**Material Options**

|   |                    |                                                                                                                                                                                                                                                                                                                                                 |
|---|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Material           | Half blind dovetail drawer boxes are available in solid wood and Baltic Birch plywood.                                                                                                                                                                                                                                                          |
| 2 | Budget/Value Grade | WalzCraft has established the grade "BG" to indicate a <b>Budget/Value Grade</b> of material. Budget grade materials include mineral, sap, small glue-ups (n/a with Baltic Birch), and other characteristics common in whatever species you order. The wood is structurally sound and a good value if you are able to use them in your project. |

| 1 | Sidewall Thickness      | <b>Solid Wood:</b> Available in ½" [12.7mm], ⅝" [15.9mm] and ¾" [19.1mm] thicknesses.<br><b>Baltic Birch Plywood:</b> Available in 12.5mm, 15.2mm, 18.0mm thicknesses.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 2 | Minimum & Maximum Sizes | <b>Assembled and Ready to Assemble (RTA):</b><br><b>Width:</b> Minimum = 4¾" [120.7mm]. Maximum = 43" [1092.2mm]. Absolute Maximum = 60" [1524.0mm].<br><b>Depth:</b> Minimum = 4¾" [120.7mm]. Maximum = 36" [914.4mm]. Absolute Maximum = 60" [1524.0mm].<br><b>Height:</b> Minimum = 1¾" [44.5mm]. Maximum = 14½" [368.3mm]. Absolute Maximum = 30" [762.0mm].<br>Drawer boxes cannot exceed an absolute maximum <b>depth</b> of 48" [1219.2mm] when bottom panel grain direction is running left to right or a <b>width</b> of 48" [1219.2mm] when bottom panel grain direction is running front to back.<br>The minimum height of a drawer box with a <b>DB Organizer Insert (DBOI)</b> varies. Please see <b>Section H.20</b> for <b>DBOI</b> minimums and other relative dimensions. You must also factor in the bottom panel thickness and bottom panel inset option of the drawer box when calculating the drawer box minimum height.<br>Assembled drawer boxes built between the Maximum and Absolute Maximum sizes will be subject to an "Oversized" Drawer Box Assembly Charge, due to special handling requirements. See <b>Section H.1</b> of our current <b>Wholesale Pricing Catalog</b> for upcharges. |
| 3 | Dovetail Height         | Dovetail size may vary due to the height of your drawer box, bottom panel thickness and bottom panel inset.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

### Top Edge Profile Options

|   |                 |                                                                                                                                                                                                                                                                                               |
|---|-----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | "TE1" Top Edge  | Constructed with the sides 3.0mm shorter than the front and back of the box. On ¾" [19.1mm] thick material, the sides are 4.0mm shorter than the front and back of the box.<br>All edges are eased.<br>When ordering, please give the height dimension using the size for the front and back. |
| 2 | "TE2" Top Edge  | Constructed with the sides 3.0mm shorter than the front and back of the box.<br>All edges are square.<br>When ordering, please give the height dimension using the size for the front and back.                                                                                               |
| 3 | "TE3" Top Edge  | Top edges are all flush and eased, except the face that attaches to the back of the drawer front.                                                                                                                                                                                             |
| 4 | "TE4" Top Edge  | Top edges are flush and square on all sides.                                                                                                                                                                                                                                                  |
| 5 | "TE5" Top Edge  | Top edges are flush and radiused to form a half circle, except the face that attaches to the back of the drawer front.<br>A slight flat spot appears on the top where the joint meets.                                                                                                        |
| 6 | "TE6" Top Edge  | Top edges are slightly eased on all sides and flush except at the joints where the sides meet the front or back of the drawer box.                                                                                                                                                            |
| 7 | "TE7" Top Edge  | Top edges are slightly eased on all sides and constructed with the sides 3mm shorter than the front and back of the box.<br>When ordering, please give the height dimension using the size for the front and back.                                                                            |
| 8 | "TE14" Top Edge | <b>TE14</b> only available with Baltic Birch. Top edge option is constructed with the sides 3.0mm shorter than the front and back of the box and finished with a veneer edgeband 0.5mm thick.<br>When ordering, please give the height dimension using the size for the front and back.       |

| 13 | No Glue-Up Option       | <b>Assembled and Ready to Assemble (RTA):</b> Available with the No Glue-Up Option. See <b>Section H.19</b> . |

#### Finish Options - Assembled (Chapter R)

|   |                                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|---|----------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Natural/Clear Coat ( <i>no stain</i> ) | <b>Assembled:</b> Solid wood Full/Through Dovetail drawer boxes are available unfinished or finished with WalzCraft’s water base Natural/Clear Coat ( <i>no stain</i> ) finish.<br>• WalzCraft has used water base finish on assembled drawer boxes since 2009.<br>• Water base finish is urea formaldehyde free.<br>• No finish is applied to the underside of drawer box.<br>◦ Underside can be finished upon request, but additional charges will apply. |
| 2 | Primed Only for Paint                  | <b>Assembled:</b> Solid wood Full/Through Dovetail drawer boxes are not available with a Primed Only for Paint finish.                                                                                                                                                                                                                                                                                                                                      |
| 3 | SolidTone®                             | <b>Assembled:</b> Solid wood Full/Through Dovetail drawer boxes are not available with a SolidTone® finish.                                                                                                                                                                                                                                                                                                                                                 |

#### Hardware Options (Chapter I)

|   |                            |                                                                                                                                                                                                             |
|---|----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Drawer Slide Release Clips | Drawer box style <b>100FT</b> is available with undermount drawer slide release clips/locking devices installed. Please see <b>Chapter I</b> of the <b>Product Specifications Catalog</b> for restrictions. |
|---|----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

#### Material Options

|   |                    |                                                                                                                                                                                                                                                                                                                                  |
|---|--------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Material           | Full/Through dovetail drawer boxes are available in solid wood only.                                                                                                                                                                                                                                                             |
| 2 | Budget/Value Grade | WalzCraft has established the grade “ <b>BG</b> ” to indicate a <b>Budget/Value Grade</b> of material. Budget grade materials include mineral, sap, small glue-ups, and other characteristics common in whatever species you order. The wood is structurally sound and a good value if you are able to use them in your project. |

## Drawer Box Style 100F/T - Full/Through Dovetail

## Drawer Box Options

### Technical Notes: Style 100F/T - Full/Through Dovetail Drawer Boxes...continued

#### Miscellaneous

|   |               |                                                                                                                                                                                                                                                                                               |
|---|---------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Hot Melt/Glue | Hot melt/glue is applied to the bottom of all assembled drawer boxes for added strength. This excludes boxes being built without bottom panels, boxes with flush inset bottom panels, and boxes with <b>DBN500</b> drawer slide notching. Please see <b>Section H.8</b> for more information. |
|---|---------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

#### Ready to Assemble (RTA)

|   |                   |                                                                               |
|---|-------------------|-------------------------------------------------------------------------------|
| 1 | Ready To Assemble | Full/Through dovetail drawer boxes are not available Ready To Assemble (RTA). |
|---|-------------------|-------------------------------------------------------------------------------|

#### Sizes/Dimensions

|   |                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|---|------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Sidewall Thickness           | Available in ½" [12.7mm], ⅝" [15.9mm] and ¾" [19.1mm] thicknesses.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 2 | Minimum & Maximum Sizes      | <p><b>Assembled:</b><br/> <b>Width:</b> Minimum = 4¾" [120.7mm]. Maximum = 43" [1092.2mm]. Absolute Maximum = 60" [1524.0mm].<br/> <b>Depth:</b> Minimum = 4¾" [120.7mm]. Maximum = 36" [914.4mm]. Absolute Maximum = 60" [1524.0mm].<br/> <b>Height:</b> Minimum = 1¼" [44.5mm]. Maximum = 14½" [368.3mm]. Absolute Maximum = 30" [762.0mm].</p> <p>Drawer boxes cannot exceed an absolute maximum <b>depth</b> of 48" [1219.2mm] when bottom panel grain direction is running left to right or a <b>width</b> of 48" [1219.2mm] when bottom panel grain direction is running front to back.</p> <p>The minimum height of a drawer box with a <b>DB Organizer Insert (DBOI)</b> varies. Please see <b>Section H.20</b> for <b>DBOI</b> minimums and other relative dimensions. You must also factor in the bottom panel thickness and bottom panel inset option of the drawer box when calculating the drawer box minimum height.</p> <p>Assembled drawer boxes built between the Maximum and Absolute Maximum sizes will be subject to an <b>"Oversized"</b> Drawer Box Assembly Charge, due to special handling requirements. See <b>Section H.1</b> of our current <b>Wholesale Pricing Catalog</b> for upcharges.</p> |
| 3 | Full/Through Dovetail Height | Dovetail size may vary due to the height of your drawer box, bottom panel thickness and bottom panel inset.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

#### Top Edge Profile Options

|   |                |                                                                                                                                                                                                                                                                                                              |
|---|----------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | "TE1" Top Edge | <p>Constructed with the sides 3.0mm shorter than the front and back of the box. On ¾" [19.1mm] thick material, the sides are 4.0mm shorter than the front and back of the box.</p> <p>All edges are eased.</p> <p>When ordering, please give the height dimension using the size for the front and back.</p> |
| 2 | "TE2" Top Edge | <p>Constructed with the sides 3.0mm shorter than the front and back of the box.</p> <p>All edges are square.</p> <p>When ordering, please give the height dimension using the size for the front and back.</p>                                                                                               |
| 3 | "TE3" Top Edge | Top edges are all flush and eased, except the face that attaches to the back of the drawer front.                                                                                                                                                                                                            |
| 4 | "TE4" Top Edge | Top edges are flush and square on all sides.                                                                                                                                                                                                                                                                 |
| 5 | "TE5" Top Edge | <p>Top edges are flush and radiused to form a half circle, except the face that attaches to the back of the drawer front.</p> <p>A slight flat spot appears on the top where the joint meets.</p>                                                                                                            |
| 6 | "TE6" Top Edge | Top edges are slightly eased on all sides and flush except at the joints where the sides meet the front or back of the drawer box.                                                                                                                                                                           |
| 7 | "TE7" Top Edge | <p>Top edges are slightly eased on all sides and constructed with the sides 3mm shorter than the front and back of the box.</p> <p>When ordering, please give the height dimension using the size for the front and back.</p>                                                                                |

|---|----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

### Material Options

|   |                    |                                                                                                                                                                                                                                                                                                                                  |
|---|--------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Material           | French dovetail drawer boxes are available in solid wood only.                                                                                                                                                                                                                                                                   |
| 2 | Budget/Value Grade | WalzCraft has established the grade " <b>BG</b> " to indicate a <b>Budget/Value Grade</b> of material. Budget grade materials include mineral, sap, small glue-ups, and other characteristics common in whatever species you order. The wood is structurally sound and a good value if you are able to use them in your project. |

### Miscellaneous

|   |                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|---|-----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Hot Melt/Glue         | Hot melt/glue is applied to the bottom of all assembled drawer boxes for added strength. This excludes boxes being built without bottom panels, boxes with flush inset bottom panels, and boxes with <b>DBN500</b> drawer slide notching. Please see <b>Section H.8</b> for more information.                                                                                                                                                                                                                                                                                                                                 |
| 2 | Edge Glued Side Walls | <p>When ordering solid wood French Dovetail drawer boxes in a Natural Grade or a Select Grade at 6" [152.4mm] high or under, the face/front of the drawer box will be made from one solid piece. The left side, right side and back may contain edge glued pieces. For heights over 6" [152.4mm], WalzCraft will use edge glued pieces wherever necessary.</p> <p>For all other wood species grades at any height, solid wood French Dovetail drawer boxes will contain edge glued pieces wherever necessary.</p> <p>See <b>Section H.19</b> for WalzCraft's <b>No Glue-Up (NGU100)</b> option for drawer box side walls.</p> |

### Sizes/Dimensions

|   |                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|---|-----------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Sidewall Thickness                                  | Available in ½" [12.7mm] and ⅝" [15.9mm] thicknesses.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 2 | Integrated Drawer Front Thickness                   | French Dovetail drawer boxes are constructed using ¾" [19.1mm] integrated drawer fronts. For other thicknesses, please contact our Customer Support Team.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 3 | Minimum & Maximum Sizes                             | <p><b>Assembled:</b><br/> <b>Width:</b> Minimum = 4¾" [120.7mm]. Maximum = 43" [1092.2mm]. Absolute Maximum = 60" [1524.0mm].<br/> <b>Depth:</b> Minimum = 4¾" [120.7mm]. Maximum = 36" [914.4mm]. Absolute Maximum = 60" [1524.0mm].<br/> <b>Height:</b> Minimum = 1¾" [44.5mm]. Maximum = 14½" [368.3mm]. Absolute Maximum = 30" [762.0mm].</p> <p>Drawer boxes cannot exceed an absolute maximum <b>depth</b> of 48" [1219.2mm] when bottom panel grain direction is running left to right or a <b>width</b> of 48" [1219.2mm] when bottom panel grain direction is running front to back.</p> <p>The minimum height of a drawer box with a <b>DB Organizer Insert (DBOI)</b> varies. Please see <b>Section H.21</b> for <b>DBOI</b> minimums and other relative dimensions. You must also factor in the bottom panel thickness and bottom panel inset option of the drawer box when calculating the drawer box minimum height.</p> <p>Assembled drawer boxes built between the Maximum and Absolute Maximum sizes will be subject to an "<b>Oversized</b>" Drawer Box Assembly Charge, due to special handling requirements. See <b>Section H.1</b> of our current <b>Wholesale Pricing Catalog</b> for upcharges.</p> |
| 4 | Integrated Drawer Front Extensions (½" Thick Sides) | <ul style="list-style-type: none"> <li>Top: Minimum = 0" [0.0mm], Maximum = 2" [50.8mm].</li> <li>Bottom: Minimum 0" [0.0mm], Maximum = 1" [25.4mm].</li> <li>Left/Right: Minimum = ¼" [6.4mm], Maximum = ¾" [19.1mm].</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 5 | Integrated Drawer Front Extensions (⅝" Thick Sides) | <ul style="list-style-type: none"> <li>Top: Minimum = 0" [0.0mm], Maximum = 2" [50.8mm].</li> <li>Bottom: Minimum 0" [0.0mm], Maximum = 1" [25.4mm].</li> <li>Left/Right: Minimum = ¼" [6.4mm], Maximum = ⅝" [15.9mm].</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

### Technical Notes: Style 100DW - Doweled Drawer Boxes (Plywood)...continued

#### Hardware Options (Chapter I)

|   |                            |                                                                                                                                                                                                      |
|---|----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Drawer Slide Release Clips | Drawer box style 100DW is available with undermount drawer slide release clips/locking devices installed. Please see <i>Chapter I</i> of the <b>Product Specifications Catalog</b> for restrictions. |
|---|----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

#### Material Options

|   |                    |                                                                                                                                                                                                                                                                                                                                            |
|---|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Material           | Doweled drawer boxes are available in veneer core plywood (includes UV Coated Maple ply.), and baltic birch plywood.                                                                                                                                                                                                                       |
| 2 | Budget/Value Grade | WalzCraft has established the grade "BG" to indicate a <b>Budget/Value Grade</b> of material. Budget grade materials include mineral, sap, small glue-ups (n/a with plywood), and other characteristics common in whatever species you order. The wood is structurally sound and a good value if you are able to use them in your project. |

#### Miscellaneous

|   |               |                                                                                                                                                                                                                                                                                               |
|---|---------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Hot Melt Glue | Hot melt/glue is applied to the bottom of all assembled drawer boxes for added strength. This excludes boxes being built without bottom panels, boxes with flush inset bottom panels, and boxes with <b>DBN500</b> drawer slide notching. Please see <i>Section H.8</i> for more information. |
|---|---------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

#### Ready to Assemble (RTA)

|   |                                     |                                                                                                                                                                                                                                                                                                                     |
|---|-------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Ready To Assemble                   | Veneer core plywood and baltic birch Doweled drawer boxes are available Ready to Assemble (RTA).                                                                                                                                                                                                                    |
| 2 | Customer Supplied Drawer Box Bottom | When ordering RTA drawer boxes and supplying your own bottom panel, please specify the Bottom Panel Inset Option (see <i>Section H.6</i> ) and the width of the Dado Groove based on your bottom panel thickness.<br><b>Dado Groove Widths:</b> None, .225" [5.7mm], .250" [6.4mm], .450" [11.4mm], .500" [12.7mm]. |
| 3 | Freight Costs                       | Ordering drawer boxes Ready to Assemble (RTA) may provide you savings in freight costs.                                                                                                                                                                                                                             |
| 4 | Dowels                              | When ordering a doweled drawer box RTA, dowels will be included.                                                                                                                                                                                                                                                    |

#### Sizes/Dimensions

|   |                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|---|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Sidewall Thickness      | <b>Standard Plywood:</b> Available in ½" [12.7mm], ⅝" [15.9mm] and ¾" [19.1mm] thicknesses.<br><b>Baltic Birch Plywood:</b> Available in 12.5mm, 15.2mm, 18.0mm thicknesses.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 2 | Minimum & Maximum Sizes | <b>Assembled and/or Ready to Assemble (RTA):</b><br><b>Width:</b> Minimum = 4¾" [120.7mm]. Maximum = 43" [1092.2mm]. Absolute Maximum = 60" [1524.0mm].<br><b>Depth:</b> Minimum = 4¾" [120.7mm]. Maximum = 36" [914.4mm]. Absolute Maximum = 60" [1524.0mm].<br><b>Height:</b> Minimum = 1¾" [44.5mm]. Maximum = 14½" [368.3mm]. Absolute Maximum = 30" [762.0mm].<br><br>Drawer boxes cannot exceed an absolute maximum <b>depth</b> of 48" [1219.2mm] when bottom panel grain direction is running left to right or a <b>width</b> of 48" [1219.2mm] when bottom panel grain direction is running front to back.<br><br>The minimum height of a drawer box with a <b>DB Organizer Insert (DBOI)</b> varies. Please see <i>Section H.20</i> for <b>DBOI</b> minimums and other relative dimensions. You must also factor in the bottom panel thickness and bottom panel inset option of the drawer box when calculating the drawer box minimum height.<br><br>Assembled drawer boxes built between the Maximum and Absolute Maximum sizes will be subject to an "Oversized" Drawer Box Assembly Charge, due to special handling requirements. See <i>Section H.1</i> of our current <b>Wholesale Pricing Catalog</b> for upcharges. |

#### Top Edge Options

|   |                 |                                                                                                                                                                                                                                              |
|---|-----------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | "TE10" Top Edge | Top edge option is constructed with the front and back being 2.0mm shorter than the sides of the box and finished with a matching PVC edgeband 0.5mm thick.<br>When ordering, please give the height dimension using the size for the sides. |
| 2 | "TE11" Top Edge | Top edge option is constructed with the front and back being 2.0mm shorter than the sides of the box and finished with a veneer edgeband 0.5mm thick.<br>When ordering, please give the height dimension using the size for the sides.       |
| 3 | "TE16" Top Edge | Constructed with the front and back being 3.0mm shorter than the sides of the box.<br>All edges are square.<br>When ordering, please give the height dimension using the size for the sides.                                                 |
| 4 | "TE18" Top Edge | Top edges are flush and square on all sides.                                                                                                                                                                                                 |

### Technical Notes: Style 100DW - Doweled Drawer Boxes (Melamine)...continued

#### Finish Options - Assembled and RTA (Chapter R)

|   |        |                                                                                                            |
|---|--------|------------------------------------------------------------------------------------------------------------|
| 1 | Finish | Assembled and/or Ready to Assemble (RTA): Melamine Doweled drawer boxes are not available with any finish. |
|---|--------|------------------------------------------------------------------------------------------------------------|

#### Hardware Options (Chapter I)

|   |                            |                                                                                                                                                                                                      |
|---|----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Drawer Slide Release Clips | Drawer box style 100DW is available with undermount drawer slide release clips/locking devices installed. Please see <b>Chapter I</b> of the <b>Product Specifications Catalog</b> for restrictions. |
|---|----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

#### Material Options

|   |          |                                                                                             |
|---|----------|---------------------------------------------------------------------------------------------|
| 1 | Material | Doweled melamine drawer boxes are available in white, almond or a maple wood grain pattern. |
|---|----------|---------------------------------------------------------------------------------------------|

#### Miscellaneous

|   |                   |                                                                                                                                                                                                                                                         |
|---|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Hot Melt Glue     | Hot melt/glue is applied to the bottom of all assembled drawer boxes for added strength. This excludes boxes being built without bottom panels, and boxes with <b>DBN500</b> drawer slide notching. Please see <b>Section H.7</b> for more information. |
| 2 | Drawer Box Dowels | All doweled drawer boxes with ½" [12.7mm], ⅝" [15.9mm] or ¾" [19.1mm] sidewall thickness use 6.0mm diameter x 13.0mm long dowels.                                                                                                                       |

#### Ready to Assemble (RTA)

|   |                                     |                                                                                                                                                                                                                                                                                                                     |
|---|-------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Ready To Assemble                   | Doweled melamine drawer boxes are available Ready to Assemble (RTA).                                                                                                                                                                                                                                                |
| 2 | Customer Supplied Drawer Box Bottom | When ordering RTA drawer boxes and supplying your own bottom panel, please specify the bottom panel inset option (see <b>Section H.7</b> ) and the width of the dado groove based on your bottom panel thickness.<br><b>Dado Groove Widths:</b> None, .225" [5.7mm], .250" [6.4mm], .450" [11.4mm], .500" [12.7mm]. |
| 3 | Freight Costs                       | Ordering drawer boxes Ready to Assemble (RTA) may provide you savings in freight costs.                                                                                                                                                                                                                             |
| 4 | Dowels                              | When ordering a doweled drawer box Ready to Assemble (RTA), dowels will be included.                                                                                                                                                                                                                                |

#### Sizes/Dimensions

|   |                         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|---|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Sidewall Thickness      | Available in ½", ⅝" and ¾" nominal thicknesses. See Melamine Sheet Stock in <b>Section V.4</b> for exact melamine thicknesses with tolerances.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 2 | Minimum & Maximum Sizes | <p><b>Assembled and Ready to Assemble (RTA):</b><br/> <b>Width:</b> Minimum = 4¾" [120.7mm]. Maximum = 43" [1092.2mm]. Absolute Maximum = 60" [1524.0mm].<br/> <b>Depth:</b> Minimum = 4¾" [120.7mm]. Maximum = 36" [914.4mm]. Absolute Maximum = 60" [1524.0mm].<br/> <b>Height:</b> Minimum = 1¾" [44.5mm]. Maximum = 14½" [368.3mm]. Absolute Maximum = 30" [762.0mm].</p> <p>Drawer boxes cannot exceed an absolute maximum <b>depth</b> of 48" [1219.2mm] when bottom panel grain direction is running left to right or a <b>width</b> of 48" [1219.2mm] when bottom panel grain direction is running front to back.</p> <p>The minimum height of a drawer box with a <b>DB Organizer Insert (DBOI)</b> varies. Please see <b>Section H.20</b> for <b>DBOI</b> minimums and other relative dimensions. You must also factor in the bottom panel thickness and bottom panel inset option of the drawer box when calculating the drawer box minimum height.</p> <p>Assembled drawer boxes built between the Maximum and Absolute Maximum sizes will be subject to an <b>"Oversized"</b> Drawer Box Assembly Charge, due to special handling requirements. See <b>Section H.1</b> of our current <b>Wholesale Pricing Catalog</b> for upcharges.</p> |

#### Top Edge Options

|   |                 |                                                                                                                                                                                                                                                |
|---|-----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | "TE10" Top Edge | <p>Top edge option is constructed with the front and back being 2.0mm shorter than the sides of the box and finished with a PVC edgeband 0.5mm thick.</p> <p>When ordering, please give the height dimension using the size for the sides.</p> |
| 2 | "TE19" Top Edge | <p>Top edge option is constructed with the front and back being 3.0mm shorter than the sides of the box and finished with a PVC edgeband 3.0mm thick.</p> <p>When ordering, please give the height dimension using the size for the sides.</p> |

| 2 | Melamine Bottom Panels  | Melamine bottom panels are not available with any finish.        |
| 3 | UV Coated Bottom Panels | UV Coated Maple bottom panels are not available with any finish. |

Material Options

|   |                    |                                                                                                                                                                                                                                                                                                                                                    |
|---|--------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Budget/Value Grade | WalzCraft has established the grade "BG" to indicate a <b>Budget/Value Grade</b> of material. Budget grade materials include mineral, sap, small glue-ups (n/a with plywood bottoms), and other characteristics common in whatever species you order. The wood is structurally sound and a good value if you are able to use them in your project. |

#### Miscellaneous

|   |                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|---|-----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Hot Melt/Glue Pattern | Hot melt/glue is applied to the bottom of all assembled drawer boxes for added strength. This excludes boxes being built without bottom panels, boxes with flush inset bottom panels, and boxes with <b>DBN500</b> drawer slide notching.<br><br><b>No Notching:</b> When no notching is present, WalzCraft's standard will be to apply hot melt/glue where the bottom panel meets the left side, right side and back ( <b>Option A</b> ).<br>• Hot melt/glue is not applied at the front and is not applied all the way into the corners.<br>• If required, you can also specify custom placements:<br>◦ <b>Option B:</b> Left side, right side and front.<br>◦ <b>Option C:</b> Left side and right side.<br>◦ <b>Option D:</b> Front and back.<br>◦ <b>Option E:</b> Left side, right side, front and back.<br>◦ <b>Option F:</b> No hot melt/glue.<br>• Please indicate custom placement in the <b>Special Instructions</b> column on your order form.<br><br><b>DBN100 &amp; DBN200:</b> Only available with <b>Option D</b> . Hot melt/glue is applied where the bottom panel meets the front and back.<br>• Hot melt/glue is not applied all the way to the notch or into the corners.<br><br><b>DBN500:</b> Only available with <b>Option F</b> . Hot melt/glue is not applied when using this removable bottom panel application.<br>• This notching option will allow you to insert your own custom drawer box bottom material. |
|---|-----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

#### Ready to Assemble (RTA)

|   |                   |                                                                                                                                                                            |
|---|-------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Ready To Assemble | <b>DBN500</b> is the only notching option available with Ready to Assemble ( <b>RTA</b> ) drawer boxes.<br>• Must have a bottom panel inset option other than flush inset. |
|---|-------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

#### Sizes/Dimensions

|   |                          |                                                                                                                                                                                                              |
|---|--------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Minimum Drawer Box Depth | The minimum drawer box depth will be 9" [228.6mm] when applying the <b>DBN100</b> , <b>DBN200</b> or <b>DBN500</b> notching options.                                                                         |
| 2 | Notch Width              | Specify the notch width in ¼" [6.4mm] increments, minimum of 1½" [38.1mm], maximum of 5" [127.0mm].<br>• No notch width is required for <b>DBN500</b> , as this notch runs the full width of the drawer box. |

## Drawer Box Ears

### Drawer Box Ear Option

\*\* Drawer Box Ears are applied to the front of the drawer box. Often used with pullout style drawer boxes, ears can help conceal side mounted hardware.

#### Additional Options (Chapter H)

|   |                    |                                                                                                                                                                                                                                                                                                  |
|---|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Drawer Box Options | Compatible with the following drawer box options:                                                                                                                                                                                                                                                |
|   |                    | <ul style="list-style-type: none"> <li>• Shaped Side Patterns (<i>Section H.8</i>)</li> <li>• Scoop Fronts (<i>Section H.9</i>)</li> <li>• Accented Top Edge (<i>Section H.12</i>)</li> <li>• Laser Engraving (<i>Section H.13</i>)</li> <li>• Notched Patterns (<i>Section H.15</i>)</li> </ul> |
|   |                    | See individual drawer box option <i>Sections H.7</i> through <i>H.18</i> for more information, as restrictions may apply.                                                                                                                                                                        |

#### Miscellaneous

|   |                        |                                                                                                                                                                                                                                                                                                                         |
|---|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Drawer Slide Placement | Please keep in mind that if using side mount drawer slides on a drawer box with Ears, the slides will have to be set back the thickness of the Ear from the front of the box. Please consult drawer slide specifications for drawer box sizing and mounting information. Not compatible with under mount drawer slides. |
|---|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

#### Ready to Assemble (RTA)

|   |                         |                                                                                                                                                              |
|---|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Ready to Assemble (RTA) | Please see individual drawer box <i>Sections H.1</i> through <i>H.5</i> for drawer box styles that are compatible with Ready to Assemble (RTA) construction. |
|---|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|

#### Sizes/Dimensions

|   |               |                                                                                                                                                                                                        |
|---|---------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Ear Extension | Drawer Box Ears extend $\frac{1}{16}$ " [11.1mm] past the pullout sides.                                                                                                                               |
| 2 | Box Size      | When ordering drawer boxes with Ears, please order the box size without the Ear dimension added.                                                                                                       |
| 3 | Ear Thickness | The Ear thickness varies depending on the thickness of the sidewalls.                                                                                                                                  |
|   |               | $\frac{1}{2}$ " [12.7mm] Sides - Ears are $\frac{1}{4}$ " [6.4mm] thick. Front of drawer box will be $\frac{5}{8}$ " [15.9mm] thick to allow for dovetail joint and $\frac{1}{4}$ " [6.4mm] thick ear. |
|   |               | $\frac{5}{8}$ " [15.9mm] Sides - Ears are $\frac{1}{4}$ " [6.4mm] thick. Front of box will be $\frac{5}{8}$ " [15.9mm] thick.                                                                          |
|   |               | $\frac{3}{4}$ " [19.1mm] Sides - Ears are $\frac{3}{8}$ " [9.5mm] thick. Front of box will be $\frac{3}{4}$ " [19.1mm] thick.                                                                          |

#### Top Edge Profile Options

|   |               |                                                                                                                                                                                          |
|---|---------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | TE22 Top Edge | Top edges are flush and square on all sides.                                                                                                                                             |
| 2 | TE23 Top Edge | Top edges are all flush and eased on all sides.                                                                                                                                          |
| 3 | TE24 Top Edge | Constructed with the sides 3.0mm shorter than the front and back of the box. On $\frac{3}{4}$ " [19.1mm] thick material, the sides are 4.0mm shorter than the front and back of the box. |
|   |               | All edges are eased.                                                                                                                                                                     |
|   |               | When ordering, please give the height dimension using the size for the front and back.                                                                                                   |

| 1 | Sidewall Thickness                | Available with sidewall thicknesses of ½" [12.7mm], ⅝" [15.9mm] and ¾" [19.1mm].                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 2 | Interior Drawer Box Dimension     | <p><b>HFS01:</b> Interior drawer box width must be 12" [304.8mm] for standard letter size hanging files.<br/>• <b>Add 3"</b> [76.2mm] for standard legal size hanging files.</p> <p><b>HFS02:</b> Interior drawer box depth must be 12" [304.8mm] for standard letter size hanging files.<br/>• <b>Add 3"</b> [76.2mm] for standard legal size hanging files.<br/>• Depending on your chosen material thickness, drawer boxes with <b>HFS02</b> will finish with an overall depth between 13" [330.2mm] and 13½" [342.9mm]. This dimension will be incompatible with most undermount drawer slides. Please consult your drawer slide manufacturer for installation specifications.</p> <p><b>HFS03:</b> Interior drawer box dimension between front and divider must be 12" [304.8mm] for standard letter size hanging files.<br/>• <b>Add 3"</b> [76.2mm] for standard legal size hanging files.</p> <p><b>HFS04:</b> Customer must specify the interior opening dimensions.<br/>• Interior drawer box dimension between front and divider must be 12" [304.8mm] for standard letter size hanging files.<br/>• <b>Add 3"</b> [76.2mm] for standard legal size hanging files, or specify custom measurements for non-standard hanging file sizes.</p> <p><b>HFS05, HFS06:</b> Customer must specify the interior opening dimensions.<br/>• Interior drawer box dimension between side and divider must be 12" [304.8mm] for standard letter size hanging files.<br/>• <b>Add 3"</b> [76.2mm] for standard legal size hanging files, or specify custom measurements for non-standard hanging file sizes.</p> <p><b>HFS07, HFS08:</b> Interior drawer box dimension between front and divider must be 12" [304.8mm] for standard letter size hanging files.<br/>• <b>Add 3"</b> [76.2mm] for standard legal size hanging files.</p> |
| 3 | Minimum Drawer Box Depth          | <p>Minimum depth for a drawer box with <b>HFS03</b> and letter size divider placement is 16" [406.4mm].<br/>Minimum depth for a drawer box with <b>HFS03</b> and legal size divider placement is 18" [406.4mm].</p> <p>Calculate minimum depth for a drawer box with <b>HFS04</b> by <b>adding 3"</b> [76.2mm] to <b>Position #2 dimension</b>.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 4 | Minimum Drawer Box Width          | <p>Calculate minimum width for a drawer box with <b>HFS05, HFS06</b> by <b>adding 3"</b> [76.2mm] to <b>Position #2 dimension</b>.</p> <p><b>HFS07, HFS08:</b> <b>HFS03:</b> Interior drawer box dimension between front and divider must be 12" [304.8mm] for standard letter size hanging files.<br/>• <b>Add 3"</b> [76.2mm] for standard legal size hanging files.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 5 | Minimum Drawer Box Height Formula | The following formula can be used to calculate the overall <i>minimum</i> drawer box height required to hold a letter size hanging file: <b>Letter Size File Folder = 9¼" + Bottom Panel Thickness + Bottom Panel Inset Dimension</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 6 | Cabinet Opening Height            | To determine the cabinet opening height for a hanging file drawer box you'll need to factor in:<br>a) The distance between the bottom of the drawer box and the bottom of the cabinet opening.<br>b) The height of any file tabs or labels that protrude beyond the top of the hanging file folder.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 7 | Aluminum Bar Stock                | Aluminum Bar Stock is ½" [12.7mm] high with a maximum length of 72" [1828.8mm].                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 8 | Slot Size Requirements            | The slot size required to install WalzCraft's Aluminum Bar stock is: ⅝" Wide x ¼" Deep [1.6mm x 6.4mm].                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 9 | Slot Placement                    | Standard placement is ⅛" [3.2mm] from the inside of the drawer.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

#### Hanging File Slots - END

[illegible]

### Accented Top Edge

WalzCraft offers the Accented Top Edge which allows you to select a different wood species for construction on the top edge, creating a decorative detail for your drawer box.

**Ready to Assemble (RTA)**

|   |                                |                                                                                                                                                              |
|---|--------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | <b>Ready to Assemble (RTA)</b> | Please see individual drawer box <i>Sections H.1</i> through <i>H.5</i> for drawer box styles that are compatible with Ready to Assemble (RTA) construction. |
|---|--------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|

**Sizes / Dimensions**

|   |                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|---|---------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | <b>Maximum Size</b> | Maximum part size for any image is 24" wide x 36" high.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 2 | <b>Logo Size</b>    | <p><b>Formula used to calculate your logo height:</b></p> <ul style="list-style-type: none"> <li>• The height dimension of your shortest drawer box will be used in the formula to calculate your logo height.</li> <li>• Allow ½" of space between the top edge of the drawer box and the top of the logo.</li> <li>• Allow ¼" minimum of space between the bottom of the logo and the top of the bottom panel, measuring from the inside of the box.</li> <li>• Your logo height will be the distance between the above two points. The width will be proportionate to the submitted drawing, given the calculated logo height.</li> </ul> <p>This logo height will then be used throughout the entire order, even though drawer box heights may vary.</p> <p>Once you establish a certain size logo, it will be kept on file for future use. Multiple sizes can be saved.</p> |
| 3 | <b>Placement</b>    | <p>Standard location for logo can be any one of the four positions shown in the drawings on the previous page.</p> <ul style="list-style-type: none"> <li>• The edge / side of the logo will always measure 2" in from the inside of the drawer box front / back.</li> <li>• The top of the logo will always be placed ½" down from the top edge of the drawer box.</li> <li>• The space between the bottom of the logo and the top of the bottom panel will vary as drawer box heights vary.</li> </ul> <p>Please submit requests for custom logo placement to our Customer Support Team, as additional charges may apply.</p>                                                                                                                                                                                                                                                  |

**Wood Specie Options (Chapter S)**

|   |                            |                                                                                                                                                                                                                                                                     |
|---|----------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | <b>Recommended Species</b> | <p>All solid wood species are available with laser engraving, but the following are most suitable:</p> <ul style="list-style-type: none"> <li>• Alder, Cherry, Maple, Red Birch and Walnut.</li> <li>• Baltic Birch plywood is also an available option.</li> </ul> |
|---|----------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

#### Sizes/Dimensions

|   |                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|---|-----------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Angle Limitations                                         | <b>DBP103L/R &amp; DPB104L/R:</b> These patterns cannot go below a 45° angle or exceed a 135° angle, for dovetailing purposes.                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 2 | Customer Specified Drawer Box Sizes and Undermount Slides | <b>Specifying the correct Drawer Box Size on the WalzCraft order form when the Drawer Box is angled or Curved and the Drawer Slides are Undermount:</b> WalzCraft always recommends that our customers, in their own shop, build a trial mock up of the installed drawer box using the actual type and length of drawer slide intended for use in the final installation. There are many variables to consider for installations of this type. Experience has shown that the best way to determine if the movement of the drawer box will be as required is to do a trial mock up. |
| 3 | Minimum Opening Width                                     | When using drawer slide notching, the minimum inside opening width at the “ <i>back</i> ” of box for <b>DBP101</b> and <b>DBP102 L/R</b> will equal the drawer slide notch width plus ¼" [6.35mm].<br><ul style="list-style-type: none"> <li>See <i>Section H.7</i> for more information on drawer slide notching.</li> </ul>                                                                                                                                                                                                                                                      |
| 4 | Minimum Part Sizes                                        | If a part size falls below 3½" [88.9mm] in length, a CAD drawing must be approved prior to manufacturing the product, as dowel joinery may replace half blind dovetail joinery to assemble a particular joint.                                                                                                                                                                                                                                                                                                                                                                     |

### Technical Notes: Curved Front Patterns

#### Required Options (Chapter H)

|   |                            |                                                                                                                                                                                                                                                                                                                                                                                                                 |
|---|----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Drawer Box Styles          | Please see individual drawer box <b>Sections H.1</b> through <b>H.5</b> for compatible drawer box styles.<br>Curved front drawer boxes will use half blind dovetail joints, where the front meets the sides, whenever possible. In the event that this joint is beyond our capabilities with your chosen configuration and radius, WalzCraft will build the box using an alternatively suitable joinery method. |
| 2 | Top Edge Profile Options   | See chosen drawer box style for available top edge profile options.<br>• Assembled drawer boxes with curved front patterns are not available with <b>TE5</b> .                                                                                                                                                                                                                                                  |
| 3 | Bottom Panel Inset Options | Assembled drawer boxes with curved front patterns are available with all bottom panel inset options <b>except</b> flush inset.<br>• See <b>Section H.6</b> for bottom panel inset options.                                                                                                                                                                                                                      |

#### Additional Options (Chapter H)

|   |                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|---|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Drawer Box Options | Compatible with the following drawer box options:<br>• Drawer Slide Notching ( <b>Section H.7</b> )<br>◦ All curved front drawer boxes are available with <b>NHH1, DBN100, DBN500</b> only.<br>▪ <b>DBN100</b> notch available in ¼" increments with a maximum width of 2" [50.8mm].<br>◦ When using undermount drawer slides supplied by WalzCraft, please see <b>Sections I.2</b> and <b>I.8</b> for minimum drawer box width given the use of front locking clips.<br>• Scoop Fronts ( <b>Section H.9</b> )<br>◦ All curved front patterns are available with all scoop front options.<br>◦ Curved front drawer boxes with scoop fronts are only available with square top edges <b>TE2</b> and <b>TE4</b> .<br>• Laser Engraving ( <b>Section H.13</b> )<br>• Notched Patterns ( <b>Section H.15</b> )<br>◦ All curved front drawer boxes are available with <b>DBP101, DBP102L/R</b> and <b>DBP103L/R</b> notched patterns.<br>• Drawer Slide Blocking ( <b>Section H.18</b> )<br>◦ All curved front drawer boxes are available with the <b>DSB100</b> drawer slide blocking option.<br>See individual drawer box option <b>Sections H.7</b> through <b>H.18</b> for more information, as restrictions may apply. |

#### Sizes/Dimensions

|   |                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|---|-----------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Maximum Height                                            | The maximum height for any curved front drawer box is 13" [330.2mm].                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 2 | Specified Radius                                          | The radius must be specified at the face of the curve when ordering.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 3 | Drawer Front Radius                                       | If a matching drawer front is being ordered with one of these designs, the radius for the drawer box will be determined from the radius of the drawer front.                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 4 | DBP201, DBP203L/R                                         | Due to the radius of these styles, the front may be thicker than the remaining sides. See <b>Figure 1</b> at bottom of previous page.                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 5 | Customer Specified Drawer Box Sizes and Undermount Slides | <b>Specifying the correct drawer box size on the WalzCraft order form when the drawer box is angled or curved and the drawer slides are undermount:</b> WalzCraft always recommends that our customers, in their own shop, build a trial mock up of the installed drawer box using the actual type and length of drawer slide intended for use in the final installation. There are many variables to consider for installations of this type. Experience has shown that the best way to determine if the movement of the drawer box will be as required is to do a trial mock up. |

#### Curved Front Patterns - END

► For PRICING ► See Section **H.16** in our current Wholesale Pricing Catalog.

### Half Blind Dovetail Drawer Boxes - Inside Corner Patterns - Solid Wood & Baltic Birch

|   |                            |                                                                                                               |
|---|----------------------------|---------------------------------------------------------------------------------------------------------------|
| 1 | Drawer Box Styles          | Please see individual drawer box <b>Sections H.1</b> through <b>H.5</b> for compatible drawer box styles.     |
| 2 | Top Edge Profile Options   | See chosen drawer box style for available top edge profile options.                                           |
| 3 | Bottom Panel Inset Options | Assembled drawer boxes with drawer slide blocking are only available with a <b>13.0mm</b> bottom panel inset. |

#### Additional Options (Chapter H)

|   |                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|---|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Drawer Box Options | <p>Compatible with the following drawer box options:</p> <ul style="list-style-type: none"> <li>• Drawer Slide Notching (<b>Section H.7</b>) <ul style="list-style-type: none"> <li>◦ Drawer slide blocking must be used in conjunction with the <b>NHH1</b> drawer slide notching option (ordered separately).</li> </ul> </li> <li>• Notched Patterns (<b>Section H.15</b>) <ul style="list-style-type: none"> <li>◦ <b>DSB100</b> is available with the <b>DBP104L/R</b> notched patterns.</li> </ul> </li> <li>• Curved Front Patterns (<b>Section H.16</b>) <ul style="list-style-type: none"> <li>◦ <b>DSB100</b> is available with all curved front patterns.</li> </ul> </li> <li>• Inside Corner Patterns (<b>Section H.17</b>) <ul style="list-style-type: none"> <li>◦ <b>DSB100</b> is available with the <b>LS101</b> inside corner pattern.</li> <li>◦ <b>DSB200</b> is available with the <b>LS102</b> inside corner pattern.</li> </ul> </li> </ul> <p>See individual drawer box option <b>Sections H.7</b> through <b>H.10</b> for more information, as restrictions may apply.</p> |
| 2 | Installation       | <p>When ordering Drawer Slide Blocks for undermount drawer slides, WalzCraft fits and installs the front blocks so that they are mounted flush with the bottom edge of the drawer box providing you with a straight edge to attach the front locking clips, which is part of the undermount drawer slide system. The rear blocks are installed to provide a place for the <b>NHH1</b> to be applied, which accepts the drawer slides.</p> <p>Front locking clips can be ordered separately or ordered and installed by WalzCraft (<b>See Sections I.2 and I.9</b>).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

#### Ready to Assemble (RTA)

|   |                         |                                                                                    |
|---|-------------------------|------------------------------------------------------------------------------------|
| 1 | Ready to Assemble (RTA) | Drawer boxes with drawer slide blocking are not available Ready to Assemble (RTA). |

#### Sizes /Dimensions

|   |                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|---|-----------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Front Locking Clips                                       | <p>Unless specified otherwise, WalzCraft will maintain a minimum width of 4½" for front locking clips.</p> <ul style="list-style-type: none"> <li>• Some front locking clips require less mounting space. The customer may approve a lower minimum for increased design flexibility. Examples for such minimums are noted below.</li> <li>• The absolute minimum width for the front blocks that WalzCraft will produce is 1⅞".</li> </ul> <p>Space required for front locking clips:</p> <ul style="list-style-type: none"> <li>• For <b>Salice</b> front locking clips model <b>A710.610</b> and <b>A750.010</b>, minimum width required = 4" (<b>see Section I.2</b>).</li> <li>• For <b>Salice</b> front locking clips model <b>AFCGXX3B</b>, minimum width required = 4½" (<b>see Section I.2</b>).</li> <li>• For <b>Blum</b> front locking clip model <b>T51.1901 L/R</b>, minimum width required = 3⅝" (<b>see Section I.9</b>).</li> <li>• For <b>Blum</b> front locking clip model <b>T51.0801.20 L/R</b>, minimum width required = 1⅞" (<b>see Section I.9</b>).</li> </ul> <p><b>Note:</b> For front locking clips other than those listed above, please consult the drawer slide manufacturer for determining installation specification.</p> |
| 2 | Customer Specified Drawer Box Sizes and Undermount Slides | <p><b>Specifying the Correct Drawer Box Size on the WalzCraft Order Form When the Drawer Box is Angled or Curved and the Drawer Slides are Undermount:</b> WalzCraft always recommends that our customers, in their own shop, build a trial/mock-up of the installed drawer box using the actual type and length of drawer slide intended for use in the final installation. There are many variables to consider for installations of this type. Experience has shown that the best way to determine if the movement of the drawer box will be as required is to build a trial/mock-up.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

#### Miscellaneous

|   |                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|---|-----------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Glue-Up Options | <b>Drawer Box Heights 6" [152.4mm] and Under:</b><br>WalzCraft makes every attempt to produce these drawer box parts from one solid piece of wood. Due to lumber availability and/or wood species, parts for drawer boxes with heights 6" [152.4mm] and under may need to be made from two or more edge glued pieces. You may request the <b>No Glue-Up Option (NGU100)</b> to ensure that each part will be built from one solid piece of wood. |
|   |                 | <b>Drawer Box Heights over 6" [152.4mm]:</b><br>The <b>No Glue-Up Option (NGU100)</b> is not available for drawer boxes with heights over 6" [152.4mm]. WalzCraft will use edge glued pieces wherever necessary.                                                                                                                                                                                                                                 |

#### Ready to Assemble (RTA)

|   |                         |                                                                                                                                                              |
|---|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Ready to Assemble (RTA) | Please see individual drawer box <i>Sections H.1</i> through <i>H.5</i> for drawer box styles that are compatible with Ready to Assemble (RTA) construction. |
|---|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|

#### Sizes/Dimensions

|   |                      |                                                                                  |
|---|----------------------|----------------------------------------------------------------------------------|
| 1 | Sidewall Thicknesses | Available with sidewall thicknesses of ½" [12.7mm], ⅝" [15.9mm] and ¾" [19.1mm]. |

(114mm x 114mm)

**Style: DBOI 404**  
Min. Size: 7¼Wx3½D  
(184mm x 79mm)

### Ordering & Pricing Notes: Drawer Box Organizer Inserts

#### Ordering Guidelines

|                |                                                        |                                                                                                                                                                                                                                                                            |
|----------------|--------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1              | Order Drawer Box & DB Organizer Insert (DBOI) Together | Please use <b><i>Drawer Box with Organizer Insert Order Form (E•Z Form #4i).</i></b> <ul style="list-style-type: none"><li>• This form is used to order both the drawer box and the drawer box organizer insert (DBOI).</li></ul>                                          |
|                |                                                        | On each of the drawings in this section you will find the information that is required for ordering. <ul style="list-style-type: none"><li>• Spaces will be provided on the order form for the overall width and overall depth of the drawer box.</li></ul>                |
|                |                                                        | When filling in the Drawer Box Style # along with the Drawer Box’s exact Width, Depth and Height, you must also fill in the DB Organizer Insert (DBOI) #. Example: <b>304L</b> . Be sure to include the height of horizontal openings (Dimensions A & B) where applicable. |
|                |                                                        | WalzCraft will determine the size of the DB Organizer Insert based on the size and specifications of the Drawer Box. We will figure finished dimensions, allowing for a 1.5mm gap around the perimeter of the Insert.                                                      |
| 2              | Order Drawer Box Organizer Insert Only                 | Please use <b><i>Drawer Box Organizer Insert (DBOI) Only Order Form (E•Z Form #4.2).</i></b>                                                                                                                                                                               |
|                |                                                        | On each of the drawings in this section you will find the information that is required for ordering. <ul style="list-style-type: none"><li>• Spaces will be provided on the order form for the overall width, depth and height of the insert.</li></ul>                    |
|                |                                                        | Order exact sizes only.                                                                                                                                                                                                                                                    |
|                |                                                        | Make sure to include the DB Organizer Insert (DBOI) #. Example: <b>304L</b> .                                                                                                                                                                                              |
|                |                                                        | Make sure to include height of horizontal openings (Dimensions A & B) where applicable.                                                                                                                                                                                    |
| <b>Pricing</b> |                                                        |                                                                                                                                                                                                                                                                            |
| 1              | Pricing                                                | Please see <b><i>Section H.21</i></b> of our current <b>Wholesale Pricing Catalog</b> .                                                                                                                                                                                    |

| 1 | Outside Edge Profile | Only available with a <b>D7</b> outside edge profile. |
|---|----------------------|-------------------------------------------------------|

#### Sizes/Dimensions

|   |           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|---|-----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | Thickness | Available in $\frac{3}{16}$ " [4.8mm], $\frac{1}{4}$ " [6.4mm], $\frac{3}{8}$ " [9.5mm] or $\frac{1}{2}$ " [12.7mm] thicknesses.                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 2 | Width     | Drawer Box Divider Stock is available in a minimum width of $\frac{3}{8}$ " [15.9mm] and a maximum width of 6" [152.4mm].<br><b>6" [152.4mm] Maximum Width:</b> WalzCraft makes every attempt to produce these parts from one solid piece of wood. Due to lumber availability and/or wood species, widths under 6" [152.4mm] may need to be made from two or more edge glued pieces. For widths over 6" [152.4mm], please refer to our <b>GUPFS</b> product found in <b>Section M.16</b> .                                                                                                              |
| 3 | Length    | Available in 8' [2438.4mm] lengths, Cut-to-Length or Random Lengths.<br>The minimum length for Cut-to-Length pieces is 3" [76.2mm].<br>Random Length sizes vary between 36" - 96" [914.4mm - 2438.4mm]. When measured, we round down to the next nearest $\frac{1}{2}$ foot. Minimum quantity of 200 lineal feet.<br>Solid wood drawer box divider stock has a standard length of up to 96" [2438.4mm]. Lengths greater than 8' [2438.4mm] are subject to availability. <i>Please note that the choice of wood species and grade can impact the availability of lengths greater than 8' [2438.4mm].</i> |

#### Wood Specie Options (Chapter S)

|   |                        |                                                                       |
|---|------------------------|-----------------------------------------------------------------------|
| 1 | Knotty & Rustic Grades | Knotty and Rustic grade materials will only have small knots, if any. |
|---|------------------------|-----------------------------------------------------------------------|
