SOLID BRASS FEET AND SLIPPER CUPS

Our new line of Solid Brass Feet & Slipper Cups feature the finest quality cast brass. Cast brass, made of a copper/zinc alloy, is known for its material integrity, smooth surface finish, durability, and strength. Cast brass Feet & Slipper Cups will outlast normal wear and will maintain its bright finish for years to come.

AB: Antique Brass

WR: Flat Black

PB: Polished Brass

CR: Chrome

SB: Satin Brass

ANODIZED ALUMINUM FERRULES, SLEEVES AND METALLIC TRIM

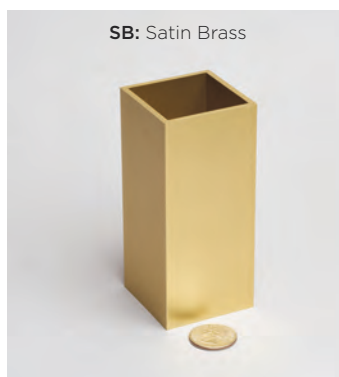

We use a special Aluminum alloy to create our ferrules, metallic trim, and other decorative aluminum accents. This special alloy can be chemically brightened. Our Aluminum finishes are anodized and feature bright chromes, soft satins and deep matte finishes. Anodizing is considered the best method of finishing in order to achieve a true metallic look. Anodized finishes are extremely durable and will not flake, peel or fade. **If exact color is critical to your project, please request color samples.**

NEW

WOOD SPECIES

We source only the finest FAS hardwoods for our products. The majority of our products are made from laminated blocks with more than one glue line. We strive to provide the best possible color match between staves, but variations may occur. Variations in color and grain pattern are natural characteristics of wood and are not considered defects.

POWDER COATED STEEL AND METALS

Our steel products are laser cut, Tig welded by skilled craftsmen, and powder coated in a non-toxic, environmentally safe finish. Because powder coating is baked onto the steel, the finish is substantially harder than a wet paint finish. The results provide a finished part that is resistant to scratching, chipping, and peeling and can handle extreme weather conditions with minimal corrosion. In addition, powder coating is environmentally friendly, is non-toxic, emits no harmful fumes, and the powder can be recycled.

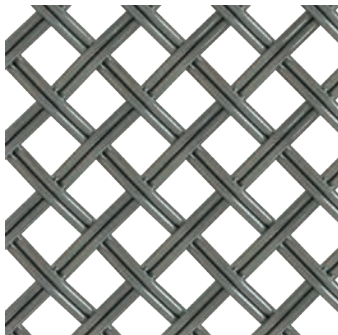

Don't forget, custom manufacturing is our specialty.
If you don't see what you need, give us a call or submit a request for a quote.

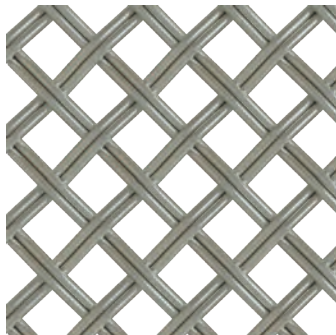

ELECTROPLATED WIRE GRILLE FINISHES

Our electroplated Decorative Grilles are hand woven & crimped from superior steel wire. The process of electroplating deposits metal finishes onto the steel through electricity creating both bright and antique finishes. Finishes can vary from run to run. **If exact color is critical to your project, please request samples.**

SPECIAL WOOD CUTS & SECONDARY SERVICES

We are pleased to offer several options to help you in your design process. Secondary services such as splitting in half, quarter notching, electrical outlet notching, and hanger bolt installation are available on the majority of our columns, legs and bun feet. Additional charges apply.

QUARTER CUT

01QUARTERNOTCH

Quarter notching creates a single quartered piece and a single 3/4 piece. Both pieces are included in purchase.

SPLIT

01SPLITCOLUMN

Split column in half. 1/8" of thickness may be lost due to saw kerf. Both halves are included in purchase.

ANGLE CUT

01ANGLECUT

Product is cut at an angle from corner to corner, full length only. Both pieces are included in purchase.

STOP NOTCH

01STOPNOTCH

Stop notch a column. Let us know how far down you would like notched.

SPLIT BUN FOOT

01SPLITFEET

Split bun foot in half. Both pieces are included in purchase.

HANGER BOLT

01HANGERBOLT

5/16-18 hanger bolt installed in one end. Hanger bolt installed to protrude 1/2".

BOX ROUTE

01BXROUTE

Add an electrical box to your column.

ELECTRICAL BORE

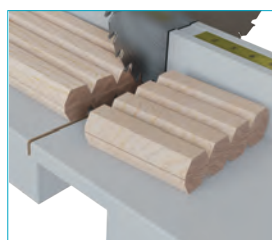

01ELECBORE

A 1/2" hole the entire length of the column.

MOULDING & TAMBOUR TRIM

We will cut your 96" moulding to 92" to reduce shipping costs.

Please note – not all items can be cut in all the formats above, nor can all columns receive an Electrical Box Notch.

All custom cut products are non-returnable.

Metallic Trim Accents stocked in **Brushed Aluminum (BA)**, **Chrome (CR)**, **Flat Black (WR)**, **Polished Brass (PB)**, **Satin Brass (SB)**, **Satin Stainless (ST)**, & **Warm Bronze (WB)**. All components pictured in flat black.

DECORATIVE ALUMINUM STRAPPING

Pictured: .75" Decorative Aluminium Strapping in **Brushed Aluminum**

Use as trim on cabinetry or replace existing & outdated Light Rail Inserts with our new Decorative Aluminum Strapping. Shipped in 72" lengths, the straps can be cut on site to fit your specifications using a lubricated, non-ferrous, high tooth count (96 is recommended) carbide blade designed for cutting metal. We stock strong, double-sided, clear industrial tape that's temperature resistant to adhere to mouldings and cabinet panels. See tape on page 13.

DOUBLE-SIDED ECO-FRIENDLY LEATHER

Available as whole and half sheets.

Our leather is an eco-friendly byproduct of the leather industry. Like wood veneer made from compressed paper, this leather is composed of vegetable-tanned leather remnants that are pulverized and mixed with small amounts of tree bark and natural latex. A final layer of resin renders the product highly impervious to wear and tear.

Sample Kits available. Please contact our Customer Support Team.

Gallery Rail

Designs of distinction®

Kitchen, Bath & Home
by BW1

Attach Gallery Rail components to the tops of cabinets, furniture, shelving, spice racks, and more to create an eye-catching, curated, and luxury look. Typical spacing between posts across the front is approximately 6" - 10" apart. Manufactured from the finest quality cast brass, Gallery Rail components will not tarnish, rust, peel, or chip. Gallery Rail Sample Kits available on our website.

ELECTRICAL BOX ROUTING

Let the design of your kitchen island speak for itself. Make one of its most functional yet unsightly components, the electrical outlet, inconspicuous. Integrate electrical outlets into your design and create the perfect union of form and function.

We offer Electrical Box Routing and Electrical Boring to most columns greater than 3"W. Electrical Box Routing allows you to install electrical components directly into the column. For additional electrical wiring, we can bore a ½" hole through the entire length of the column.

AVAILABLE FOR MOST COLUMNS.

Warranty

Wood, Iron and Metal Components:

- Our liability shall not exceed the replacement cost of our products.
- Defect on the material or workmanship must be reported upon receipt and prior to installation.
- Prompt and proper sealing and finishing is essential to maintain wood stability. Sealing the ends of legs, bun feet and posts, backs and tops of corbels, etc. will reduce the chance of cracking due to moisture loss or moisture increase.
- We do not recommend our stock wood products for exterior use - Doing so will void the warranty.
- **WOOD PRODUCTS MUST BE MAINTAINED UNDER STABLE TEMPERATURE AND HUMIDITY CONDITIONS TO REMAIN UNDER WARRANTY.**
- Defects caused by abuse, negligence, or damage from installation are not covered. Damages arising from improper or incorrect installation are not covered.
- Metal finishes may be subject to small variations. Designs of Distinction® is not responsible for color variations and cannot guarantee exact matches between similar items.
- Any product that is proven to be defective in workmanship or material is returned to Designs of Distinction® within the applicable warranty period. Designs of Distinction® will, at its option, either repair, replace or credit the customer for the purchase price of the product. This warranty extends only to persons or organizations that originally purchase the product from Designs of Distinction®.

Product Information

Decorative Wire Grille and Mesh:

- Interior applications only. Use of this product on exterior applications will void the warranty.
- Can be cleaned easily with any NON-AMMONIA based cleaners.

Rattan:

Rattan is a natural product and will vary from sheet to sheet in color. Because our rattan is hand-woven, no two sheets are alike. Rattan will change color as it ages, will fade from the sun, or mold if left in a damp location. Rattan can be cleaned with mild soap and water. Stretching and shrinking of your rattan insert is not considered a defect as this is part of the natural material characteristics.

Anodized Aluminum:

- **Anodizing Color Range:** Variation in gloss, light & dark, and tristimulus system values (RGB) should be expected. Because anodized coatings are translucent, appearance will vary with viewing angle and base level finish of material.
- **Anodized Aluminum Racking Marks:** All anodized aluminum extrusion and parts must have electrical contact to the part to be anodized. Various contact types are used depending upon the size and geometry of the part being anodized. The electrical contact will leave racking marks on the finished parts. Racking marks include bolt marks, clip marks or thread marks. We strive to minimize the visual impact of racking marks on all of our anodized products but cannot guarantee they will be completely mark free.
- **Exterior Use:** Anodized aluminum parts can be used outdoors but colors may fade overtime. If you are concerned about your color fading, we recommend you do not use this product on an exterior application.

WARNING!

Designs of Distinction[®]'s "rigid" (formerly solid) style beaded insert panels have been manufactured to be used as center panel inserts for frames only. Due to the machined profile of the panel and the material's thinness, this product is not recommended for use without being captured within a frame.

If installed as a center panel insert into a frame, you should allow for movement of the panel within the frame - to account for the natural expansion and contraction of the material. When finishing, the product should be finished on both sides and allowed to air dry. **DO NOT OVEN DRY.**

Should you choose to use our rigid panels as a stand-alone item, you can minimize movement by attaching the panel to a 1/4" - 3/8" backer. However, this does NOT guarantee completely stable product and will not be warranted by Designs of Distinction.

For onlay applications - such as walls, hoods or cabinet wraps - we recommend our flexible panel products. Flexible beaded panels consist of individual staves, glued to a flexible canvas or paper backer. Because they are individual staves, they move independently of each other and do not cause stress across the panel.

Please note: Panels that are exposed to extreme variations in humidity, i.e.: fireplace surround, oven hood, or in a bathroom will have greater expansion and contraction regardless of the finish applied or method of construction.

Designs of Distinction's warranty covers products installed and finished per the recommendations above for 1 year after purchase. It is recommended that products exposed to humidity changes be resealed periodically to reduce the loss of moisture.
