT501 (Solid Wood Edge - Hand Applied)

- Choose the Edgeband Application Sequence.
- Not all Outside Edge Profiles are available.
- Width of solid wood edge will vary based on chosen Outside Edge Profile.

Minimum Size: Varies based on chosen Outside Edge Profile.

EBT501 - Frame Only (Solid Wood Edge - Hand Applied)

- Choose the Edgeband Application Sequence.
- Not all Outside Edge Profiles are available.
- Width of solid wood edge will vary based on chosen Outside Edge Profile.
- Only available with **SR100GRF** S/R Profile.

Minimum Size: Varies based on chosen Outside Edge Profile.

EBT501 - Frame Only - NPC (Solid Wood Edge - Hand Applied)

- Choose the Edgeband Application Sequence.
- Not all Outside Edge Profiles are available.
- Width of solid wood edge will vary based on chosen Outside Edge Profile.
- Only available with **MP612-57-NPC** or **MP612-76-NPC** S/R Profile.

Minimum Size: Varies based on chosen Outside Edge Profile.

► For PRICING ► See Section B.10 in our current Wholesale Pricing Catalog.

EBT601 (Solid Wood Edge - Hand Applied)

- Not all Outside Edge Profiles are available.
- Width of solid wood edge will vary based on chosen Outside Edge Profile.

Minimum Size: Varies based on chosen Outside Edge Profile.

EBT601 - Frame Only (Solid Wood Edge - Hand Applied)

- Not all Outside Edge Profiles are available.
- Width of solid wood edge will vary based on chosen Outside Edge Profile.
- Only available with **SR100GRF S/R Profile**.

Minimum Size: Varies based on chosen Outside Edge Profile.

EBT601 - Frame Only - NPC (Solid Wood Edge - Hand Applied)

- Not all Outside Edge Profiles are available.
- Width of solid wood edge will vary based on chosen Outside Edge Profile.
- Only available with **MP612-57-NPC or MP612-76-NPC Stile/Rail Profile**.

Minimum Size: Varies based on chosen Outside Edge Profile.

► For PRICING ► See Section B.10 in our current Wholesale Pricing Catalog.

EBT701 (Solid Wood Edge - Hand Applied)

- Not all Outside Edge Profiles are available.
- Width of solid wood edge will vary based on chosen Outside Edge Profile.

Minimum Size: Varies based on chosen Outside Edge Profile. See Notes for more information.

EBT701 - Frame Only (Solid Wood Edge)

- Not all Outside Edge Profiles are available.
- Only available with **MP612-57GRF** or **MP612-76GRF** Stile/Rail Profile.

Minimum Size: 6" x 6" [152.4mm x 152.4mm] after edgebanding.

EBT701 - Frame Only - NPC (Solid Wood Edge)

- Not all Outside Edge Profiles are available.
- Only available with **MP612-57-NPC** or **MP612-76-NPC** Stile/Rail Profile.

Minimum Size: 6" x 6" [152.4mm x 152.4mm] after edgebanding.

► For PRICING ► See Section B.10 in our current Wholesale Pricing Catalog.

EBT801 (Solid Wood Edge - Hand Applied)

- Only available with **D182** Outside Edge Profile.

Minimum Size: 4¾" x 4¾" [120.7mm x 120.7mm] after edgebanding.

EBT801 - Frame Only (Solid Wood Edge - Hand Applied)

- Only available with **D182** Outside Edge Profile.
- Only available with **MP612-57GRF** or **MP612-76GRF** Stile/Rail Profile.

Minimum Size: 6" x 6" [152.4mm x 152.4mm] after edgebanding.

EBT801 - Frame Only - NPC (Solid Wood Edge - Hand Applied)

- Only available with **D182** Outside Edge Profile.
- Only available with **MP612-57-NPC** or **MP612-76-NPC** Stile/Rail Profile.

Minimum Size: 6" x 6" [152.4mm x 152.4mm] after edgebanding.

► For PRICING ► See Section **B.10** in our current Wholesale Pricing Catalog.

B

Solid Wood Edgebanding Visible from Face of Door: EBT202, EBT203, EBT501, EBT601

Face Veneer Grain / Cut	Edgeband Grain / Cut from Face	Edgeband Grain / Cut from Edge
Plain Sliced (PS) Veneer	Plain Sawn (PS) Solid Wood	Quarter Sawn (QS) Solid Wood
Rotary Cut (RC) Veneer	Plain Sawn (PS) Solid Wood	Quarter Sawn (QS) Solid Wood
Quarter Sawn (QS) Veneer	Quarter Sawn (QS) Solid Wood	Plain Sawn (PS) Solid Wood
Straight Grain (SG) Veneer	Straight Grain (SG) Solid Wood	Plain Sawn (PS) Solid Wood

*See Wood Species Options note for more information.

Solid Wood Edgebanding Not Visible from Face of Door: EBT402, EBT403, EBT701, EBT801

Face Veneer Grain / Cut	Edgeband Grain / Cut from Face	Edgeband Grain / Cut from Edge
Plain Sliced (PS) Veneer	N/A	Quarter Sawn (QS) Solid Wood
Rotary Cut (RC) Veneer	N/A	Quarter Sawn (QS) Solid Wood
Quarter Sawn (QS) Veneer	N/A	Plain Sawn (PS) Solid Wood
Straight Grain (SG) Veneer	N/A	Plain Sawn (PS) Solid Wood

*See Wood Species Options note for more information.

► For PRICING ► See Section B.10 in our current Wholesale Pricing Catalog.

Ordering & Pricing Notes: Style 60 Veneered & Edgebanded Doors & Drawer Fronts

Ordering Guidelines

1	Order Forms	Please use <i>Veneered & Edgebanded Door and Drawer Front Order Form (E•Z Form #7)</i> .
Pricing		
1	Pricing	Please see <i>Section B.10</i> of our current Wholesale Pricing Catalog .

Technical Notes: Style 60 Veneered & Edgebanded Doors & Drawer Fronts

Cabinet Door & Drawer Front Options (Chapter B)

1	Frame Only Doors	Not available with mullion lite patterns.
		Not available with center stiles or rails.
		GRF cut is designed to accept our rubber glass retainer. See <i>Section B.12</i> for more information.

Convex/Concave Options (Chapter D)

1	Available Products	The ☐ indicates that this product is available convex/concave. EBT201 and EBT401 are the only edgeband treatment options available. Frame only doors not available convex/concave.
2	Edgebanding	In the case of convex/concave doors and drawer fronts, the edgebanding will be hand applied.
		Lineal grain direction on the top and bottom edge of a convex/concave door will run in a straight line. The grain will not follow the radius.

Dealer Aid Options (Chapter T)

1	Finished Color Blocks	See <i>Dealer Aid Section T.1</i> for finished color samples.
---	-----------------------	---

Design Options (Chapter G)

1	Grain and Color Coordination	Grain and Color Coordination is an option for veneer doors. WalzCraft only offers this option in conjunction with EBT201 . EBT201 Frame Only doors are <u>not</u> available with Grain and Color Coordination. Please see <i>Section G.17</i> for more information.
---	------------------------------	---

Finish Options (Chapter R)

1	Rub Through	EBT701 is the only option that allows Rub Through. Please see <i>Section R.4</i> for more information on our Rub Through options.
2	SolidTone®	Certain Edgeband Treatment options are recommended when a SolidTone® finish will be applied on MDF or MDF - MR (Moisture Resistant), NAF, Raw Doors and Drawer Fronts with a D7 Outside Edge Profile. See EBT102 and EBT103 notes.

Functional Options (Chapter F)

1	Finger Pull Routs FP100 & FP200	Only available with the EBT101 and EBT701 . When using the EBT701 , the edgeband width must be at least ½" [12.7mm].
2	Finger Pull Moldings	Finger Pull Moldings <i>can only be used</i> with EBT options if using a D7 outside edge profile. Not all EBT options are compatible. Please see the EBT - Fingerpull Molding Compatibility chart on our website: Resources/Technical Information .
3	Hinge Boring	Hinge boring is available for Style 60 Veneered & Edgebanded doors & drawer fronts. Please see <i>Section F.1</i> for additional hinge boring requirements, ordering instructions and compatibility.

General Information (Chapter A)

1	Grain Direction	Arrows (↔) throughout the catalog indicate standard grain direction. Grain direction may be specified at NO additional cost (includes frame only door).
2	Horizontal Grain	If your project is being ordered with Horizontal grain and there are multiple doors and/or drawer fronts adjacent to each other, WalzCraft strongly suggests that you consider using one of our Grain and Color Coordination options. Some kitchen layouts that utilize Grain and Color Coordination may require veneer that is longer than what we normally keep in inventory. Please supply WalzCraft with a drawing or sketch of how the doors and drawer fronts are arranged on your project. WalzCraft will review the material requirements and prepare a quote. Please see <i>Section G.17</i> for more information.
3	Ready to Assemble	Ready to Assemble (RTA) is <i>not</i> an option.

Continued on next page...

► For PRICING ► See Section B.10 in our current Wholesale Pricing Catalog.

Technical Notes: Style 60 Veneered & Edgedbanded Doors & Drawer Fronts...continued

Material Options

1	Hardwood Veneer	"A" grade (wood back) hardwood veneer on the face with a #1 grade (wood back) veneer on the back.
2	MDF Core	MDF material is visible on the outside edge profile, if left raw (EBT101). This will generally appear darker than the face or back of the door when pre-finished.
3	Combi-Core	<p>¾" thick Style 60 doors and drawer fronts are also available with a Combi-Core. See <i>Section K.1</i> for more information on Combi-Core.</p> <ul style="list-style-type: none"> • Available with all EBT options for ¾" thickness. • Not available with pre-applied veneer. • Frame-only options will still be made from solid wood.
4	Reconstituted Veneer	See <i>Section B.II</i> for Style 60 doors using Architectural Grade Reconstituted Veneers .

Miscellaneous

1	Edgeband Application Sequence	WalzCraft's standard will be to apply the edgebanding to the four edges in the following order: Top, Bottom, Left, Right . You can, however, deviate from this application and specify the order in which the edgebanding material is to be applied. Additional charges may apply when deviating from WalzCraft's standard. See <i>Section B.10</i> of our current Wholesale Pricing Catalog .
2	Edgeband Grain Direction	WalzCraft's standard will be to apply the wood veneer edgebanding in a Lineal direction. Front to Back grain direction for each edge is also an option and is limited to EBT401 only . Front to Back grain direction is also limited to a maximum length of 48". Additional charges may apply if deviating from WalzCraft's standard. See <i>Section B.10</i> of our current Wholesale Pricing Catalog .

Profile Options (Chapter E)

1	EBT100	Wood veneer on face and back, ⅙" [14.5mm] thick only. EBT100 is only available when using one of the following Applied Molding Outside Edge profiles for ⅙" thick Veneered & Edgedbanded doors: D68AM, D94AM, D99AM, D100AM, D111AM, D113AM, D121AM, D122AM, D136AM, D142AM, D150AM, D171AM, D173AM, D177AM, D197AM, D206AM .
2	EBT101	Slab: Raw edge, wood veneer on face and back. Available with a D7 outside edge profile (<i>Section E.15</i>).
		Frame Only: Raw edge, solid wood frame with veneer on the face and back. Available with a D7 Outside Edge profile. Only available with SR100GRF Stile/Rail profile.
		Frame Only-NPC: Raw edge, MDF frame with veneer on the face and back. Available with a D7 Outside Edge profile. Only available with MP612-57-NPC or MP612-76-NPC Stile/Rail profiles.
		EBT101 is also available with the following Applied Molding Outside Edge profiles for ¾" thick Veneered & Edgedbanded doors: D80AM, D114AM, D132AM, D155AM, D159AM, D179AM, D198AM, D202AM, D209AM, D211AM, D212AM, D215AM .
3	EBT102	EBT101 is available 1" thick only when using one of the following Applied Molding Outside Edge profiles for 1" thick Veneered & Edgedbanded doors: D188AM, D189AM, D193AM, D196AM . See notes for <i>Sizes/Dimensions - Thickness</i> for actual finished thickness.
		Maple wood veneer edgebanding, machine applied to a raw MDF panel. No veneer on face or back. Only available with a D7 Outside Edge profile.
4	EBT103	This edgebanding option is recommended when a SolidTone® finish will be applied on MDF or MDF - MR (Moisture Resistant), NAF, Raw Doors and Drawer Fronts with a D7 Outside Edge Profile.
		½" [3.2mm] solid maple edgebanding, butt joinery at corners, machine applied to a raw MDF panel. No veneer on face or back. Only available with the following standard Outside Edge profiles from <i>Section E.15</i> : D7, D33, D66, D147 .
5	EBT201	This edgebanding option is recommended when a SolidTone® finish will be applied on MDF or MDF - MR (Moisture Resistant), NAF, Raw Doors and Drawer Fronts with a D7 Outside Edge Profile.
		Slab: Wood veneer edgebanding, machine applied to a panel with veneer on the face and back. Only available with a D7 Outside Edge profile.
		Frame Only: Wood veneer edgebanding, machine applied to a solid wood frame with veneer on the face and back. Only available with a D7 Outside Edge profile. Only available with SR100GRF Stile/Rail profile.
		Frame Only-NPC: Wood veneer edgebanding, machine applied to an MDF frame with veneer on the face and back. Only available with a D7 Outside Edge profile. Only available with MP612-57-NPC or MP612-76-NPC Stile/Rail profiles.

Profile Options (Chapter E)...continued

6	EBT202	<p>Slab: 1/8" [3.2mm] solid wood edge, butt joinery at corners, machine applied to panel with veneer on the face & back. Only available with the following standard Outside Edge profiles from <i>Section E.15</i>: D7, D33, D66, D147.</p>
		<p>Frame Only: 1/8" [3.2mm] solid wood edge, butt joinery at corners, machine applied to solid wood frame with veneer on the face & back. Only available with the following standard Outside Edge profiles from <i>Section E.15</i>: D7, D33, D66, D147. Only available with SR100GRF Stile/Rail profile.</p>
		<p>Frame Only-NPC: 1/8" [3.2mm] solid wood edge, butt joinery at corners, machine applied to an MDF frame with veneer on the face & back. Only available with the following standard Outside Edge profiles from <i>Section E.15</i>: D7, D33, D66, D147. Only available with MP612-57-NPC or MP612-76-NPC Stile/Rail profiles.</p>
7	EBT203	<p>Slab: 1/4" [6.4mm] solid wood edge, butt joinery at corners, machine applied to panel with veneer on the face & back. Only available with the following standard Outside Edge profiles from <i>Section E.15</i>: D7, D32, D33, D51, D66, D147.</p>
		<p>Frame Only: 1/4" [6.4mm] solid wood edge, butt joinery at corners, machine applied to solid wood frame with veneer on the face & back. Only available with the following standard Outside Edge profiles from <i>Section E.15</i>: D7, D32, D33, D51, D66, D147. Only available with SR100GRF Stile/Rail profile.</p>
		<p>Frame Only-NPC: 1/4" [6.4mm] solid wood edge, butt joinery at corners, machine applied to an MDF frame with veneer on the face & back. Only available with the following standard Outside Edge profiles from <i>Section E.15</i>: D7, D32, D33, D51, D66, D147. Only available with MP612-57-NPC or MP612-76-NPC Stile/Rail profiles.</p>
8	EBT401	<p>Slab: Wood veneer edgebanding, machine applied to a raw MDF panel. Face and back veneer is applied after edgebanding. Only available with a D7 Outside Edge profile.</p>
		<p>Frame Only: Wood veneer edgebanding, machine applied to a solid wood frame. Face and back veneer is applied after edgebanding. Only available with a D7 Outside Edge profile. Only available with SR100GRF Stile/Rail profile.</p>
		<p>Frame Only-NPC: Wood veneer edgebanding, machine applied to an MDF frame. Face and back veneer is applied after edgebanding. Only available with a D7 Outside Edge profile. Only available with MP612-57-NPC or MP612-76-NPC Stile/Rail profiles.</p>
9	EBT402	<p>Slab: 1/8" [3.2mm] solid wood edge, butt joinery at corners, machine applied to a raw MDF panel. Face and back veneer is applied after edgebanding. Only available with a D7 Outside Edge profile.</p>
10	EBT403	<p>Slab: 1/4" [6.4mm] solid wood edge, butt joinery at corners, machine applied to a raw MDF panel. Face and back veneer is applied after edgebanding. Only available with a D7 Outside Edge profile.</p>
11	EBT501	<p>Slab: Solid wood edge of variable width, butt joinery at corners, hand applied (tongue & groove joint) to a panel with veneer on the face and back.</p>
		<p>Frame Only: Solid wood edge of variable width, butt joinery at corners, hand applied (tongue & groove joint) to a solid wood frame with veneer on the face and back. Only available with SR100GRF Stile/Rail profile.</p>
		<p>Frame Only-NPC: Solid wood edge of variable width, butt joinery at corners, hand applied (tongue & groove joint) to an MDF frame with veneer on the face and back. Only available with MP612-57-NPC or MP612-76-NPC Stile/Rail profiles.</p>
		<p>Width of solid wood edge varies from 3/8" [9.5mm] to a maximum of 1 1/4" [31.8mm], in 1/8" [3.2mm] increments and is determined by your chosen outside edge profile. Standard width is 3/8" [9.5mm]. Available with all standard Outside Edge profiles from <i>Section E.15</i> except: D72, D138, D152. For your reference, you can also access the Profile-Reveal Widths chart on our website: Resources / Technical Information.</p>
		<p>For solid wood edges that are fixed at 1/8" or 1/4" wide, please see EBT202, EBT203, EBT402 or EBT403.</p>
12	EBT601	<p>Slab: Solid wood edge of variable width, with mitered corners, hand applied (tongue & groove joint) to a panel with veneer on the face and back.</p>
		<p>Frame Only: Solid wood edge of variable width, with mitered corners, hand applied (tongue & groove joint) to a solid wood frame with veneer on the face and back. Only available with SR100GRF Stile/Rail profile.</p>
		<p>Frame Only-NPC: Solid wood edge of variable width, with mitered corners, hand applied (tongue & groove joint) to an MDF frame with veneer on the face and back. Only available with MP612-57-NPC or MP612-76-NPC Stile/Rail profiles.</p>
		<p>Width of solid wood edge varies from 3/8" [9.5mm] to a maximum of 1 1/4" [31.8mm], in 1/8" [3.2mm] increments and is determined by the chosen outside edge profile. Standard width is 3/8" [9.5mm]. Available with all standard Outside Edge profiles from <i>Section E.15</i> except: D72, D138, D152. For your reference, you can also access the Profile-Reveal Widths chart on our website: Resources / Technical Information.</p>
		<p>For solid wood edges that are fixed at 1/8" or 1/4" wide, please see EBT202, EBT203, EBT402 or EBT403.</p>

Technical Notes: Style 60 Veneered & Edgebanded Doors & Drawer Fronts...continued

Wood Species Options (Chapter S)

1	EBT102, EBT201, EBT201-F, EBT401, EBT401-F	Not all veneer used for the face and back of these doors have a matching veneer edgeband species. Please see “ <i>Edgebanding Species for EBT Style 60</i> ” chart on our website under Resources / Technical Information to find which species of veneer edgebanding will be used with the various species of face / back veneer.
2	Solid Wood Edgebanding	Due to the nature of solid wood, when preparing a piece of solid wood edgebanding to apply to the edge of a door, the face and back surfaces of the individual solid wood piece will have a plain sawn grain pattern, and the remaining surfaces of the piece (at a 90° angle to the face and back), will have a different grain pattern, such as quarter sawn or straight grain. <ul style="list-style-type: none"> • See earlier page within this section for images of the orientation of that piece of edgebanding in relation to the face veneer on the door. This will show you which grain pattern will be visible from the face of the completed door and which grain pattern will be visible from the edge of the completed door.
3	Bamboo - Frame Only	<p>EBT201 - Frame Only doors and drawer fronts will use Wood Veneer edgebanding, machine applied to an MDF frame with veneer on the face and back. In addition to the standard treatment, there will be a partially banded inside edge. This layout will match EBT201-R - Frame Only, found in Section B.II.</p> <p>EBT401 - Frame Only doors and drawer fronts will use Wood Veneer edgebanding, machine applied to a raw MDF frame. In addition to the standard treatment, there will be a partially banded inside edge. This layout will match EBT401-R - Frame Only, found in Section B.II. Face and back veneer is applied after edgebanding.</p>

Veneered & Edgebanded - Standard Veneer - END

► For PRICING ► See Section B.10 in our current Wholesale Pricing Catalog.

Style 60 - Architectural Grade/Reconstituted/Composite Veneer

Architectural Grade/Reconstituted/Composite Veneer is a wood veneer produced using a fast growing tropical wood species, often times *Obeche*, along with Poplar, as well. The veneers are dyed and laid up to "mimic" the look of a particular specie. The veneer sheets are made by laminating a block of veneer leaves together. The block is then sliced so that the edges of the laminated leaves become the "grain" of the composite veneer. This veneer is relatively defect free and has outstanding color and grain consistency from sheet to sheet. This product is intended for a more contemporary look. If consistency in grain or color is important for individual doors and/or drawer fronts that will be installed directly above or below one another, we highly recommend utilizing one of WalzCraft's Grain and Color Coordination options (see *Section G.17* for more information). Suitable for Natural/Clear Coat (*no stain*) and light stain colors. **We recommend that you view a sample on our website at WalzCraft.com, click on the Resources tab, or order a sample for your own use.**

**Style: 60**

PC: Variable

Frame: See 60F Frame Only

**Style: 60F Frame Only**

PC: Variable

**Style: 60 Drawer Front**

PC: Variable

Frame: See 60F Frame Only

Step 1) Choose your Reconstituted Edgeband Treatment Option.

- a. The Edgeband Treatment option defines the sequence and application for face veneer, back veneer and edgebanding material.
- b. An "R" is used at the end of the Edgeband Treatment Option # to differentiate between the use of a Standard Veneer Edgeband and a Reconstituted Veneer Edgeband. Reconstituted Veneer Edgeband Treatment options are denoted as: **EBT101-R, EBT201-R, EBT401-R, EBT901-R, EBT902-R.**

Step 2) Choose your **Edgeband Application Sequence** (ex: Top, Bottom, Left, Right).

Step 3) Choose the Edgeband grain direction (**EBT401-R** only).

Step 4) Choose your wood species and finish option.

► **For PRICING** ► See *Section B.11* in our current Wholesale Pricing Catalog.

Edgeband Application Sequence (Top, Bottom, Left, Right)

- Choose the order in which the edgeband material is applied to the edges.
- WalzCraft's standard will be to apply the top edge first, bottom edge second, left edge third and right edge last.

Grain and Color Coordination - Reconstituted Wood Veneer

- Upon request, WalzCraft will manufacture Reconstituted wood veneer components using one of two possible Grain and Color Coordination options. Additional custom engineering charges will be applied. To inquire, please contact our Customer Support Team.
- Drawings and order details may be emailed to: customersupport@WalzCraft.com
- Please see *Section G.17* for more information.

Edgeband Grain Direction (Lineal or Front to Back)

Choose the grain direction of each edge independently of one another. WalzCraft's standard will be to apply the edgebanding in a lineal direction (EBGD100). Applies to Reconstituted Wood Veneer edgebanding only (Limited to EBT401-R).

Example of horizontal grain on face, with lineal grain direction on top, bottom, left & right.

Example of horizontal grain on face, with lineal grain direction on top & bottom and front to back grain direction on left & right.

Example of horizontal grain on face, with front to back grain direction on top, bottom, left & right.

Example of vertical grain on face, with front to back grain direction on top & bottom and lineal grain direction on left & right.

► For PRICING ► See Section B.11 in our current Wholesale Pricing Catalog.

EBT101-R (Raw Edge)

Minimum Size: 3" x 3" [76.2mm x 76.2mm]

- Only available with **D7** Outside Edge Profile.

EBT201-R (Wood Veneer Edge - Machine Applied)

Minimum Size: 3" x 3" [76.2mm x 76.2mm] after edgebanding.

- Choose the Edgeband Application Sequence.
- Only available with **D7** Outside Edge Profile.

EBT201-R - Frame Only (Wood Veneer Edge - Machine Applied)

Minimum Size: 6" x 6" [152.4mm x 152.4mm] after edgebanding.

- Choose the Edgeband Application Sequence.
- Only available with **D7** Outside Edge Profile.
- Only available with **MP612-57GRF** or **MP612-76GRF** Stile/Rail Profile.

EBT201-R - Frame Only - NPC (Wood Veneer Edge - Machine Applied)

Minimum Size: 6" x 6" [152.4mm x 152.4mm] after edgebanding.

- Choose the Edgeband Application Sequence.
- Only available with **D7** Outside Edge Profile.
- Only available with **MP612-57-NPC** or **MP612-76-NPC** Stile/Rail Profile.

► For PRICING ► See Section B.11 in our current Wholesale Pricing Catalog.

EBT401-R (Wood Veneer Edge - Machine Applied)

→ || ← 1/32" [0.6mm]

- Choose the Edgeband Application Sequence.
- Choose the Edgeband Grain Direction.
- Only available with **D7** Outside Edge Profile.

Minimum Size: 3" x 3" [76.2mm x 76.2mm] after edgebanding.

EBT401-R - Frame Only (Wood Veneer Edge - Machine Applied)

- Choose the Edgeband Application Sequence and/or Grain Direction.
- Only available with **D7** Outside Edge Profile.
- Only available with **MP612-57GRF** or **MP612-76GRF** Stile/Rail Profile.

Minimum Size: 6" x 6" [152.4mm x 152.4mm] after edgebanding.

EBT401-R - Frame Only - NPC (Wood Veneer Edge - Machine Applied)

- Choose the Edgeband Application Sequence and/or Grain Direction.
- Only available with **D7** Outside Edge Profile.
- Only available with **MP612-57-NPC** or **MP612-76-NPC** Stile/Rail Profile.

Minimum Size: 6" x 6" [152.4mm x 152.4mm] after edgebanding.

► For PRICING ► See Section B.11 in our current Wholesale Pricing Catalog.

EBT901-R (Wood Veneer Edge - Hand Applied)

- Choose the Edgeband Application Sequence.
- Only available with **D182** Outside Edge Profile.

Minimum Size: 4¾" x 4¾" [120.7mm x 120.7mm] after edgebanding.

EBT901-R - Frame Only (Wood Veneer Edge - Hand Applied)

- Choose the Edgeband Application Sequence.
- Only available with **D182** Outside Edge Profile.
- Only available with **MP612-57GRF** or **MP612-76GRF** Stile & Rail Profile.

Minimum Size: 6" x 6" [152.4mm x 152.4mm] after edgebanding.

EBT901-R - Frame Only - NPC (Wood Veneer Edge - Hand Applied)

- Choose the Edgeband Application Sequence.
- Only available with **D182** Outside Edge Profile.
- Only available with **MP612-57-NPC** or **MP612-76-NPC** Stile & Rail Profile.

Minimum Size: 6" x 6" [152.4mm x 152.4mm] after edgebanding.

EBT902-R (Wood Veneer Edge - Hand Applied)

- Only available with **D62** OSE on left & right edge.
- Only available with **D7** OSE on top & bottom edge.

Minimum Size: 4¾" x 4¾" [120.7mm x 120.7mm] after edgebanding.

► For PRICING ► See Section B.II in our current Wholesale Pricing Catalog.

EBT902-R - Frame Only (Wood Veneer Edge - Hand Applied)

- Only available with **D62** OSE on left & right edge.
- Only available with **D7** OSE on top & bottom edge.
- Only available with **MP612-57GRF** or **MP612-76GRF** Stile/Rail Profile.

Minimum Size: 6" x 6" [152.4mm x 152.4mm] after edgebanding.

EBT902-R - Frame Only - NPC (Wood Veneer Edge - Hand Applied)

- Only available with **D62** OSE on left & right edge.
- Only available with **D7** OSE on top & bottom edge.
- Only available with **MP612-57-NPC** or **MP612-76-NPC** Stile/Rail Profile.

► For PRICING ► See Section B.11 in our current Wholesale Pricing Catalog.

Ordering & Pricing Notes: Veneered & Edgebanded - Reconstituted Veneer**Ordering Guidelines**

1	Order Forms	Please use <i>Veneered & Edgebanded Door and Drawer Front Order Form (E•Z Form #7)</i> .
---	-------------	--

Pricing

1	Pricing	Please see <i>Section B.II</i> of our current Wholesale Pricing Catalog .
---	---------	--

Technical Notes: Veneered & Edgebanded - Reconstituted Veneer**Cabinet Door & Drawer Front Options (Chapter B)**

1	Frame Only Doors	Not available with mullion lite patterns.
		Not available with center stiles or rails.
		GRF cut is designed to accept our rubber glass retainer. See <i>Section B.12</i> for more information.

Convex/Concave Options (Chapter D)

1	Available Products	The <input type="checkbox"/> indicates that this product is available Convex/Concave. EBT201-R and EBT401-R are the only Edgeband Treatment options available when using Reconstituted wood veneers.
		Frame only doors are not available in Convex/Concave construction.
2	Edgebanding	In the case of Convex/Concave doors and drawer fronts, the edgebanding will be hand applied.
		Lineal grain direction on the top and bottom edge of a Convex/Concave door will run in a straight line. The grain will not follow the radius.

Dealer Aid Options (Chapter T)

1	Unfinished Sample Set	Set includes one unfinished 3 $\frac{3}{8}$ " x 5 $\frac{1}{4}$ " [92.1mm x 133.4mm] paper back Reconstituted veneer sample in each of our available wood species. See <i>Dealer Aids Section T.1</i> .
2	Finished Color Blocks	See <i>Dealer Aid Section T.1</i> for finished color samples.

Design Options (Chapter G)

1	Grain & Color Coordination	Grain and Color Coordination is an option for veneer doors. WalzCraft only offers this option in conjunction with EBT201-R . EBT201-R Frame Only doors are <u>not</u> available with Grain and Color Coordination. Please see <i>Section G.17</i> for more information.
---	----------------------------	---

Functional Options (Chapter F)

1	Hinge Boring	Hinge boring is available for Style 60 Veneered & Edgebanded - Reconstituted Veneer doors & drawer fronts. Please see <i>Section F.1</i> for additional hinge boring requirements, ordering instructions and compatibility.
2	Finger Pull Moldings	Finger Pull Moldings <i>can only be used</i> with EBT options if using a D7 outside edge profile.
		Not all EBT options are compatible. Please see the EBT - Fingerpull Molding Compatibility chart on our website: Resources / Technical Information .

General Information (Chapter A)

1	Grain Direction	Arrows ($\leftarrow\rightarrow$) throughout the catalog indicate standard grain direction. Grain direction may be specified at NO additional cost (includes frame only doors).
2	Horizontal Grain	If your project is being ordered with Horizontal grain and there are multiple doors and/or drawer fronts adjacent to each other, WalzCraft strongly suggests that you consider using one of our Grain and Color Coordination options. Some kitchen layouts that utilize Grain and Color Coordination may require veneer that is longer than what we normally keep in inventory. Please supply WalzCraft with a drawing or sketch of how the doors and drawer fronts are arranged on your project. WalzCraft will review the material requirements and prepare a quote. Please see <i>Section G.17</i> for more information.
3	Ready to Assemble	Ready to Assemble (RTA) is <i>not</i> available as an option.

Material Options

1	Reconstituted Veneer	Reconstituted Veneer (paper back) on face, back and edges.
2	MDF Core	MDF material is visible on the outside edge profile, if left raw (EBT101). This will generally appear darker than the face or back of the door when pre-finished.
3	Combi-Core	<p>$\frac{3}{4}$" thick Reconstituted Veneer Style 60 doors and drawer fronts are also available with a Combi-Core. See <i>Section K.1</i> for more information on Combi-Core.</p> <ul style="list-style-type: none"> • Available with EBT101-R, EBT201-R and EBT401-R for $\frac{3}{4}$" thickness. • Not available with Frame-only options.

► For **PRICING** ► See *Section B.II* in our current Wholesale Pricing Catalog.

Technical Notes: Veneered & Edged - Reconstituted Veneer...continued

Miscellaneous

1	Edgeband Application Sequence	WalzCraft's standard will be to apply the edgebanding to the four edges in the following order: Top, Bottom, Left, Right . You can however deviate from this application and specify the order in which the edgebanding material is to be applied. Additional charges may apply when deviating from WalzCraft's standard. See <i>Section B.II</i> of our current Wholesale Pricing Catalog.
2	Edgeband Grain Direction	WalzCraft's standard will be to apply the wood veneer edgebanding in a Lineal direction (EBGD100). Front to Back grain direction for each edge is also an option and is limited to EBT401 only . Front to Back grain direction is also limited to a maximum length of 48" [1219.2mm]. Additional charges may apply if deviating from WalzCraft's standard. See <i>Section B.II</i> of our current Wholesale Pricing Catalog.

Profile Options (Chapter E)

1	EBT101-R	Raw Edge, Reconstituted wood veneer on face and back of MDF panel. Only available with a D7 outside edge.
2	EBT201-R	Slab: Reconstituted wood veneer edgebanding, machine applied to an MDF panel with veneer on the face and back. Only available with a D7 outside edge.
		Frame Only: Reconstituted wood veneer edgebanding, machine applied to an MDF frame with veneer on the face and back. Mitered corners. Only available with a D7 outside edge. Only available with MP612-57GRF or MP612-76GRF Stile/Rail profile. If stile widths differ from rail widths, traditional mortise & tenon construction will be used.
		Frame Only-NPC: Reconstituted wood veneer edgebanding, machine applied to an MDF frame with veneer on the face and back. Mitered corners. Only available with a D7 outside edge. Only available with MP612-57-NPC or MP612-76-NPC Stile/Rail profile. If stile widths differ from rail widths, traditional mortise & tenon construction will be used.
3	EBT401-R	Slab: Reconstituted wood veneer edgebanding, machine applied to a raw MDF panel. Face and back veneer is applied after edgebanding. Only available with a D7 outside edge.
		Frame Only: Reconstituted wood veneer edgebanding, machine applied to a raw MDF frame. Face and back veneer is applied after edgebanding. Mitered corners. Only available with a D7 outside edge. Only available with MP612-57GRF or MP612-76GRF Stile/Rail profile. If stile widths differ from rail widths, traditional mortise & tenon construction will be used.
		Frame Only-NPC: Reconstituted wood veneer edgebanding, machine applied to a raw MDF frame. Face and back veneer is applied after edgebanding. Mitered corners. Only available with a D7 outside edge. Only available with MP612-57-NPC or MP612-76-NPC Stile/Rail profile. If stile widths differ from rail widths, traditional mortise & tenon construction will be used.
4	EBT901-R	Pillow Edge Paper Back Veneered Door - Slab: D182 outside edge profile applied to raw MDF panel. Face and back reconstituted veneer is then applied, running veneer to the edge of door and following the contour of the D182 . Veneer edgbanding hand applied after face & back veneer.
		Pillow Edge Paper Back Veneered Door - Frame Only: Raw MDF frame with mitered corners. D182 outside edge profile applied. Face and back reconstituted veneer is then applied, running veneer to the edge of door and following the contour of the D182 . Veneer edgbanding hand applied to outside edge after face & back veneer. Only available with MP612-57GRF or MP612-76GRF Stile/Rail profile. If stile widths differ from rail widths, traditional mortise & tenon construction will be used.
		Pillow Edge Paper Back Veneered Door - Frame Only-NPC: Raw MDF frame with mitered corners. D182 outside edge profile applied. Face and back reconstituted veneer is then applied, running veneer to the edge of door and following the contour of the D182 . Veneer edgbanding hand applied to outside edge after face & back veneer. Only available with MP612-57-NPC or MP612-76-NPC Stile/Rail profile. If stile widths differ from rail widths, traditional mortise & tenon construction will be used.
5	EBT902-R	Slab: D62 outside edge profile is applied to left and right edge of raw MDF panel. Top and bottom edge are left square. Reconstituted veneer applied to back, then to front, which wraps the D62 on the left and right edge. Veneer edgbanding hand applied to top and bottom edge after face & back veneer.
		Frame Only: Raw MDF frame with mitered corners. D62 outside edge profile applied to left and right edge of frame. Top and bottom edge are left square. Reconstituted veneer applied to back, then to front, which wraps the D62 on the left and right edges. Veneer edgbanding hand applied to top and bottom edge after face & back veneer. Only available with MP612-57GRF or MP612-76GRF stile & rail profile. If stile widths differ from rail widths, traditional mortise & tenon construction will be used.
		Frame Only: Raw MDF frame with mitered corners. D62 outside edge profile applied to left and right edge of frame. Top and bottom edge are left square. Reconstituted veneer applied to back, then to front, which wraps the D62 on the left and right edges. Veneer edgbanding hand applied to top and bottom edge after face & back veneer. Only available with MP612-57-NPC or MP612-76-NPC Stile/Rail profile. If stile widths differ from rail widths, traditional mortise & tenon construction will be used.

Formula for Glass Size Calculation

1) Formula used to calculate the width/height of rectangular shaped glass to fit a single opening WalzCraft frame with straight stile and rail parts (does not include French Miter doors):

- Glass Width = [Door Width - (stile width x 2)] + [$\frac{3}{8}$ " (GRF width) x 2] - [$\frac{1}{16}$ " (Frame/Glass Gap Width) x 2]
- Glass Height = [Door Height - (rail width x 2)] + [$\frac{3}{8}$ " (GRF width) x 2] - [$\frac{1}{16}$ " (Frame/Glass Gap Width) x 2]

2) To calculate the width/height of rectangular shaped glass to fit a frame provided by another source, or a WalzCraft frame with multiple openings with straight stile and rail parts:

- From the back side of your frame, measure the frame cavity opening (width & height) where the glass will set into the frame.
- Deduct $\frac{1}{8}$ " ($\frac{1}{16}$ " frame/glass gap width x 2) from your width and height dimension.

*See *Sizes/Dimensions* notes for frame & mullion doors later in this section for more information on calculating glass sizes.

*See notes in *Section B.7* to calculate glass sizes for French Mitered door frames.

Half Lap Mullion Construction

The examples to the right show our half lap mullion joinery detail.

Half Lap Mullion construction provides a stronger joint and is standard for most Stile and Rail profiles that have matching mullion stock options.

Rubber Glass Retainer

- Please see *Section B.12* of our current **Wholesale Pricing Catalog** for glass retainer lineal foot pricing.
- Glass retainer fits into a slot, as shown in the drawing above, and can only be used with $\frac{1}{8}$ " [3.2mm] glass.
- True Lite mullions are not constructed with a slot to accept rubber glass retainer.
- Glass retainer is available in black, brown, white and clear.
- To order retainer with a frame only door, simply check the box on *Door Order Form #2* indicating which color you would like and our Configurator will calculate the amount needed.
- To order retainer by itself, please use *Miscellaneous Order Form #5* and part #155067. Simply enter the color into the *Description* field, and then enter the total required amount of lineal feet into the *quantity* field (qty).
 - You may order the glass retainer by the lineal foot or in full rolls (both are priced the same).
 - White is available in 500 foot rolls.
 - Black, brown and clear are available in 1,000 foot rolls.
- Occasionally, due to the rubber retainer manufacturing process/tolerances, you may find that your retainer is slightly loose in an area. Should this occur, WalzCraft recommends adding a small bead of glue or caulk in this spot to help secure the retainer.

► For PRICING ► See Section B.12 in our current Wholesale Pricing Catalog.

Mullion Lite Option 1 - Standard Lite

Mullion Lite Option 2 - True Lite with Divider Molding

Mullion Lite Option 3 - True Lite Retainer Groove (TLRG)

Ⓢ = WalzCraft recommends using silicone caulk to secure the wood retainer molding and/or glass. Please see *Notes* for more information.

► For PRICING ► See Section B.12 in our current Wholesale Pricing Catalog.

Pricing		
1	Pricing	Please see <i>Section B.12</i> of our current Wholesale Pricing Catalog .

Technical Notes: Cut to Size Wood Retainer Molding

Miscellaneous

1	Silicone	<p>Ⓢ = WalzCraft recommends using clear silicone caulk in a small tube. The small capacity tube makes application easier than if using a large caulking gun.</p> <ul style="list-style-type: none"> • Silicone caulk is adhesive enough to hold your molding or glass in place, but flexible enough to allow you to break the bond and peel away the silicone caulk in case the molding or glass needs to be replaced for any reason. <p>When working with True Lites with Divider Molding (<i>see Mullion Lite Option 2</i>), WalzCraft recommends applying a continuous bead of silicone caulk around the perimeter of the glass.</p> <p>When using the True Lite Retainer Groove method (<i>see Mullion Lite Option 3</i>), WalzCraft recommends applying a small dab of silicone caulk approximately every six inches into the grooves before inserting the retainer molding.</p>
---	----------	--

Molding Options (Chapter N)

1	Cut to Size Wood Retainer Moldings	<p>Wood retainer molding, as shown on the previous page, can be cut to size by WalzCraft when ordered in conjunction with a frame only or frame & mullion door.</p> <ul style="list-style-type: none"> • Indicate your chosen wood retainer molding number in the <i>Special Instructions</i> column on the order form. <p>Wood retainer molding can be used in place of rubber retainer in straight stile and rail parts.</p> <p>All GRF "Traditional" and "Mitered" stile and rail profiles will accept wood retainer moldings in frame price classes 101, 103, 108, 115, 117, 132, 301 and 303.</p> <p>You may pin precision cut wood retainer molding in place to create a stationary panel for combination frame and panel doors. (<i>Rubber retainer can be used to install glass in the frame portion.</i>)</p> <p>See <i>Section N.9</i> for 8' lengths of wood retainer molding.</p>
2	#1036, #1120, #3094 Wood Retainer Molding	<p>Designed for use as a wood retainer molding that is fastened to the rear of the frame and can be trimmed to size. See <i>Wood Retainer Molding Compatibility</i> chart on our website: Resources/Technical Information for which molding to used based on glass thickness (1/8" or 1/4"), door thickness and panel plow groove cut placement (PPGC).</p> <p>Cut to Size: When ordered cut to size, WalzCraft will cut molding to length, but <i>customer will be responsible for trimming/sanding molding to required thickness.</i></p>
3	#1246 GRF Wood Filler Molding	<p>The illustration shows an example of how this molding fits into the GRF groove of the stile and rail profile.</p> <p>Designed to fill the void for the GRF groove in the stiles and rails of frame and mullion doors.</p> <p>For use with 3/4" [19.3mm] or 1" [25.4mm] thick doors.</p>
4	#1312 Wood Tenon Filler Molding	<p>The illustration shows an example of how this molding fits into the mortise of the stile and rail profile.</p> <p>Designed to fill the mortise PPGC (Panel Plow Groove Cut) of any stile and rail profile for your custom frame requirements.</p> <p>For use with 3/4" [19.3mm] or 1" [25.4mm] thick doors.</p>
5	#1317, #1329, #2369, #2671, #2871 Wood Retainer Molding	<p>Fit into the GRF cut of the stile and rail profile and are designed to be used with 1/8" [3.2mm] materials.</p> <p>Cut to Size: When ordered cut to size, WalzCraft will cut molding to length, and trim/sand molding flush to back of door where applicable.</p>
6	#2090 Wood Retainer Molding	<p>Designed for use as a wood retainer molding to accommodate 1/4" [6.4mm] material for use with 1" [25.4mm] thick frames.</p>
7	#2933, #3041, #3042 Wood Retainer Molding for True Lite Retainer Groove	<p>Designed to be used as a wood retainer molding for true divided mullion lites.</p> <p>Only available with the following mullion lite patterns: LP001, LP108, LP109, LP110, LP118, LP128, LP131, LP146, LP147.</p> <p>Please submit requests for this application to our Customer Support Team.</p>
8	#2671 Wood Retainer Molding	<p>Fit into the GRF cut of the stile and rail profile and is designed to be used with 1/8" [3.2mm] materials.</p> <p>Designed for use with:</p> <ul style="list-style-type: none"> • Traditional stile & rail GRF profiles: SR123, SR145, SR146, SR157, SR160, SR163, SR167, SR169. • Mitered stile & rail GRF profile families: MP628, MP661, MP662, MP680, MP690, MP696, MP6104. • All traditional and mitered Old World stile & rail GRF profiles from <i>Section E.3 and E.11</i>.

Ⓢ = WalzCraft recommends using silicone caulk to secure the wood retainer molding and/or glass. Please see *Notes* for more information.

Pricing

1	Pricing	Please see <i>Section B.12</i> of our current Wholesale Pricing Catalog .
---	---------	--

Technical Notes: Frame & Mullion Doors

Cabinet Door & Drawer Front Options (Chapter B)

1	Door Styles	Most Door Styles are available as a Frame or Mullion Door.
		Frame or Mullion Door Styles that use Corner Blocks, require glass to be cut to their contour.
		Glass openings are routed to follow the contour of the shape for certain door styles. Lists of applicable door styles can be found in <i>Sections B.1, B.2, B.3 and B.4</i> .
		When ordering door Styles 2500, 2505, 2525, 3500, 3535, 7000, 7010, 7020, 7030, 7040 & 7070 as mullions, we suggest that your lite pattern be no greater than 2 wide due to the shape of the rails; 3 or more lites in the width may require custom construction.

Convex/Concave Options (Chapter D)

1	Available Lite Patterns	The  indicates lite patterns that are available convex/concave. See <i>Chapter D</i> for more information.
---	-------------------------	---

Functional Options (Chapter F)

1	Hinge Boring	Hinge boring is available for Frame & Mullion doors. Please see <i>Section F.1</i> for additional hinge boring requirements, ordering instructions and compatibility.
---	--------------	---

General Information (Chapter A)

1	Ready to Assemble (RTA)	RTA is available as an option for frame only doors. Not available on doors with mullion lite patterns.
---	-------------------------	--

Material Options

1	MDF Mullions for SolidTone® Finish	MDF mullions are recommended with the specific intent that they be painted.
		When ordering any of the following mullion lite patterns, WalzCraft strongly recommends using MDF mullions for SolidTone® or Primed Only for Paint applications when the door frame is solid wood: LP100, LP112, LP113, LP114, LP115, LP116, LP126, LP127, LP129, LP130, LP132, LP133, LP134, LP139, LP140, LP141, LP142, LP144, LP145, LP148, LP151, LP152, LP153, LP155 . <ul style="list-style-type: none"> • MDF has lower rates of expansion and contraction than solid wood, and therefore is an excellent material for the fabrication of complex mullion lite patterns that are intended to be painted. • MDF lite patterns are designed and machined to have tight radius corners ($\frac{1}{16}$" radius) whenever possible. • When ordering MDF mullions for SolidTone® or Primed only for Paint applications, please order your door in any of the following Hybrid / MDF species from the SolidTone® availability grids in <i>Section R.2</i>: <ul style="list-style-type: none"> ◦ Birch - Hybrid/MDF - Paint Grade ◦ Cherry - Hybrid/MDF - Paint Grade ◦ Maple-Hard - Hybrid/MDF - Natural / Standard Grade (recommended for best results) ◦ Poplar - Hybrid/MDF - Paint Grade • When painting cherry, no attempt will be made to conceal any of the naturally occurring characteristics that may be present, including but not limited to pin knots and gum pockets. Please note that if not sealed properly, gum pockets may bleed through your finish. • MDF lite pattern charges and set-up charges are priced less than solid wood. <ul style="list-style-type: none"> ◦ See <i>Section B.12</i> of our current Wholesale Pricing Catalog. • Lite patterns not listed above would still be made from solid wood mullion stock only.
2	MDF - MR, NAF, Raw	MDF mullions are also available with MDF - MR (Moisture Resistant), NAF, Raw.
3	Maple - Hard vs. Soft	For quality reasons, product requiring CNC machining will not be available in any Maple-Hard/Soft-Mixed species or Maple-Soft species. These items should instead be ordered in any of our Maple-Hard species.

Miscellaneous

1	Standard/True Divided Lites	Mullion lite patterns are available with either standard or true divided lites, unless otherwise noted.
2	Custom Mullion Placement	Custom mullion placement is available. Please submit drawings to our Customer Support Team to request a quote.
3	Wood/Rubber Glass Retainer	See previous pages for our wood and rubber glass retainer options and applications.
4	Compatibility Charts	Please reference our website: Resources/Technical Information .

Continued on next page...

► For PRICING ► See Section B.12 in our current Wholesale Pricing Catalog.

Technical Notes: Frame & Mullion Doors

Molding Options (Chapter N)

1	Applied Moldings on MDF	When an applied molding is added to an MDF product, the molding will be made from Maple-Hard/Soft Mixed-Value/Budget/Paint Grade.
----------	--------------------------------	---

Profile Options (Chapter E)

1	Stile & Rail Profiles	<p>Miter Profiles: Please see the Miter Compatibility charts on our website: Resources/Technical Information for lite pattern compatibility.</p> <p>Traditional/Old World Profiles: Please see the Stile & Rail Compatibility charts on our website: Resources/Technical Information for lite pattern compatibility.</p>
----------	----------------------------------	--

Sizes/Dimensions

1	Thicknesses	<p>Some door styles (e.g., Style 10) using frame only pricing are only available ¾" [19.3mm] and 1" [25.4mm] thick (i.e., when using Traditional profiles). Other door styles may also be available 1" [25.4mm], 1½" [28.6mm], and 1¼" [31.8mm] thick (i.e., when using Old World profiles). See individual door style sections and/or stile & rail profile sections for available thicknesses.</p> <p>See Section S.3 for possible thickness restrictions based on wood species.</p>
2	Center Rails	<p>Frame and mullion doors over 48"H [1219.2mm] will not have a center rail unless specified by the customer.</p> <p>Any frame and/or mullion door over 48" [1219.2mm] high ordered without a center rail will carry no warranty.</p> <ul style="list-style-type: none"> • See Section A.8 for more information regarding our warranties on warping, bowing and twisting. <p>Any mullion door over 60" [1524.0mm] high ordered without a center rail must be built with true divided lites to help maintain structural integrity.</p>
3	Mullion Strips	For mullion strips over 28" [711.2mm] wide or high, WalzCraft recommends applying a small bead of silicone between the back of the mullion and the glass to help assure stability and prevent possible warpage.
4	Minimum Frame Width	Minimum width for a frame with a mullion lite pattern is 12" [304.8mm] unless noted otherwise. <i>Minimum is based on 2¼" [57.2mm] Stiles and Rails.</i>
5	Glass Size Calculations	<p>For single or multiple opening frame only doors and single or multiple opening frame & mullion doors with standard lites, if wanting to order designer glass from WalzCraft with your door, WalzCraft will calculate glass size based on your door specifications. This applies to doors with straight stiles & rails resulting in rectangular shaped glass only. See Section G.1.</p> <p>For single opening frame only doors and single opening frame & mullion doors with standard lites, if wanting to order glass from a vendor other than WalzCraft before receiving the door, please refer to our glass size calculation formula earlier in this section. This applies to doors with straight stiles & rails resulting in rectangular shaped glass only.</p> <p>WalzCraft does not calculate glass size for frame & mullion doors with true divided lites or frame only doors with shaped stiles or rails. For these styles we recommend waiting until you receive your door, then take it to your local glass supplier to have your glass cut to fit each opening.</p>

Frame & Mullion Doors - END

► For PRICING ► See Section B.12 in our current Wholesale Pricing Catalog.

Technical & Ordering Notes: Mullion Lite Patterns

Mullion Lite Pattern Guidelines

1	10MUL, 40MUL Flat Panel Door with Mullions	10MUL: Lite pattern is applied to the front face of an MDF RVSCP-PR324 reversed solid center panel.
		40MUL: Lite pattern is applied to the front face of a 1/4" [6.4mm] veneered flat panel.
		A lite pattern must be specified for this style.
		Available with <i>most</i> Traditional profiles with matching mullion stock options.
2	LP001	All lites will be evenly spaced, unless otherwise noted.
		When ordering, please specify the number of lites and the lite pattern configuration (ie: 6 lites with a 2 x 3 pattern).
		Additional design charges may apply for customer specified lite pattern configurations or placement.
3	LP100, LP105, LP107, LP115, LP116, LP117, LP125, LP133, LP137, LP142, LP145	Minimum width for a frame with a Mullion Lite Pattern is 12" [304.8mm]. <i>Minimum is based on 2 1/4" [57.2mm] Stiles & Rails.</i> Minimum height for LP116 and LP133 is 12" [304.8mm].
		Available with <i>most</i> Traditional GRF profiles with matching mullion stock options. Limitations apply to Mitered GRF profiles.
		Limitations apply to these mullion patterns and Applied Molding.
		LP100, LP115, LP116, LP133, LP142, LP145: See <i>Material Options</i> note for more information on MDF Mullions with a SolidTone® or Primed Only finish. A CAD drawing must be approved, prior to manufacturing the products.
4	LP101, LP102, LP103, LP104	Minimum Frame width for these Lite Patterns is 12" [304.8mm]. <i>Minimum is based on 2 1/4" [57.2mm] stiles, bottom rail, and top rail at the narrowest.</i>
		Available with <i>most</i> Traditional GRF profiles with matching mullion stock options. <i>Not available with Mitered</i> GRF Profiles.
		Limitations apply to these mullion patterns and Applied Molding.
5	LP105	Height must be equal to or greater than the width to allow one pattern or twice the width for a pattern on top & bottom. <i>Minimum is based on 2 1/4" [57.2mm] Stiles and Rails.</i>
6	LP106	Minimum Frame width for this Lite Pattern is 12" [304.8mm]. <i>Minimum is based on 2 1/4" [57.2mm] stiles, bottom rail & top rail at the narrowest.</i>
		Specify the Width and Height of the corner lites. <i>Minimum size for corner lites is 2" x 2" [50.8mm x 50.8mm].</i>
		Available with <i>most</i> Traditional GRF profiles with matching mullion stock options. <i>Not available with Mitered</i> GRF Profiles.
		Limitations apply to this mullion pattern and Applied Molding.
7	LP108	Minimum width for a frame with a Mullion Lite Pattern is 12" [304.8mm]. <i>Minimum is based on 2 1/4" [57.2mm] Stiles and Rails.</i>
		Opening height of the lite pattern must be specified, <i>minimum height is 1" [25.4mm].</i> Width of the lite pattern will be equal.
		Short pieces will be half of the height of the vertical pieces above it and have a "female" cut on the ends.
		Available with all 3/4" [19.3mm] Traditional and 1" [25.4mm] Old World Stile and Rail Profile / Mullion Combinations; <i>See Profile Information.</i>
8	LP109	Opening height of the lite pattern must be specified, <i>minimum height is 1" [25.4mm].</i> Width of the lite pattern will be equal.
		Additional design charges may apply for customer specified lite pattern configurations or placements that vary from designs shown.
9	LP110	Minimum width for a frame with a Mullion Lite Pattern is 12" [304.8mm]. <i>Minimum is based on 2 1/4" [57.2mm] Stiles and Rails.</i>
		Available with <i>most</i> Traditional GRF profiles with matching mullion stock options.
		Pattern consists of two center lites with 1" [25.4mm] spacing; the remaining space is equally divided to the outside.

► For PRICING ► See Section B.12 in our current Wholesale Pricing Catalog.

Technical & Ordering Notes: Mullion Lite Patterns...continued

Mullion Lite Pattern Guidelines...continued

10	LP111	Minimum width for a frame with a Mullion Lite Pattern is 12" [304.8mm]. <i>Minimum is based on 2¼" [57.2mm] Stiles and Rails.</i>
		One Pattern (4 Lites): Minimum door height must be 1.5 times the door width, plus the total width of the top / bottom rail.
		Two Patterns (7 Lites): Minimum door height must be 2 times the door width, plus the total width of the top / bottom rail.
		Available with <i>most</i> Traditional GRF profiles with matching mullion stock options. Limitations apply to Mitered GRF profiles.
		Limitations apply to these mullion patterns and Applied Molding. A CAD drawing must be approved, prior to manufacturing the product.
11	LP112, LP130, LP132, LP138, LP152, LP153	Minimum width for a frame with a Mullion Lite Pattern is 12" [304.8mm]. <i>Minimum is based on 2¼" [57.2mm] Stiles and Rails.</i>
		In order to achieve the best look, the height of door must be at least two times the width of door.
		Available with <i>most</i> Traditional GRF profiles with matching mullion stock options. Limitations apply to Mitered GRF profiles.
		Limitations apply to this mullion pattern and Applied Molding. LP112, LP130, LP132, LP152, LP153: See Material Options note for more information on MDF Mullions with a Solid-Tone® or Primed Only finish.
		A CAD drawing must be approved, prior to manufacturing the product.
12	LP113	Minimum width for a frame with a Mullion Lite Pattern is 12" [304.8mm]. <i>Minimum is based on 2¼" [57.2mm] Stiles & Rails.</i>
		Vertical mullion strip at top and horizontal mullion strips are fixed at 1" long. For LP113 (2) Pattern, the vertical mullion strip at bottom is also fixed at 1" long.
		Minimum height of door must be equal to or greater than the width. For LP113 (2) Pattern, the minimum height must be at least 1¼ times the width.
		Available with <i>most</i> Traditional GRF profiles with matching mullion stock options. Limitations apply to Mitered GRF profiles.
		Limitations apply to these mullion patterns and Applied Molding. See <i>Material Options</i> note for more information on MDF Mullions with a SolidTone® or Primed Only finish.
		A CAD drawing must be approved, prior to manufacturing the products.
13	LP114, LP134	Minimum width for a frame with a Mullion Lite Pattern is 12" [304.8mm]. <i>Minimum is based on 2¼" [57.2mm] Stiles and Rails.</i>
		Minimum height needs to be at least 1½ times the width of the door.
		Available with <i>most</i> Traditional GRF profiles with matching mullion stock options. Limitations apply to Mitered GRF profiles.
		Limitations apply to this mullion pattern and Applied Molding. See <i>Material Options</i> note for more information on MDF Mullions with a SolidTone® or Primed Only finish.
		A CAD drawing must be approved, prior to manufacturing the product.
14	LP118	Specify the Width and Height of the corner lites. <i>Minimum size for corner lites is 1" x 1" [25.4mm x 25.4mm].</i>
		Additional design charges may apply for customer specified lite pattern configurations or placements.
15	LP119, LP120, LP121, LP122	Minimum width for a frame with a Mullion Lite Pattern is 12" [304.8mm]. <i>Minimum is based on 2¼" [57.2mm] Stiles and Rails.</i>
		Corner lites must be specified at the widest & narrowest: this determines the radius of the curved piece. <i>Minimum at narrowest is 2" [50.8mm].</i>
		Available with <i>most</i> Traditional GRF profiles with matching mullion stock options. Limitations apply to Mitered GRF profiles.
		Limitations apply to these mullion patterns and Applied Molding.

► For PRICING ► See Section B.12 in our current Wholesale Pricing Catalog.

Technical & Ordering Notes: Mullion Lite Patterns...continued

Mullion Lite Pattern Guidelines...continued

16	LP123	Due to complexity, width dimensions for this Lite Pattern are <i>limited to fixed sizes</i> . Doors are available from 12" to 24" wide in 1" increments. Heights may vary.
		Width dimensions are based on 2¼" [57.2mm] stiles.
		Constructed with Stile & Rail Profile SR100 , Applied Molding #101 or #102 (<i>Section N.5</i>) and Mullion Stock Molding #1895 (<i>Section N.6</i>).
		Style 3020 / LP123 is only available with the following Outside Edge profiles: D7, D12, D15, D17, D18, D21, D24, D32, D41, D52, D67, D93, D101, D102, D115, D118, D120 . • There are no Outside Edge profile limitations with Style 3022 / LP123 .
		When ordering sizes that range between one or two templates, the frame must be constructed with non-standard part sizes to maintain the mullion pattern template size. You may increase the size of the stiles on the frame, or decrease the size of the stiles on the frame. <i>If ordering a mullion door 12½" [317.5mm] wide, you will need 2½" [63.5mm] stiles.</i> The top and bottom rails may also be increased by the same value to maintain aesthetics and balance proportions. A CAD drawing must be approved, prior to manufacturing the product.
17	LP124	Minimum width for a frame with a Mullion Lite Pattern is 12" [304.8mm]. <i>Minimum is based on 2¼" [57.2mm] Stiles and Rails.</i>
		Specify the Width and Height of the corner lites. <i>Minimum size for corner lites is 1" x 1" [25.4mm x 25.4mm].</i>
		Limitations apply to Mitered GRF profiles.
		Limitations apply to these mullion patterns and Applied Molding. A CAD drawing must be approved, prior to manufacturing the product.
18	LP126	Minimum width for a frame with a Mullion Lite Pattern is 12" [304.8mm]. <i>Minimum is based on 2¼" [57.2mm] Stiles and Rails.</i>
		Width of diamond portion will be approximately one third the size of opening width, with a minimum of 2" x 2" [50.8mm x 50.8mm] square.
		Height must be at least two times the width of the door.
		Available with <i>most</i> Traditional GRF profiles with matching mullion stock options.
		Limitations apply to Mitered GRF profiles.
		Limitations apply to these mullion patterns and Applied Molding. See Material Options note for more information on MDF Mullions with a SolidTone® or Primed Only finish. A CAD drawing must be approved, prior to manufacturing the product.
19	LP127	Minimum width for a frame with a Mullion Lite Pattern is 12" [304.8mm]. <i>Minimum is based on 2¼" [57.2mm] Stiles and Rails.</i>
		For LP127 - 4 Lites, minimum height of the door must be greater than the width.
		For LP127 - (2) Patterns - 7 Lites, minimum height must be at least 2 times the width of the door.
		Available with <i>most</i> Traditional GRF profiles with matching mullion stock options.
		Limitations apply to Mitered GRF profiles.
		Limitations apply to this mullion pattern & Applied Molding. See Material Options note for more information on MDF Mullions with a SolidTone® or Primed Only finish. A CAD drawing must be approved, prior to manufacturing the product.
20	LP128	Minimum width for a frame with a Mullion Lite Pattern is 12" [304.8mm]. <i>Minimum is based on 2¼" [57.2mm] Stiles & Rails.</i>
		Opening height of top & bottom lites must be specified, minimum of 1". Width of top & bottom lites will be equal.
		Width of center lite pattern will consist of two center lites with 1" [25.4mm] spacing. The remaining space on either side will be equally divided.
		Available with <i>most</i> Traditional GRF profiles with matching mullion stock options. Limitations apply to Mitered GRF profiles. Limitations apply to this mullion pattern and Applied Molding.

Technical & Ordering Notes: Mullion Lite Patterns...continued

Mullion Lite Pattern Guidelines...continued

21	LP129	Minimum width for a frame with a Mullion Lite Pattern is 12" [304.8mm]. <i>Minimum is based on 2 1/4" [57.2mm] Stiles and Rails.</i>
		Minimum height of door must be equal to or greater than the width.
		Available with <i>most</i> Traditional GRF profiles with matching mullion stock options. Limitations apply to Mitered GRF profiles.
		Limitations apply to this mullion pattern and Applied Molding.
		See <i>Material Options</i> note for more information on MDF Mullions with a SolidTone® or Primed Only finish. A CAD drawing must be approved, prior to manufacturing the product.
22	LP131	Minimum width for a frame with a Mullion Lite Pattern is 12" [304.8mm]. <i>Minimum is based on 2 1/4" [57.2mm] Stiles and Rails.</i>
		Opening height of top & bottom lites must be specified, minimum of 1" [25.4mm]. Width of top & bottom lites will be equal.
		Width of center lite pattern will consist of two center lites with 1" [25.4mm] spacing. The remaining space on either side will be equally divided.
		Available with <i>most</i> Traditional GRF profiles with matching mullion stock options. Limitations apply to Mitered GRF profiles. Limitations apply to this mullion pattern and Applied Molding.
23	LP136	Minimum size for a frame with this mullion lite pattern is 12"W x 19"H [304.8mm x 482.6mm]. <i>Minimum is based on 2 1/4" [57.2mm] Stiles and Rails.</i>
		Horizontal mullion will be centered on opening height. Width of center consists of two 5/8" [15.9mm] wide lites with the remaining space on either side being equally divided.
		Mullions are 5/8" [15.9mm] wide with the top left/right vertical mullions widening to 15/16" [23.8mm].
		Only available with the SR100GRF and SR123GRF stile & rail profiles. A CAD drawing must be approved, prior to manufacturing the product.
24	LP139	Minimum width for a frame with a Mullion Lite Pattern is 12" [304.8mm]. <i>Minimum is based on 2 1/4" [57.2mm] Stiles and Rails.</i>
		Minimum door height needs to be at least the width of the door plus the width of the bottom rail.
		Square portion is a fixed size with a 2 1/2" x 2 1/2" [63.5mm x 63.5mm] opening.
		Drawing shows the horizontal mullion strip dividing the opening at an approximate 30/70 ratio. See <i>Material Options</i> note for more information on MDF Mullions with a SolidTone® or Primed Only finish.
25	LP140	Minimum width for a frame with a Mullion Lite Pattern is 12" [304.8mm]. <i>Minimum is based on 2 1/4" [57.2mm] Stiles and Rails.</i>
		Minimum height of door must be at least two times the width of door.
		Available with <i>most</i> Traditional GRF profiles with matching mullion stock options. Limitations apply to Mitered GRF profiles.
		Limitations apply to this mullion pattern and Applied Molding.
		See <i>Material Options</i> note for more information on MDF Mullions with a SolidTone® or Primed Only finish. A CAD drawing must be approved, prior to manufacturing the product.
26	LP141	Corner lites are a fixed size with 2" x 2" [50.8mm x 50.8mm] openings.
		Minimum width for a frame with a Mullion Lite Pattern is 12" [304.8mm]. <i>Minimum is based on 2 1/4" [57.2mm] Stiles and Rails.</i>
		Minimum height of the door must be at least 1 1/2 times the width.
		Available with <i>most</i> Traditional GRF profiles with matching mullion stock options.
		Limitations apply to Mitered GRF profiles.
		Limitations apply to this mullion pattern & Applied Molding. See <i>Material Options</i> note for more information on MDF Mullions with a SolidTone® or Primed Only finish. A CAD drawing must be approved, prior to manufacturing the product.

Technical & Ordering Notes: Mullion Lite Patterns...continued

Mullion Lite Pattern Guidelines...continued

27	LP143	Minimum width for a frame with a Mullion Lite Pattern is 12" [304.8mm]. <i>Minimum is based on 2¼" [57.2mm] Stiles and Rails.</i>
		Specify the width and height of the corner lites. <i>Minimum size for corner lites is 1" x 1" [25.4mm x 25.4mm].</i>
		Specify height of full width horizontal lites.
		Width of center lites will match width of lites at top and bottom.
		Additional design charges may apply for customer specified lite pattern configurations or placements.
28	LP144	Minimum width for a frame with a Mullion Lite Pattern is 12" [304.8mm]. <i>Minimum is based on 2¼" [57.2mm] Stiles and Rails.</i>
		Minimum height needs to be at least 1¾ times the width of the door.
		Available with <i>most</i> Traditional GRF profiles with matching mullion stock options. Limitations apply to Mitered GRF profiles.
		Limitations apply to this mullion pattern and Applied Molding.
		See Material Options note for more information on MDF Mullions with a SolidTone® or Primed Only finish. A CAD drawing must be approved, prior to manufacturing the product.
29	LP148	Minimum width for a frame with a mullion lite pattern is 12" [304.8mm]. <i>Minimum is based on 2¼" [57.2mm] Stiles and Rails.</i>
		Horizontal mullion strips are fixed at 1" long.
		Minimum height of door must be equal to or greater than the width.
		See Material Options note for more information on MDF Mullions with a SolidTone® or Primed Only finish.
30	LP149	Minimum width for a frame with a Mullion Lite Pattern is 12" [304.8mm]. <i>Minimum is based on 2¼" [57.2mm] Stiles and Rails.</i>
		Height of door must be greater than the width.
		Available with <i>most</i> Traditional GRF profiles with matching mullion stock options. Limitations apply to Mitered GRF profiles.
		Limitations apply to this mullion pattern and applied molding. A CAD drawing must be approved, prior to manufacturing the product.
31	LP150	Minimum width for a frame with a Mullion Lite Pattern is 12" [304.8mm]. <i>Minimum is based on 2¼" [57.2mm] Stiles and Rails.</i>
		Available with <i>most</i> Traditional GRF profiles with matching mullion stock options. Limitations apply to Mitered GRF profiles.
		Limitations apply to this mullion pattern and Applied Molding. A CAD drawing must be approved, prior to manufacturing the product.
32	LP151	Minimum width for a frame with a Mullion Lite Pattern is 12" [304.8mm]. <i>Minimum is based on 2¼" [57.2mm] Stiles and Rails.</i>
		In order to achieve the best look, the height of door must be at least two times the width of the door.
		Available with <i>most</i> Traditional GRF profiles with matching mullion stock options. Limitations apply to Mitered GRF profiles.
		Limitations apply to this mullion pattern & Applied Molding.
		See Material Options note for more information on MDF Mullions with a SolidTone® or Primed Only finish. A CAD drawing must be approved, prior to manufacturing the product.
33	LP154	Specify the Width and Height of the corner lites. <i>Minimum size for corner lites is 1" x 1" [25.4mm x 25.4mm].</i>
		Height of center lites will match the specified height of corner lites.
		Additional design charges may apply for customer specified lite pattern configurations or placements.

Ordering & Pricing Notes: Louvered Doors/Wood Shutters - Operable & Non-Operable (Fixed)**Ordering Guidelines**

1	Order Forms	Please use <i>Door Order Form (E•Z Form #2)</i> .
2	Ordering Information	Make sure to include the following information with your order: <ul style="list-style-type: none"> • Operable or Non-Operable louvers. • Louver molding number. • Louver wood species /grade. Reference notes below for additional information regarding louvered door specifications.
Pricing		
1	Pricing	Please see <i>Section B.14</i> of our current Wholesale Pricing Catalog .

Technical Notes: Louvered Doors/Wood Shutters - Operable & Non-Operable (Fixed)**Cabinet Door & Drawer Front Options (Chapter B)**

1	Door Styles	Available for door styles in frame price classes PC101 and PC103 .
2	Double Panel Doors	Please specify which section you prefer to have the louvers installed in. They are available in the top section, bottom section or both, and can be ordered with a 50/50 or 60/40 split. If you prefer a custom center rail placement, please specify the dimension from the top of the door to the top of the center rail.
3	60/40 Split	If you plan to align louvered 60/40 split doors with non-louvered 60/40 split doors, center rail placement on the doors could vary due to louver size and placement, please specify a custom center rail placement, <i>see above note</i> .

Finish Options (Chapter R)

1	Louver Actuator	When ordering operable louver doors, the louver actuator is attached to the louvers with small metal eyelets. WalzCraft recommends removing these prior to finishing the doors, then reinstalling them once complete.
---	-----------------	---

Functional Options (Chapter F)

1	Hinge Boring	Hinge boring is available for Louvered Doors/Wood Shutters - Operable & Non-Operable (Fixed). Please see <i>Section F.1</i> for additional hinge boring requirements, ordering instructions and compatibility. Operable & Non-Operable (Fixed) Louver doors ordered with hinge boring have a minimum stile & rail width of 2" [50.8mm].
---	--------------	--

General Information (Chapter A)

1	Interior Use Only	WalzCraft's Louvered Doors/Wood Shutters are intended for interior use only.
2	Ready to Assemble (RTA)	RTA is not available as an option.

Material Options

1	Availability	Operable & Non-Operable Louver doors are only available in solid wood and hybrid (solid wood stiles & rails with MDF center panels) wood species. Not available with MDF stiles & rails or louvers.
---	--------------	---

Miscellaneous

1	Air Flow/Light	Operable/Adjustable Louver doors accommodate air flow and/or light penetration flexibility. Non-Operable (Fixed) Louver doors accommodate air flow and light penetration (no adjustability).
---	----------------	---

Profile Options (Chapter E)

1	Stile & Rail Profile	Only available with the SR100-NPC stile and rail profile.
---	----------------------	--

Sizes/Dimensions

1	Thicknesses	Available ¾" [19.3mm], 1" [25.4mm], 1¼" [31.8mm], 1½" [38.1mm], 1¾" [44.5mm], and 2" [50.8mm] thick. The setback distance for the louvers from the face of the door will remain constant as the thickness of the door increases. See <i>Section S.3</i> for possible thickness restrictions based on wood species.
2	Maximum Door Height	Maximum height for open louvered doors (operable and non-operable) is 96" [2438.4mm].
3	Minimum Door Sizes	Please reference the <i>Louver Door Minimum Sizes</i> compatibility chart on our website under: Resources/Technical Information . This chart will give you the minimum sizes for Operable, Non-Operable and Fixed Louver door styles based on louver size.

Continued on next page...

► For PRICING ► See Section **B.14** in our current Wholesale Pricing Catalog.

Technical Notes: Louvered Doors/Wood Shutters - Operable & Non-Operable (Fixed)...continued

Sizes/Dimensions...continued

6	Open Louvers Spacing	Spacing from louver to louver is 3/32" (2.5mm). The spacing at the top and bottom varies with the size of the louver.
7	Operable Louvers Spacing	Due to the movement of the louvers, the spacing between louvers will be fixed.
8	Fixed Louver Stabilizer	Non-Operable (Fixed) Louvered doors with an opening width of 16" [406.4mm] or greater will receive a fixed louver stabilizer that attaches to the back of the louvers and door rails. Additional charges will apply.
9	Doors - 36" [914.4mm] Wide	Operable and Non-Operable (Fixed) Louvered doors 36" [914.4mm] and wider require a center stile, <i>see Style 1010</i> on previous page.
10	Louvered Slats Sizes	Non-Operable (Fixed) Louvered slats available in 1" [25.4mm], 1 1/4" [31.8mm], 1 1/2" [38.1mm], 2" [50.8mm], and 2 1/2" [63.5mm] widths. See <i>Section N.9</i> for 8' moldings. Operable Louvered slats available in 1" [25.4mm], 1 1/2" [38.1mm], 2" [50.8mm] and 2 1/2" [63.5mm] widths. See <i>Section N.9</i> for 8' moldings.

Pricing		
1	Pricing	Please see <i>Section B.15</i> of our current Wholesale Pricing Catalog .

Technical Notes: Louvered Doors/Wood Shutters - Closed Louvers**Cabinet Door & Drawer Front Options (Chapter B)**

1	Door Styles	Available in the following door styles: 40, 1400, 1401, 2428, 2434, 2632L/R, 3010, 3060L/R, 3160, 3170, 3231L/R, 3232L/R, 3234, 3235, 3271, 3272, 3284L/R, 3289L/R, 3291L/R, 3465, 4020, 4030, 4040, 4041, 4043, 4044, 4045, 4150.
---	-------------	---

Functional Options (Chapter F)

1	Hinge Boring	Hinge boring is available for Louvered Doors/Wood Shutters - Closed Louvers. Please see <i>Section F.1</i> for additional hinge boring requirements, ordering instructions and compatibility.
---	--------------	---

General Information (Chapter A)

1	Interior Use Only	WalzCraft's Louvered Doors/Wood Shutters are intended for interior use only.
2	Ready to Assemble (RTA)	RTA is <i>not</i> available as an option.

Material Options

1	Availability	Closed Louver doors are available in solid wood, Hybrid (solid wood stiles & rails with MDF center panels), and 5-Piece MDF.
2	5-Piece MDF, Raw / MDF - MR, NAF, Raw	The closed louver molding will be made from either Maple-Hard/Soft-Mixed-Value/Budget/Paint Grade, Birch-Value/Budget/Paint Grade or Poplar-Value/Budget/Paint Grade.

Miscellaneous

1	Air Flow / Light	Closed Louver doors <i>do not</i> accommodate air flow or light penetration.
---	------------------	--

Molding Options (Chapter N)

1	Interlocking Moldings	Interlocking louver slat moldings and beaded applied moldings are designed to be affixed to a ¼" [6.4mm] veneered panel or a ¼" [6.4mm] raw MDF panel, to simulate <i>open</i> louvers. <ul style="list-style-type: none"> Louver slat molding are only available in a horizontal (left to right) orientation. When ordering beaded applied molding, please specify your preference for the direction/placement as either horizontal (left to right) or vertical (top to bottom). <p>These moldings are cut to fit. As a result, you may end up with a partial louver slat or bead on the center panel. The stile/rail widths will be unaltered.</p> <p>Molding drawings are shown at full scale.</p>
2	Louvered Moldings	See previous page for closed louver and beaded applied molding options and for information needed to order 8' pieces of molding only. Pricing for individual 8' moldings can be found in <i>Section N.12</i> of our current Wholesale Pricing Catalog .

Profile Options (Chapter E)

1	Stile & Rail Profile	SR100 will accept molding, #1187, #1188, #1641, #2503, #2906, #3215, #3240, #3241, #3243. SR195 will accept molding #3242.
---	----------------------	---

Sizes/Dimensions

1	Thicknesses	When using Traditional stile and rail profile SR100 , closed louver doors made from solid wood are available ¾" [19.3mm] and 1" [25.4mm] thick. When using Old World stile and rail profile SR195 , closed louver doors made from solid wood are available 1" [25.4mm], 1½" [28.6mm] and 1¼" [31.8mm] thick. See <i>Section S.3</i> for possible thickness restrictions based on wood species.
2	Maximum Opening Sizes	The maximum size for openings on closed louver doors that WalzCraft will warrant is 36"W and / or 36"H. Closed louver doors with openings greater than this will carry no warranty against bowing. If ordering closed louver doors with openings greater than 36"W and / or 36"H, we recommend 3" wide (or greater) stiles/rails. This will provide more structural stability and help to prevent bowing which can open up gaps between the stiles/rails and the louver molding.

Raised Panel Profiles for RP (Raised Panel) Drawer Fronts

★ = Available on products using 3D Laminate (RTF).

Note: Dashed lines indicate difference in thickness from one look to another. Look "B" = 15/16" [23.8mm], Look "C" = 3/4" [19.1mm]. Door style 1271 and drawer front style 1271* from Section B.9 are only available with these 15/16" [23.8mm] thick Look "B" profiles.

► For PRICING ► See Section B.16 in our current Wholesale Pricing Catalog.

Minimum Size Drawer Front Calculation

- The minimum sizes for drawer fronts are calculated using the *Raised Panel Profile Reveal* and the *Outside Edge Profile Width*, while maintaining a 1" [25.4mm] minimum of flat to the face.
- Dimensions for raised panel profile reveals and outside edge profiles can be found on the compatibility chart on our website under Technical Information.

Example per drawing: (D60 @ 1/16" x 2 = 1 1/8") + (338-25RPB* @ 1" x 2 = 2") + (1" Flat) = 4 1/8"

Ordering & Pricing Notes: Slab & RP (Raised Panel) Drawer Fronts

Ordering Guidelines

Pricing

1 Pricing Please see *Section B.16* of our current Wholesale Pricing Catalog.

Technical Notes: Slab & RP (Raised Panel) Drawer Fronts

Cabinet Door & Drawer Front Options (Chapter B)

1	Style 916SQA*, 58SQA*	Style 916SQA* is only available when using one of the 1/16" Only [14mm] Outside Edge Applied Molding profiles from <i>Section E.16</i> .
		Style 58SQA* is only available when using one of the 3/8" Only [15.9mm] Outside Edge Applied Molding profiles from <i>Section E.16</i> .
		MDF core is recommended when using these drawer front styles with applied molding due to expansion and contraction issues that may occur.
2	Style 34SQA*	See Look "A" on <i>page B.16.1</i> .
3	RP Drawer Fronts	See the Drawer Front "Look" options that are available on <i>pages B.16.1 & B.16.2</i> .
		Raw MDF Raised Panel (RP) Drawer Fronts are available in all Drawer Front "LOOKS".

Convex/Concave Options (Chapter D)

1 Curved Products The C indicates drawer front styles that are available for Curved Products. For additional ordering guidelines, see *Chapter D*.

Functional Options (Chapter F)

1 Hinge Boring 35mm hinge boring is available with Drawer Front Looks "A", "B", "E" and "F". Please see *Section F.1* for additional hinge boring requirements, ordering instructions and compatibility.
For Drawer Front Looks "C", "D" and "G" please submit your request to our Customer Support Team.

Material Options

1 MDF - MR, NAF, Raw MDF Slab and RP drawer fronts are also available with MDF - MR (Moisture Resistant), NAF, Raw.
MDF - MR (Moisture Resistant), NAF, Raw is only available with Drawer Front Look "A" and Look "C".

Continued on next page...

► For PRICING ► See Section B.16 in our current Wholesale Pricing Catalog.

Technical Notes: Drawer Fronts (Slab & RP)...continued

General Information (Chapter A)

1	Grain Direction	Arrows (←→) shown throughout the catalog indicate standard grain direction. Grain direction may be specified at NO additional cost.
2	Warranty	Please see <i>Section A.8 - Warranties</i> for more information on Glued-Up Panel expansion/contraction, warping, bowing and twisting.

Profile Options (Chapter E)

1	Look "C"	Outside edge thickness may vary by 5mm depending on the drawer front profile selected. Please refer to our website for more information.
2	Outside Edge Profiles	Most drawer front profiles are shown with a D33 Outside Edge.
		Outside edge profiles can simulate a raised panel " Look " on a style 34SQA* . <ul style="list-style-type: none"> • Economical alternative - 1 router pass versus multiple passes. • Design flexibility is <i>not</i> an option.
		Additional information for Outside Edge Profiles can be found on our website under Technical Information.
3	Raised Panel (RP) Style Drawer Front Profiles	You must choose an RP " Look ", a Raised Panel Profile, and an Outside Edge Profile when ordering RP (Raised Panel) Drawer Fronts. The Raised Panel Profile # and the " Look " option define the Style # for your RP Drawer Front.

Sizes/Dimensions

1	Minimum Size	See previous page for minimum size calculations for RP drawer fronts. 916SQA* , 58SQA* , 34SQA* , 100SQE* & 500* = 3" x 3" [76.2mm x 76.2mm].
2	Maximum Height	Maximum height for a glued up, solid wood drawer front with horizontal grain is 48" [1219.2mm].
3	Drawer Front Construction	Drawer fronts up to 6" [152.4mm] high will be constructed with no glue ups whenever possible. This does <i>not</i> apply to Paint/Budget/Value, Rustic and Knotty Grades of material.
4	Thicknesses	Slab and RP (Raised Panel) drawer fronts made from solid wood are available 5/16" [14.3mm], 3/8" [15.9mm], 1/2" [19.1mm], 1" [25.4mm], 1 1/8" [28.6mm] and 1 3/8" [34.9mm] thick.
		See <i>Section S.3</i> for possible thickness restrictions based on wood species.
		Not all drawer fronts are available in all thicknesses. See pages B.16.1 and B.16.2 for Price Classes (PC) and their associated thicknesses.
		1 3/8" thickness for raw MDF drawer fronts is achieved by laminating two layers together.

Slab & RP (Raised Panel) Drawer Fronts - END

► For PRICING ► See Section **B.16** in our current Wholesale Pricing Catalog.

Onlay Frames

Onlay Frames

An **Onlay Frame** is a frame with no panel cut that simulates a frame only door that can be applied to the backs of islands or peninsulas or on cabinets ends, or placed on walls to create a custom wainscot panel "look". They come in 3/8" [9.5mm], 3/4" [19.1mm] and 1" [25.4mm] thicknesses, and use the same construction methods as that of our Mitered and French Mitered doors.

Shown with MP603-57

Style: 10M-ONLAY
 PC: 301
 Frame: PC301 x 0.6
 Min. Size: 5½x5½
 [139.7mm x 139.7mm]

Shown with MP604-76

Style: 10FM-ONLAY
 PC: 301
 Frame: PC301 x 0.6
 Min. Size: See Notes

Ordering Guidelines

1	Order Forms	Please use <i>Door Order Form (E•Z Form #2)</i> .
2	Ordering Information	For 3/8" thickness, please order as Style 10M-ONLAY or Style 10FM-ONLAY as noted below. For 3/4" or 1" thickness, please order as Style 10M or Style 10FM No-Panel Cut (NPC) Frame Only Doors from <i>Section B.8</i> .
Pricing		
1	Pricing	Please see <i>Section B.18</i> of our current Wholesale Pricing Catalog .

Technical Notes: Onlay Frames

Cabinet Door & Drawer Front Options (Chapter B)

1	Door Styles	Available as a Style 10M-ONLAY Frame and Style 10FM-ONLAY Frame only.
---	-------------	---

Finish Options (Chapter R)

1	Finishing	Available with all WalzCraft standard finish options.
2	3D Laminate	Not available with 3D Laminate (RTF).

Functional Options (Chapter F)

1	Hinge Boring	Hinge boring is not available for Onlay Frames. If requiring hinge boring on a 3/4" or 1" thick Onlay Frame, please order as Style 10M or Style 10FM No-Panel Cut (NPC) Frame Only Doors from <i>Section B.8</i> .
---	--------------	---

Material Options

1	Material	Onlay Frames are available in solid wood and raw MDF only.
---	----------	--

Profile Options (Chapter E)

1	Stile & Rail Profiles	Style 10M-ONLAY frames are 3/8" thick and available with all MP600/MP6000 Mitered stile & rail profiles. Style 10FM-ONLAY frames are 3/8" thick and available with many of our MP600/MP6000 Mitered stile & rail profiles. • Any MP600/MP6000 profile number that has a corresponding FM symbol is available with French Miter construction for the Style 10FM-ONLAY frame.
2	Outside Edge Profiles	Available with the D7 , D32 and D33 outside edge profiles.

Sizes/Dimensions

1	Thicknesses	Available 3/8" [9.5mm], 3/4" [19.1mm] and 1" [25.4mm] thick. For 3/8" thickness, please order as Style 10M-ONLAY or Style 10FM-ONLAY as noted above. For 3/4" or 1" thickness, please order as Style 10M or Style 10FM No-Panel Cut (NPC) Frame Only Doors from <i>Section B.8</i> .
2	Stile & Rail Widths	Stiles & rails are available in widths from 1 1/2" [38.1mm] to 3" [76mm]. Style 10FM-ONLAY doors using French Miter construction will have the stiles & rails finish at the exact width specified. There will be no width reduction due to the French Miter manufacturing process.
3	Minimum Size	Style 10M-ONLAY: Minimum size is based on 2 1/4" [57.2mm] wide stiles and rails. • The minimum frame opening is 1"W x 1"H [25.4mm x 25.4mm]. Style 10FM-ONLAY: Please see <i>Section B.7</i> for French Miter construction minimums. • The minimum height for a frame opening with French Miter construction is 3 3/8" [85.7mm].
4	Maximum Size	The maximum size for any Onlay Frame is 36" x 72" [914.4mm x 1828.8mm].
